Basic Concepts and Definitions	xxxii
Foreword	xxxiv
Acknowledgement	xxxvii
Executive Summary	xxxviii
.....	1
CHAPTER ONE	1
BACKGROUND INFORMATION	1
1.0 Introduction.....	1
1.1 Rationale.....	2
1.2 Objectives of Building Census.....	3
.....	4
CHAPTER TWO	4
BUILDINGS STOCK	4
2.0 Introduction.....	4
2.1 Number of Buildings.....	4
Map 2.1: Number of Buildings by Region; Tanzania, 2022 TBC	5
2.2 Buildings with Physical Addresses.....	5
2.3 Type of Buildings.....	7
2.4 Number of Storeys in a Buildings.....	9
2.5 Main Use of Building.....	13
2.6 Number of Units in Buildings.....	18
.....	31
CHAPTER THREE	31
BUILDING INFORMATION	31
3.0 Introduction.....	31
3.1 Building Categories.....	31
3.2 Building Construction Status.....	32
3.3 Building Occupancy Status.....	33
3.3.1 Reasons for Vacant Buildings.....	34
3.4 Building Construction Materials.....	35
3.4.1 Floor Materials.....	35
3.4.2 Wall Materials.....	36
3.4.3 Roofing Materials.....	37
3.6 Building Condition.....	39
CHAPTER FOUR	50
4.0 Introduction.....	50
4.1. Electricity Services.....	50

4.1.1. Electricity from the National Grid	50
4.2 Water Service.....	54
4.3 Toilet Services.....	57
4.4 Accessibility of the Building	60
4.4.1 Building Accessibility by Road.....	60
4.4.2 Infrastructure for Persons with Disabilities	62
CHAPTER FIVE	70
OWNERSHIP AND TENURE STATUS OF BUILDINGS	70
5.0 Introduction.....	70
5.1 Building Ownership Status.....	70
5.2 Building Ownership by Sex.....	72
5.3 Occupancy Tenure Status	74
5.4 Land Survey Status.....	76
5.5 Building Land Ownership Documents.....	77
.....	89
CHAPTER SIX	89
KEY FINDINGS AND POLICY IMPLICATIONS	89
6.0 Background Information	89
6.1 Building Stock	90
6.2 Buildings Information	91
6.3 Building Services:.....	93
6.4 Ownership and Tenure Status of Buildings.....	95
6.5 General Policy Implications	97
Annexes	99
Region 01.0: Dodoma.....	113
01.1: Kondoa District Council	113
01.2: Kondoa Town Council	114

Basic Concepts and Definitions

Building	means any structure or erection and any part of a structure or erection of any kind whatsoever whether permanent, or temporary, and whether completed or uncompleted.
Building Parastatals	are government institutions whose functions are to provide and or facilitate the provision of housing and other buildings in Tanzania.
Building Stock	refers to total number of buildings in a particular area.
Certificate of Customary Right of Occupancy	means the certificate of right of occupancy issued to land owner under customary tenure as stipulated under Section 27 of the Land Act No.5 of 1999.
Certificate of Right of Occupancy	refers to legal land certificate of occupation granted under the Land Act No. 4 of 1999 in Tanzania and Land Tenure Act No. 12 of 1992 of Tanzania Zanzibar
Detached house	A building that stand-alone from the foundation to roof level. Does not share walls with other houses. The building could be single or multi-storey.
Non-residential Use	means a building or structure of any kind whatsoever used, designed or intended to be used for other than a residential use.
Partly Completed building	building where one part of a building is completed and can be occupied and other part is still under construction.
Physical Address	means the mailing address, including a zip code which details the actual location (building number and street name) of person, business or physical property.
Regularised Settlement	is the legalised tenure status in the informal or unplanned settlements through a deliberate process aimed at bringing the informal and unauthorised settlements within the official legal (formal) and administrative systems of land to guarantee secure tenure for the concerned population.
Residential Building	means a structure used or constructed or adopted to be used primarily for human habitation; such buildings may

be available as apartments, quarters and similar facilities or accommodation.

