Preface

Tanzania in Figures 2018 is the revision of a version that was released in 2017 which *summarises* important socio-economic characteristics, as well as selected development indicators of the United Republic of Tanzania. Tanzania in Figures 2018 booklet presents the data series for the period from 2013 to 2018.

This booklet provides aggregated data and contains information from various official statistical publications compiled by the National Bureau of Statistics (NBS), sector ministries, Government Departments and Agencies. The indicators presented are useful for policy makers for planning, monitoring and evaluation of various development programs at all levels. The booklet, therefore serves as a brief and comprehensive reference for such crucial statistical information.

The National Bureau of Statistics, as a coordinator and producer of official statistics in the Country, appreciates the contributions made by various stakeholders in statistics for supplying inputs used in the compilation of this booklet. In order to effectively participate in strengthening the National Statistical System (NSS), we urge further co-operation in updating and compilation of the forthcoming editions of similar booklet and other statistical publications.

The latest figures (2018) presented in this booklet for some indicators are provisional and may be revised according to the NBS revision policies. Also, information in some tables is sourced from *ad hoc* and periodic surveys and therefore such information is not available for some years. The data gaps attributed to the surveys shall be filled immediately upon availability of the respective survey reports.

Comments and suggestions that may help to enrich the next edition of Tanzania in Figures are welcome from all stakeholders.

The soft copy is also available in the NBS website; www.nbs.go.tz. For more detailed information on the published statistics, please visit the NBS library.

The Tanzania HIV Impact Survey 2016 - 2017 (THIS)

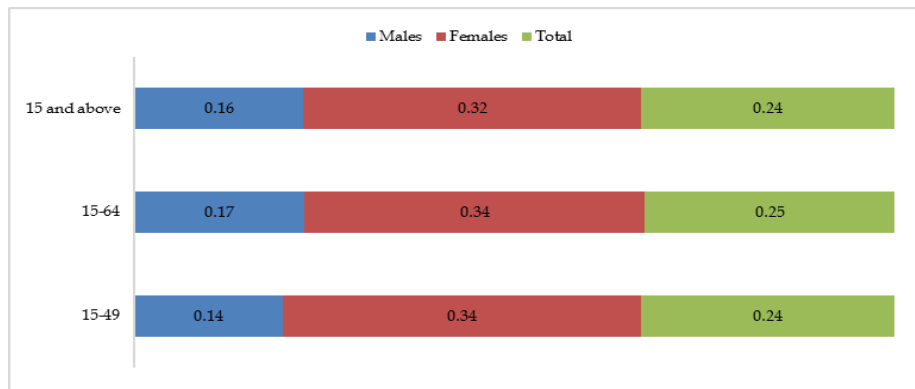

The Tanzania HIV Impact Survey 2016 - 2017 (THIS) is the fourth in a series of household-based human immunodeficiency virus (HIV) surveys and it is the first national HIV survey that covered populations of all ages and other indicators (HIV incidence, viral load (VL) suppression (VLS) etc), in the country.

A nationally representative survey of 36,087 adults aged 15 years and older and 10,452 children aged 0 - 14 years (7,477 children aged 0 - 9 years and 2,975 early adolescents aged 10 - 14 years) were eligible to participate in the survey.

HIV Incidence

Annual incidence of HIV infection among adults aged 15 years and older is 0.24% overall (0.16% among males and 0.32% among females). This corresponds to approximately 72,000 new infections per year (about 24,000 among males and 48,000 among females).

