PRESS RELEASE

Date: 08th November, 2018

NATIONAL CONSUMER PRICE INDEX (NCPI) FOR THE MONTH OF OCTOBER, 2018

METHODOLOGICAL NOTE

Definition

The NCPI measures the change over time in the cost of a fixed basket of goods and services that are purchased by a representative sample of households in Tanzania. A basket includes a list of 278 goods and services of which 97 are Food and Non Alcoholic Beverages and 181 are Non Food items that are being priced on monthly basis.

Weights and a Reference Period

The NCPI weights are based on monetary expenditures relating to consumption for all households in the 25 geographic regions of Tanzania Mainland. The index weights are based on expenditures of both urban and rural households derived from 2011/12 Household Budget Survey and the price reference period is December, 2015.

Classification

The NCPI follows the internationally recommended Classification of Individual Consumption by Purpose (COICOP). NCPI is being disseminated with indices for the 12 major groups of COICOP as well as several additional index aggregations. These additional indices are; 1) Food and Non-alcoholic Beverages - combining food consumed at home and food consumed in restaurants; 2) Energy and Fuels - combining electricity and other fuels for use at home including petrol and diesel; 3) All Items Less Food; and 4) All Items Less Food and Energy.

Elementary and Higher Level Indices

The NCPI use geometric mean of price relatives for compiling elementary index aggregates and the Lowe Index formula which is Laspeyres index formula type is used for computing higher level aggregates.

ANNUAL HEADLINE INFLATION DECREASED TO 3.2%

The Headline Inflation Rate measures inflation rate when all items in the fixed CPI basket are included. Table number 1 above indicates that, Annual Headline Inflation Rate for the month of October, 2018 has decreased to 3.2% from 3.4% recorded in September, 2018. The decrease of the headline inflation explains that, the speed of price change for commodities for the year ended October, 2018 has decreased compared to the speed of the price change recorded for the year ended September, 2018. The overall index went up to 111.83 in October, 2018 from 108.41 recorded in October, 2017. Food and Non Alcoholic Beverages Inflation Rate for the Month of October, 2018 has decreased to 1.2% from 2.0% recorded in September, 2018.

Food and Non Food Inflation Rates

Food and Non Alcoholic Beverages Inflation Rate for the month of October, 2018 has decreased to 1.2% from 2.0% recorded in September, 2018. Annual Inflation Rate for food consumed at home and away from home has also decreased to 2.5% in October, 2018 from 3.1% recorded in September, 2018. However, the 12 month index change for non-food products in October, 2018 has increased to 5.0% from 4.8% recorded in September, 2018.

Inflation Rate excluding Food and Energy

The Annual Inflation Rate which excludes food and energy for the month of October, 2018 has slightly increased to 2.3% from 2.2% recorded in September, 2018.

The NCPI used to compute this type of Inflation Rate excludes food consumed at home and restaurants, non alcoholic beverages, petrol, diesel, gas, kerosene, charcoal, firewood and electricity. Excluding food and energy which are the most volatile components in the total NCPI could provide a more stable Inflation Rate figure for Policy Makers.

Chart 1: Movement of National Consumer Price Indices (NCPI) and Inflation Rates from October, 2017 – October, 2018. (Dec., 2015 = 100)

Chart number 1 above explains that; CPI has shown a relatively stable movement of prices from October, 2017 to October, 2018. In addition, Annual Headline Inflation Rates over the same period range between 5.1% in October, 2017 and 3.2% recorded in October, 2018.

The Consumer Price Index from September, 2018 to October, 2018 has decreased by 0.3% compared to an increase of 0.1% recorded in September, 2018 from August, 2018. The overall index has decreased to 111.83 in October, 2018 from 112.12 recorded in September, 2018. The decrease of the overall index is mainly attributed to price decrease of food items.
