ACKNOWLEDGEMENT

This report presents short-term indicators on the performance of the manufacturing industry for the period 2004-2012. The results show the trend of production for selected commodities in regard to quantities produced and volume indices of industrial production.

The survey management team was comprised of Mr. Morrice N. Oyuke; Director, Economic Statistics Directorate and Ms. Joy Sawe; Manager, Industrial and Construction Statistics Department. The personnel who compiled the report or assisted during its preparation include; Ms. Veronica C. Mwangoka, Ms. Chabo Shaban, Mr. Childa Hamis and Mr. Fadhili Khalfani. Their work is gratefully acknowledged.

I am also grateful to the Regional Statistical Managers of National Bureau of Statistics and Chief Executive Officers of different establishments in all the 21 regions of Tanzania Mainland for their effort at different stages of this survey. I highly appreciate the invaluable support from the Regional or District Commissioners and Administrative Secretaries for their assistance and facilitation in many ways while undertaking the survey.

Dr. Albina Chuwa
Director General
National Bureau of Statistics

INTRODUCTION

This report presents results of the Quarterly Survey of Industrial Production for each quarter of the calendar year for the period 2004-2012. For each selected commodity, information presented include quantities produced and the corresponding volume indices.

Objective

The primary objective of the quarterly survey of industrial production is to provide information on short-term development of the industrial sector. The information presented in this report will be of use to all those interested in the country's industrial sector including planners, decision makers and public at large.

Scope and coverage

The survey is limited to the manufacturing industry and covers all manufacturing establishments employing 50 persons or more. These, according to the available information, contribute about 85 percent of the total manufacturing gross output. Smaller establishments with substantial output were also included in the survey. However, these constitute less than 10 percent of the total number of establishments covered.

Methodology

Data collection was done four times in each reference year. The data collected were quantities produced each month. Starting from the first quarter 1996, computation of the index has followed the chained Laspeyre's formula instead of the usual Laspeyre's fixed base version so as to incorporate any structural changes such as entries or exits of industries/commodities that may have taken place in the sector over a specific period of time.

During the exercise, the activity/commodity list was revised and the entire series re-weighted accordingly using 1995 information. In the exercise, the ex-factory commodity values were used as new weights while the average quarterly commodity quantities of 1995 were used as new base year for the production in the calculation of subsequent quarterly indices (1995 = 100). The results were then chained with those of the previous respective annual 1995 indices (1985 = 100) by simply multiplying the two binary indices to obtain the corresponding chained indices (1985=100).

The generalized Laspeyre's volume index formula from time **0** to time **t** is in the form:

$$I_{0,t} = \frac{\sum \frac{Q_t * W_0}{Q_0}}{\sum W_0} * 100$$

where,

Q_t = current period quantity output

Q_0 = base period quantity output

W_0 = the weight, that is share of the product in the base year.

Assuming that the following indices were calculated on the basis of the above formula;

i.e. I_1 = 1995 annual index (1985=100)

and I_2 = 2000 index (1995=100)

Then, the index

I_3 i.e. 2000 index (1985=100) is $I_1 * I_2$

A SUMMARY OF RESULTS

The classification used in this report is the International Standard Industrial Classification of all economic activities.

Table 1: Production Indices of Manufacturing Industry by, ISIC Division (1985=100)

ISIC Division	Year									
	2004	2005	2006	2007	2008	2009	2010	2011	2012

34 Paper and paper products	78	75	74	198	310	295	317	343	360	
35 Chemical, petroleum and plastic products	78	89	96	99	107	125	137	140	129	
36 Pottery, china, glass and non-metallic products	288	325	320	395	415	459	526	536	576	
37 Basic metal industries	115	123	135	143	177	191	235	260	298	
38 Fabricated metal products, machinery and equipment	55	42	56	61	74	72	76	82	91	
3 Total manufacturing	185	200	226	238	260	274	290	296	328	

Table 2: Production Indices and Percentage Change of Manufacturing Industry by ISIC Division (1985=100)

ISIC Division	Year					Percentage Change 2011-2012
	2008	2009	2010	2011	2012	
31 Food, beverages and tobacco	351	375	386	392	458	16.8
32 Textiles and leather	286	229	244	226	186	-17.7
33 Wood and wood products	263	246	244	273	374	0.3
34 Paper and paper products	310	295	317	343	360	5.0
35 Chemical, petroleum and plastic products	107	125	137	140	129	-7.9
36 Pottery, china, glass and non-metallic products	415	459	526	536	576	7.4
37 Basic metal industries	177	191	235	260	298	14.6
38 Fabricated metal products,/ machinery and equipment					91	
	74	72	76	82		11.0
3 Total manufacturing	260	274	290	296	328	10.8

Table 2 shows that in 2012, the volume of production in the manufacturing industry increased to 10.8 percent compared to 2.1 percent for the year 2011. This increase is attributed to the increase in food, beverages and tobacco (16.8 percent); basic metal industries (14.6 percent); paper and paper products (5.0 percent); pottery, china, glass and non-metallic products (7.4 percent); and fabricated metal products/machinery and equipment (11.0 percent). However, there was a decrease in production of textiles and leather (17.7 percent) while chemical, petroleum, and plastic products decreased by 7.9 percent.

Charts 1 and 2 show the trend in the production index of manufacturing industry for the period 2006 to 2012.

National Bureau of Statistics

Vision

To be a preferable source of official statistics in Tanzania

Mission

To facilitate planning and decision making within the government and the business community, to stimulate research and inform public debate through the provision of relevant, reliable and timely statistics and a quality statistical service in general.

The NBS welcomes recommendations, suggestions to all stakeholders in order to improve the coming version. Channel your recommendations, suggestions and questions through the following address.
