PRESS RELEASE

Date: 09th April, 2018

NATIONAL CONSUMER PRICE INDEX (NCPI) FOR MARCH, 2018

METHODOLOGICAL NOTE

Definition

The NCPI measures the change over time in the cost of a fixed basket of goods and services that are purchased by a representative sample of households in Tanzania. A basket includes a list of 278 goods and services of which 97 are Food and Non Alcoholic Beverages and 181 are Non Food items that are being priced on monthly basis.

Weights and a Reference Period

The NCPI weights are based on monetary expenditures relating to consumption for all households in the 25 geographic regions of Tanzania. The index weights are based on expenditures of both urban and rural households derived from 2011/12 Household Budget Survey and the price reference period is December, 2015.

Classification

The NCPI follows the internationally recommended Classification of Individual Consumption by Purpose (COICOP). NCPI is being disseminated with indices for the 12 major groups of COICOP as well as several additional index aggregations. These additional indices are; 1) Food and Non-alcoholic Beverages - combining food consumed at home and food consumed in restaurants; 2) Energy and Fuels - combining electricity and other fuels for use at home including petrol and diesel; 3) All Items Less Food; and 4) All Items Less Food and Energy.

Elementary and Higher Level Indices

The NCPI has incorporated a number of methodological improvements including the use of geometric mean of price relatives for compiling elementary index aggregates, the use of an improved index compilation system, and improved procedures for collecting and processing prices. The Lowe Index formula which is Laspeyres index formula type continues to be used for computing higher level aggregates for the NCPI.

ANNUAL HEADLINE INFLATION RATE DECREASES TO 3.9%

Table 1: Changes in the NCPI for March, 2018, (Dec., 2015 = 100)

The Headline Inflation Rate measures inflation rate when all items in the fixed CPI basket are included. Table number 1 above indicates that, Annual Headline Inflation Rate for the month of March, 2018 has decreased to 3.9% from 4.1% recorded in February, 2018. The decrease of the headline inflation explains that, the speed of price change for commodities in the year ending March, 2018 has decreased compared to the speed of price change recorded in the year ended February, 2018. The overall index went up to 112.70 in March, 2018 from 108.44 recorded in March, 2017. Food and Non Alcoholic Beverages Inflation Rate for the month of March, 2018 has decreased to 4.7% from 5.4% recorded in February, 2018.

Food and Non Food Inflation Rates

Annual Inflation Rate for food consumed at home and away from home has decreased to 5.0% in March, 2018 from 5.8% recorded in February, 2018. In addition, the 12 month index change for non-food products in March, 2018 has increased to 3.5% from 3.3% recorded in February, 2018.

Inflation Rate excluding Food and Energy

The Annual Inflation Rate which excludes food and energy for the month of March, 2018 has slightly decreased to 1.6% from 1.7% recorded in February, 2018.

The NCPI used to compute this type of Inflation Rate excludes food consumed at home and restaurants, non alcoholic beverages, petrol, diesel, gas, kerosene, charcoal, firewood and electricity. Excluding food and energy which are the most volatile components in the total NCPI could provide a more stable Inflation Rate figure for Policy Makers.

Chart 1: Movement of National Consumer Price Indices (NCPI) and Inflation Rates from March, 2017 – March, 2018. (Dec., 2015 = 100)

Chart number 1 above explains that; CPI has shown a relatively stable movement of prices from March, 2017 to March, 2018. In addition, Annual Headline Inflation Rates over the same period have decreased tremendously from 6.4% in March, 2017 to 3.9% in March, 2018

MONTHLY CHANGE OF CONSUMER PRICE INDEX FROM FEBRUARY, 2018 TO MARCH, 2018

The Consumer Price Index from February, 2018 to March, 2018 has changed by 1.2%, compared to a change of 1.1% recorded from January, 2018 to February, 2018. The overall index has increased to 112.70 in March, 2018 from 111.33 recorded in February, 2018. The increase of the overall index is attributed to price increase for both food and non-food items. Some food items that contributed to such an increase include; rice by 3.8%, maize grains by 4.1%, fresh fish by 2.6%, vegetables by 5.3%, cassava flour by 1.9% and sardines by 4.3%.

On the other hand, non- food items that contributed to such an increase include; kerosene by 1.2%, charcoal by 2.7% and diesel by 3.1%.