Residential License	confers upon the licensee the right to occupy land in non-hazardous land, land reserved for public utilities and surveyed land, urban or peri-urban area for the period of time for which it has been granted as provided in Section 23 of the Land Act No.4 of 1999.
Single Storey	A building consisting of ground floor only.
Surveyed Settlement	this refers to human settlements that cadastral surveying has been undertaken to each land parcel to determine its location, the extent of its boundaries and surface area, and to indicate its separate identity, both graphically on a map or in a record as well as physically on the ground.
Tenure	is defined as institutions and rules which regulate property rights and resource use, and determine who can use what resource, under what conditions and for how long.
Terrace/Row of Houses	A terraced house is a row of more than two houses similar houses under one roof joined together by their side walls. The house could be single or multi-storey.
Unit	is a house or part of the house with all necessary amenities for living. A building can have more than one unit

Foreword

The Government of the United Republic of Tanzania conducted the 2022 Buildings Census (2022 TBC), its first comprehensive building census in the country. It is also the first building census to be conducted successfully in

the East African Region. The Sixth Phase Government of the United Republic of Tanzania under the leadership of Her Excellency Dr. Samia Suluhu Hassan, and the Eighth Phase Revolutionary Government of Zanzibar under the leadership of His Excellency Dr. Hussein Ali Mwinyi have fulfilled their obligation of conducting the 2022 TBC a move that apart from addressing the long time challenges of lack of information on buildings, have met the requirements of the National Housing Development Policy of 2000 as well as various national, regional and international programmes related to Human Settlements Development. We thus owe them much appreciation for their commitment and unwavering support during the process of 2022 TBC implementation. Given the prevailing inseparable relationship between buildings and population, conducting the first 2022 Building Census conforms with the Statistics Act Cap 351, which mandates the Government of the United Republic of Tanzania to conduct Population and Housing Census after every ten years. Thus, Building Census; and, Population and Housing Census complement each other. The Government decision to use modern technology throughout the implementation of both censuses, made the 2022 TPHC and 2022 TBC the first ever digital censuses to be conducted in Tanzania.

Generally, the 2022 TBC results are useful for sustainable socio-economic development expected to bring significant impacts on residential, commercial, industrial and institutional main categories of building uses. The buildings census data with its regular update will assist in increasing awareness and transparency in allocating resources needed for buildings development at all levels of administration based on the actual requirements.

Focusing on the facet of human settlements development in rural and urban areas, the 2022 TBC results will be used by the Government and other relevant stakeholders in monitoring and evaluation of various National, Regional and International development frameworks, including the Tanzania Development Vision 2025; the

Zanzibar Development Vision 2050; the Third National Five-Year Development Plan 2021/22 - 2025/26; the Zanzibar Development Plan 2021/22 - 2025/26; the East African Community Vision 2050; and, the African Development Agenda 2063. The 2022 TBC data will provide a reliable source of building data that will enable the Government to evaluate the progress of implementation of Sustainable Development Goal No. 11 of 2016 which aspires to make cities and human settlements inclusive, safe, resilient and sustainable.

The main purpose of this report is to provide detailed buildings information on buildings stock, building characteristics, availability of essential services in the building and tenure status. However, for the purpose of this report the information is provided at national and regional administrative levels.

The successful implementation of the 2022 TBC was due to collaborative efforts assistance from the Government through Census Committees from national to the lowest administrative levels. These include the National Central Census Committee, National Census Advisory Committee, National Census Technical Committee, Census Committees at Regional, District, Wards/Shehia, Village/Mtaa and Hamlet; and, Forums from Non-States Actors including Collaborators Forum, Private Sector, various institutions and the public at large.

Special gratitude is extended to the following Development Partners:- United Nations Population Fund (UNFPA); World Bank (WB); United Nations Children's Fund (UNICEF); UN-Women; International Organisation for Migration (IOM); United States Agency for International Development (USAID); Foreign, Commonwealth and Development Office (FCDO); United States Census Bureau (USCB), The Republic of South Korea, The People's Republic of China and other Development Partners for providing equipment, expertise, training and financial support in making the 2022 Population and Housing Census as well as the Building Census a success. We also thank religious, traditional and political leaders, non-governmental organisation leaders, the media and all citizens and non-citizen in general for their participation and contributions in the successful implementation of the Censuses.

