

Average household size

The average household size (obtained by dividing the total population in private households to the number of private households), for Tanzania, was 4.7 against 4.9 persons that was found in the 2002 Census. Apart from Dar es Salaam (3.9 persons), Lindi (3.8 persons) and Mtwara (3.7 persons), the remaining regions recorded average household size between 4.1 noted in Njombe Region and 6.9 found in Simiyu.
