PRESS RELEASE

NATIONAL CONSUMER PRICE INDEX (NCPI) FOR THE MONTH OF SEPTEMBER, 2019

METHODOLOGICAL NOTE

Definition

The NCPI measures the change over time in the cost of a fixed basket of goods and services that are purchased by a representative sample of households in Tanzania. A basket includes a list of 278 goods and services of which 97 are Food and Non-Alcoholic Beverages and 181 are Non-Food items that are being priced on monthly basis.

Weights and a Reference Period

The NCPI weights are based on monetary expenditures relating to consumption for all households in the 25 geographic regions of Tanzania Mainland. The index weights are based on expenditures of both urban and rural households derived from 2011/12 Household Budget Survey and the price reference period is December, 2015.

Classification

The NCPI follows the internationally recommended Classification of Individual Consumption by Purpose (COICOP). NCPI is being disseminated with indices for the 12 major groups of COICOP as well as several additional index aggregations. These additional indices are; 1) Food and Non-alcoholic Beverages - combining food consumed at home and food consumed in restaurants; 2) Energy and Fuels - combining electricity and other fuels for use at home including petrol and diesel; 3) All Items Less Food; and 4) All Items Less Food and Energy.

Elementary and Higher Level Indices

The NCPI use geometric mean of price relatives for compiling elementary index aggregates and the Lowe Index formula which is Laspeyres index formula type is used for computing higher level aggregates.

ANNUAL HEADLINE INFLATION DECREASED TO 3.4%

The Headline Inflation Rate measures inflation rate when all items in the fixed CPI basket are included. Table number 1 above indicates that, Annual Headline Inflation Rate for the month of September, 2019 has decreased to 3.4% from 3.6% recorded in August, 2019. The decrease of the headline inflation explains that, the speed of price change for commodities for the year ended September, 2019 has decreased compared to the speed of price change recorded for the year ended August, 2019. The overall index went up to 115.92 in September, 2019 from 112.12 recorded in September, 2018.

Food and Non Food Inflation Rates

Food and Non-Alcoholic Beverages Inflation Rate for the month of September, 2019 has increased to 4.0% from 3.7% recorded in August, 2019. Annual Inflation Rate for food consumed at home and away from home for the month of September, 2019 has slightly increased to 5.1% from 5.0% recorded in August, 2019. On the other hand, the 12-month index change for non-food products in September, 2019 has decreased to 3.1% from 3.5% recorded in August, 2019.

Inflation Rate excluding Food and Energy

The Annual Inflation Rate which excludes food and energy for the month of September, 2019 has decreased to 2.7% from 2.9% recorded in August, 2019.

The NCPI used to compute this type of Inflation Rate excludes food consumed at home and restaurants, petrol, diesel, gas, kerosene, charcoal, firewood and electricity. Excluding food and energy which are the most volatile components in the total NCPI could provide a more stable Inflation Rate figure for Policy Makers.

Chart 1: Movement of National Consumer Price Indices (NCPI) and Inflation Rates from September, 2018 – September, 2019. (Dec. 2015 = 100)

The overall index has decreased to 115.92 in September, 2019 from 116.01 recorded in August, 2019. The decrease of the overall index is mainly attributed to the price decrease for food items. Some food items that contributed to such a decrease include: - sardines by 2.5%; fruits by 1.1%; vegetables by 1.2%; peas by 4.0%; cocoyam by 3.7% and round potatoes by 4.2%.