Special thanks should go to the Honourable Anne Semamba Makinda - Census Commissar for Tanzania Mainland and Former Speaker of the National Assembly; and Honourable Ambassador Mohamed Haji Hamza - Census Commissar for Tanzania Zanzibar, for their effective leadership and management in educating and sensitising all citizens and non-citizens to participate in these Censuses, thus resulting in

enhanced quality, smoothness and timely execution of the exercise. We also thank the Chairperson of the Governing Board of the National Bureau of Statistics (NBS), Dr. Amina Msengwa and the Chairperson of the Statistics Board of Zanzibar, Ambassador Amina Salum Ali, for their guidance throughout the implementation of the Census exercise.

Last but not least, we would wish to acknowledge the unprecedented efforts and commitment of the management and staff of the National Bureau of Statistics under the leadership of Dr. Albina Chuwa, the Statistician General; and staff of the Office of the Chief Government Statistician, Zanzibar under the leadership of Mr. Salum Kassim Ali; Chief Government Statistician; staff from the Ministry of Lands, Housing and Human Settlements Development; Ministry of Information, Communications and Information Technology; as well as other Government officials who worked tirelessly in ensuring that the 2022 these censuses were implemented successfully.

Kassim Majaliwa Majaliwa (MP)
Prime Minister of
The United Republic of Tanzania

Hemed Suleiman Abdulla (MRC)
Second Vice President of Zanzibar

Acknowledgement

The National Bureau of Statistics and Office of the Chief Government Statistician, Zanzibar conducted the 2022 Tanzania Building Census (TBC) in order to provide necessary information for policy review and formulation, project planning, monitoring and evaluation of human settlements development process in the country. The 2022 TBC collected detailed information on buildings including buildings stock, building characteristics, availability of essential services in the building and tenure status.

With these achievements, we specifically like to extend our thanks to all staffs of the Ministry of Lands, Housing and Human Settlements Development, Ministry of Lands and Housing Development of Zanzibar, Ministry of Information, Communications and Information Technology together with experts of the National Bureau of Statistics (NBS) and the Office of the Chief Government Statistician, Zanzibar (OCGS), who worked tirelessly in ensuring that the 2022 TBC was successfully implemented.

Our appreciations are also extended to all professionals, Regional and District supervisors, enumerators and field supervisors as well as the media for their dedicated work. Certainly, without their commitment and dedication, the Census would not have been successful. We would also like to thank the public for their cooperation during the entire period of the Census.

We also appreciate the contributions made by development partners as well as public and private institutions, various groups including religious leaders, customary and traditional leaders, politicians, NGOs, Tanzania Federation Organization of Persons with Disabilities and all other influential persons who contributed to the success of the 2022 TBC. The results of this achievement have enabled the publication of this TBC Report that will provide reliable data for sustainable socio-economic human settlements development in the country.

Dkt. Albina Chuwa
Statistician General
National Bureau of Statistics

Salum Kassim Ali
Chief Government Statistician
Office of the Chief Government Statistician,
Zanzibar

Executive Summary

The 2022 Tanzania Building Census was undertaken to address the long-time challenges of lack of information on buildings in the country. The 2022 TBC was conducted to meet requirements of various national, regional and international policies pertaining to human settlements development. The collected information includes number, type and use of all buildings in the country, quality of buildings, ownership by sex, buildings characteristics and status of land survey where the buildings are constructed. The report provides data at national, regional and urban/rural levels.

Chapter one presents a brief background information, rationale and objectives for undertaking 2022 Tanzania Building Census (2022 TBC). The Government conducted for the first time the 2022 TBC, an exercise done concurrently with the 2022 Population and Housing Census. The 2022 TBC adhered to the provision of Section 4.1.8.2 (ii) of the National Human Settlements Development Policy 2000 as well as Section 5.4.11 of the National Land Policy of Zanzibar 2018 and Section 2.5 of the National Housing Policy 2008 of Zanzibar. The main objective of the 2022 TBC is to equip the nation with adequate and reliable buildings data to enhance evidence-based decision making in all administrative levels for sustainable development of human settlements.

Chapter two presents information about the number of buildings, type of buildings, main uses of buildings and the number of units in residential and commercial-residential buildings at the national and regional levels. The results show that the total number of buildings in Tanzania is 14,348,372 of which 13,907,951 are in Tanzania Mainland and 440,421 buildings are in Tanzania Zanzibar. In addition, most buildings (94.4 percent) in Tanzania are single storey. Nine out of ten buildings are residential and 3.4 percent are commercial-residential. On the other hand, 98.2 percent of all residential and commercial-residential buildings are single units.

