## **1.0 Introduction**

This report presents Quarterly Gross Domestic Product (QGDP) at current and constant prices for Tanzania Mainland, base year 2015. The QGDP facilitates frequent and appropriate policy interventions by providing reliable and timely reports on recent short-term economic developments.

### **1.1. World Economy**

According to the World Economic Outlook (WEO) January 2023 report, the global economy in 2022 was projected to grow at 3.4 percent higher than 3.2 percent forecasted in the WEO October 2022 report. Meanwhile, global economic growth estimates for 2023 is revised to 2.9 percent, higher by 0.2 percentage points than projected growth in the WEO October 2022 report. The 2022 revision considered surprisingly, strong performance of real GDP in the third quarter of 2022 in numerous economies, including the United States, the euro area, and major emerging market and developing economies. The sources of these surprises were in many cases domestic: stronger-than-expected private consumption and investment amid tight labor markets and greater-than-anticipated fiscal support. Households spent more to satisfy pent-up demand, particularly on services, partly by drawing down their stock of savings as economies reopened. Business investment rose to meet demand. On the supply side, easing bottlenecks and declining transportation costs reduced pressures on input prices and allowed for a rebound in previously constrained sectors, such as motor vehicles. Energy markets have adjusted faster than expected to the shock from Russia's invasion of Ukraine.

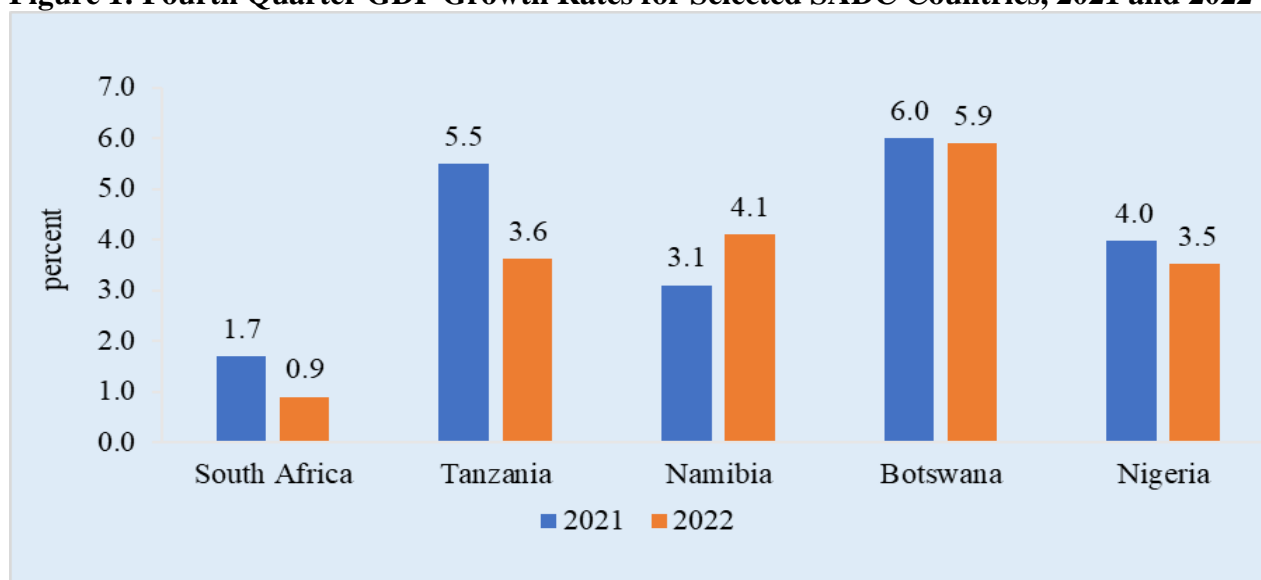

### **1.2. Sub-Saharan Africa**

According to the WEO January 2023 report, economic growth among sub-Saharan Africa countries is projected at 3.8 percent equivalent to 0.1 percentage points higher than previous projection in the WEO October 2022 report. South Africa economy is projected to grow at a rate of 2.6 percent in 2022 with an increase of 0.1 percentage points compared to the October 2022 WEO projections. In addition, Nigeria economic growth projection is revised to 3.0 percent in January WEO projection which is 0.2 percentage points higher compared to the WEO October 2022 projection.

### 1.3. Southern Africa Development Community

According to the WEO January 2023 report, economic growth in the region is expected to grow by 3.8 percent, which is 0.1 percentage points higher than the WEO October 2022 projection. Economic growth for South Africa increased by 0.9 percent in the fourth quarter 2022 compared to 1.7 percent increase over a similar period in 2021. Namibia's economy grew by 4.1 percent in the fourth quarter 2022 compared to 3.1 percent in the similar period in 2021. Botswana economy grew by 5.9 percent in the fourth quarter 2022 compared to 6.0 percent in the similar period in 2021.
