Percentage of foreigners

Prevalence of foreign population is quite negligible since they consist of less than one percent of the total Tanzanian population. Notable proportions of non-Tanzanian population can be found in few regions mainly those close to the borders such as Kagera (0.94 percent), Rukwa (0.74 percent) and Mtwara (0.67 percent) which were affected by influx of refugees in recent years. Dar es Salaam is another region with a high proportion of non-Tanzanians (0.64 percent) because of its commercial nature of the area.
