## PRESS RELEASE

Date: 8<sup>th</sup> May, 2019

## NATIONAL CONSUMER PRICE INDEX (NCPI) FOR THE MONTH OF APRIL, 2019

### METHODOLOGICAL NOTE

#### Definition

The NCPI measures the change over time in the cost of a fixed basket of goods and services that are purchased by a representative sample of households in Tanzania. A basket includes a list of 278 goods and services of which 97 are Food and Non Alcoholic Beverages and 181 are Non Food items that are being priced on monthly basis.

#### Weights and a Reference Period

The NCPI weights are based on monetary expenditures relating to consumption for all households in the 25 geographic regions of Tanzania Mainland. The index weights are based on expenditures of both urban and rural households derived from 2011/12 Household Budget Survey and the price reference period is December, 2015.

#### Classification

The NCPI follows the internationally recommended Classification of Individual Consumption by Purpose (COICOP). NCPI is being disseminated with indices for the 12 major groups of COICOP as well as several additional index aggregations. These additional indices are; 1) Food and Non-alcoholic Beverages - combining food consumed at home and food consumed in restaurants; 2) Energy and Fuels - combining electricity and other fuels for use at home including petrol and diesel; 3) All Items Less Food; and 4) All Items Less Food and Energy.

#### Elementary and Higher Level Indices

The NCPI use geometric mean of price relatives for compiling elementary index aggregates and the Lowe Index formula which is Laspeyres index formula type is used for computing higher level aggregates.

## ANNUAL HEADLINE INFLATION SLIGHTLY INCREASED TO 3.2%

Table number 1 above indicates that, Annual Headline Inflation Rate for the month of April, 2019 has slightly increased to 3.2% from 3.1% recorded in March, 2019. The increase of the headline inflation explains that, the speed of price change for commodities for the year ended April, 2019 has slightly increased compared to the speed of the price change recorded for the year ended March, 2019. The overall index went up to 116.82 in April, 2019 from 113.20 recorded in April, 2018.

### Food and Non Food Inflation Rates

On the other hand, the 12 month index change for non-food products in April, 2019 has decreased to 5.3% from 5.7% recorded in March, 2019.

## Inflation Rate excluding Food and Energy

The Annual Inflation Rate which excludes food and energy for the month of April, 2019 has slightly decreased to 3.6% from 3.7% recorded in March, 2019.

The NCPI used to compute this type of Inflation Rate excludes food consumed at home and restaurants, non alcoholic beverages, petrol, diesel, gas, kerosene, charcoal, firewood and electricity. Excluding food and energy which are the most volatile components in the total NCPI could provide a more stable Inflation Rate figure for Policy Makers.

**Chart 1: Movement of National Consumer Price Indices (NCPI) and Inflation Rates from April, 2018 – April, 2019. (Dec. 2015 = 100)**
