1.0 Introduction

Quarterly Gross Domestic Product Reports provide not only detailed but also reliable and timely information on selected economic indicators that facilitate frequent and appropriate policy intervention on recent short-term economic developments in a country.

1.1. Global Economy

The annual global economy projection as of June 2021 remained unchanged at 6.0 percent compared to a negative growth of 3.3 in 2020. However, projections for advanced economies have been revised upwards by 0.5 percentage points while for emerging markets and developing economies have been revised downwards by 0.4 percentage points consistent to access to corona virus vaccines and changes in fiscal support to accommodate sustainable and inclusive recovery. Central Banks should continue to monitor closely price movement to avoid implementing tight monetary policies until there is clear underlying price dynamics. Slower-than-expected vaccine rollout would probably allow the COVID-19 virus to mutate and worsen further external financial conditions and slow-down global growth below baseline projection. Concerted efforts from multilateral actions coupled with national level policies not limited to deploy vaccines equitably are required to diminish divergence and strengthen global projected growth.

1.2. Sub-Saharan Africa

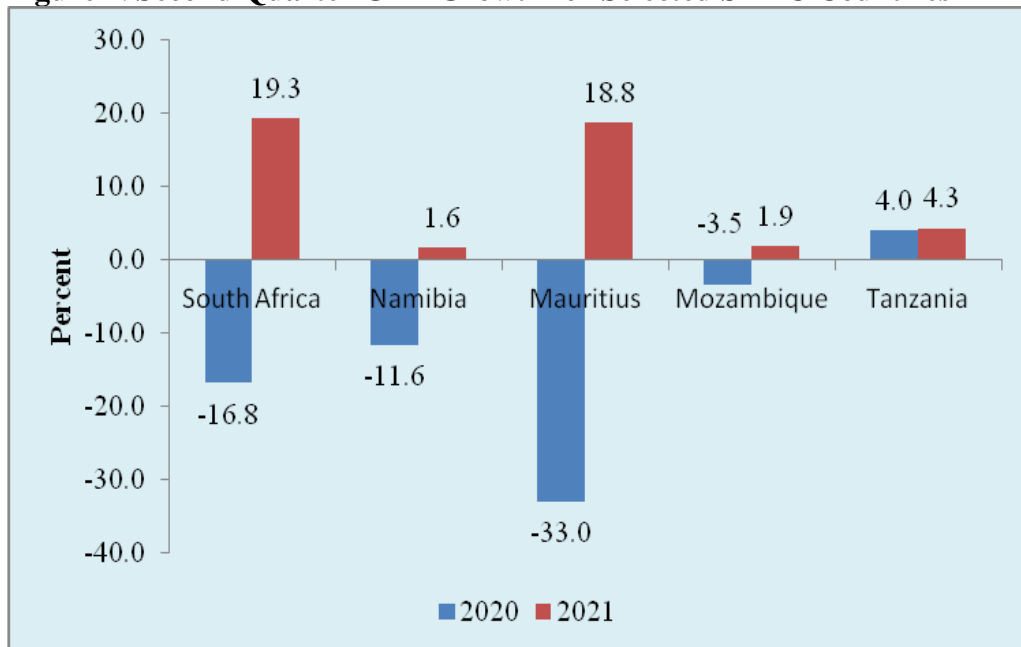

Sub-Saharan Africa economy prospects during the period under review grew at 3.4 percent in 2021 the same rate as projected in April 2021. South Africa economy's growth is now projected at 4.0 percent in 2021 after a mark up by 0.9 percent points relative to April 2021 forecast. However, growth prospects for other countries have remained low due to limited access to corona virus vaccines and limited fiscal space to address crises response and recovery. Countries in the region need to consolidate their respective fiscal positions to avert debt to a sustainable position. Such interventions will un-lock longer-term growth prospects and provide opportunities for new employment creation.

1.3. Southern Africa Development Community

Southern Africa Development Community (SADC) region experienced an economic contraction of 7.0 Percent in 2020 due to the pandemic disruptions. Projections for

the region in 2021 are stronger than before with estimated growth of 3.2 percent. The sub-regional economic block is tourism-dependent which experienced the sharpest decline in growth of negative 11.5 in 2020. Assuming the pandemic is subdued in 2021 with resumption of international travel and tourism, the growth will bounce back at 6.8 percent in 2021. During the second quarter in 2021, performance of selected economies bounced back to positive growth whereas South Africa posted a growth of 19.3 percent from negative 16.8, Namibia 1.6 percent from negative 11.6 percent, Mauritius 18.8 percent from negative 33.0 percent, Mozambique 1.9 percent from negative 3.5 percent and Tanzania improved further to 4.3 percent from 4.0 percent.

1.4. East Africa Community

The projected real GDP growth in 2021 is at 3.0 percent. The expected top performers with corresponding growth rates in 2021 are Kenya (5.0 percent), Tanzania (5.0 percent), and Rwanda (3.9 percent).