Annual HIV Incidence using Lag/VL/ARV testing algorithm, THIS 2016 - 2017

LAG/VL/ARV: Limiting antigen/Viral load/Antiretrovirals

HIV Prevalence

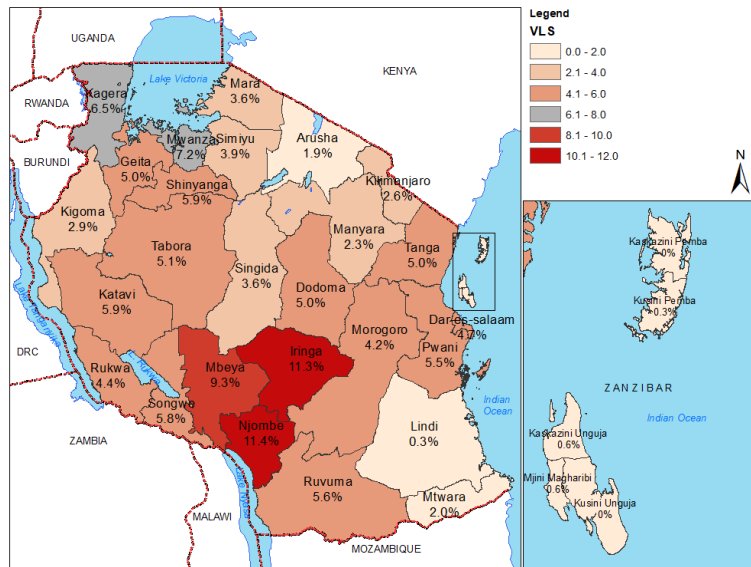

Prevalence of HIV infection among adults aged 15 years and older in Tanzania was 4.9% (6.3% among females, and 3.4% among males). This corresponds to approximately 1.4 million PLHIV aged 15 years and older in the country.

Viral Load Suppression

Viral load suppression is a key indicator of treatment success in HIV-positive individuals. For the purposes of THIS, VLS was defined as VL less than 1,000 HIV RNA copies/mL of plasma among the population of HIV-positive persons ages 15 years and above.

Overall, 51.9% of HIV-positive adults aged 15 years and older had VLS (41.5% among males and 57.2% among females).

Land Rights and Tenure Security

For the First Time Tanzania Starts Reporting SDG Indicator Number 1.4.2

“Proportion of Total Adult Population with Secure Tenure Rights to Land, With Legally Recognized Documentation and who Perceive their Rights to Land as Secure, by Sex and by Type of Tenure”

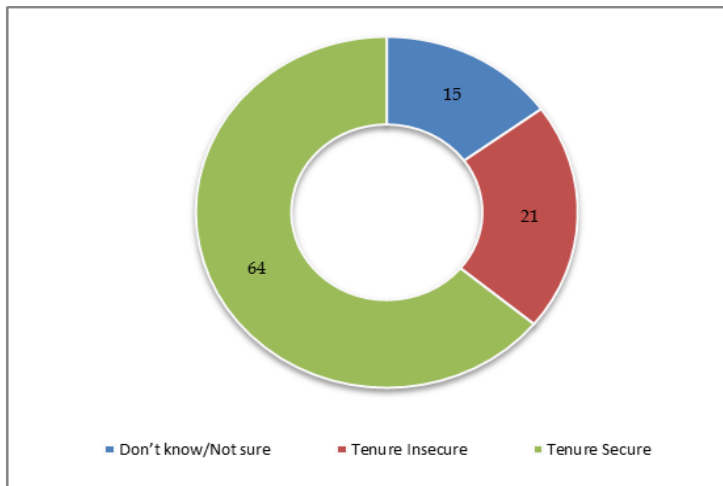

This result is based on the Baseline survey on Property Rights and Tenure Security (PRINDEX) conducted in 2018 aimed at assessing individual adults' perceptions regarding ownership, use rights and security of lands and dwelling. The security was measured based on their likelihood losing rights and ownership of formal documentation proving their ownership or use rights. Other 32 countries worldwide conducted this survey with same purposes.

Selected Main Findings in Brief:

- Tanzania stands at 4th position out 9 Eastern and Southern African countries with 64 percent of interviewed adults believed their property are TENURE SECURE, also above the average of 61 percent for 9 western Africa states.
- Tanzania stands at 10th position out of 33 countries worldwide involved in same study having 50 percent of interviewed adults own dwelling they are living in.

- Security levels on ownership and use of property remains very low among renters (37 %) and 14 percent among owners of welling.

Proportions of adults with levels of tenure security – based on likelihood of losing rights ownership and use

The two sovereign states formed the United Republic of Tanzania on 26 April 1964.

The general election held in October 2015 brought to power His Excellency Dr. John Pombe Joseph Magufuli from Chama Cha Mapinduzi (CCM) as the fifth President of the United Republic of Tanzania for a five-years term.

Dodoma is the capital city and Dar es Salaam is the major commercial city. The official currency is the Tanzanian Shilling (TZS) and the national language is Kiswahili, but English is also widely used.
