## **Directory of Industries (10+)**

## FOREWORD

The Government of the United Republic of Tanzania through Tanzania Statistical Master Plan (TSMP) is working on the improvement of quality of statistics in the country by putting in place a better infrastructure of statistical production. This involves up-dating of basic data from different household and establishment based surveys including the 2013 Census of Industrial Production, 2013 (CIP, 2013). Historically, the CIP, 2013 is the fourth Industrial Census to be conducted in Tanzania Mainland since independence in 1961. The first, second and the third were conducted in 1963, 1978 and 1989 respectively.

The National Bureau of Statistics (NBS) in collaboration with the Ministry of Industry, Trade and Investment (MITI) were responsible for conducting the Census. The broad objective of this Census is to generate relevant and up-dated industrial information that will be used to assess the contribution of industrial sector to the economy. Moreover, it aims at providing benchmark data for other subsequent surveys and analysis for planning, evidence-based policy formulation and decision making purposes on the sector. The purpose of this report is to present in detail, the methods employed in conducting the Census, so as to assist the readers in the interpretation of the published results. This report is among the series of several reports produced for the CIP, 2013. Other reports include; the Summary Results report, the Statistical report, the Analytical report, and the 2013 Directory of Industries which engage 10 or more persons.