Chapter three presents buildings information on building categories, occupancy status, building ownership, construction status, building materials used for construction, number of bedrooms, building tenure status and buildings condition. The result shows that 94.3 percent of all building in Tanzania are detached (stand -alone), with 71.7 percent having been completed. More than four out of ten of all buildings have cement or ceramic floor while 77.7 percent are roofed with corrugated iron

sheets. Further, 58.7 percent of all residential and commercial-residential buildings have one or two Bedrooms. In addition, 12.8 percent of all buildings in Tanzania needs major repair.

Chapter four presents information on basic services in buildings collected during the Tanzania Building Census of 2022. The services are categorized into two main parts: services within the building (electricity, water, and toilets) and accessibility of buildings (by roads) and infrastructure for people with disabilities. Results show that 22.8 percent of all buildings in Tanzania get electricity from the national grid whereas 27.5 percent use alternative sources of electricity. Buildings with water services account for 24.3 percent whereas 75.5 percent have toilet services. On the other hand, 72.6 percent of all buildings are accessible by road while only 3.9 percent have infrastructure for Persons with Disabilities. About 18.5% of Central Government buildings have infrastructure for disability while Services Provision Institutions (Schools, Colleges, Hospitals, Health centres, Bus terminals, Airport etc) have 25.4 percent.

Chapter five present information on ownership and tenure status of, land surveying and the presence of legal documents for land ownership where the buildings are built. Results shows that 87.0 percent of all buildings in Tanzania are individually owned. Of all individually owned buildings, males own about three times (71.5%) as much as females (23.4%) while 5.1 percent are jointly owned. About two thirds (67.1%) of all buildings in Tanzania are built on un-surveyed land whereas 33.3 percent do not have land ownership documents.

Chapter six presents key findings, policy implication and policy action.

Table 1: Building Census Results in Brief- Tanzania

CHAPTER ONE

BACKGROUND INFORMATION

1.0 Introduction

Buildings are amongst the most important infrastructure in the lives of people in Tanzania and around the world. Buildings help to preserve and promote the lives of individuals, families and society at large in the economic, social, political and cultural spheres. Moreover, buildings as part of premises are an important criterion for measuring the state of a non-income economy for an individual or community concerned. The main uses of buildings in the lives of rural and urban people include residential, commercial, commercial-residential, institutional and industrial.

Despite the immense importance of buildings in the life of the community in developing individual economy and the nation as a whole, Tanzania has never had actual census data for all buildings in the country. Statistics on buildings that have been used for planning and decision-making at various administrative levels have been available on estimated number covering few types of buildings especially residential, educational and health institutions. These shortcomings have long left Tanzania lacking a national database of buildings, a resource that would assist in developing various policies, programmes and projects for bringing about or improving socio-economic development at various administrative levels in the country.

For the purpose of overcoming lack of national building data, the Government of the United Republic of Tanzania conducted for the first time the 2022 Tanzania Buildings Census (2022 TBC), an exercise done concurrently with the 2022 Population and Housing Census. Apart from addressing long time challenges of lack of information on buildings in the country, the 2022 TBC has been conducted to meet the requirements of various national, regional and international policies pertaining to human settlements development. This huge national undertaking has been made practical due to a clear understanding that, building census is the primary means of accessing complete, accurate, adequate, timely and reliable building information.

The 2022 Tanzania Buildings Census Report consists of six chapters which provide answers to all key topics covered in the Buildings Census Questionnaire conducted in August 2022. These topics include number, type and use of all buildings in the country, quality of buildings, ownership by sex, buildings characteristics and status of land survey where the buildings are constructed. The report provides data at national, regional and urban/rural levels.

Given the importance of the 2022 TBC results, the official use of census data in both public and private offices, should be strengthened and managed appropriately so that the nation can achieve the intended objectives of bringing about the sustainable socio-economic development of the human settlements sector.

1.1 Rationale

The 2022 Tanzania Building Census adhered to the provision of Section 4.1.8.2 (ii) of the National Human Settlements Development Policy 2000. The Policy guides the Government to equip itself with settlements and housing data that will assist in decision making for sectoral improvements such as fulfilling housing requirements and controlling urban growth through Ministry of Lands, Housing and Human Settlements Development. The 2022 TBC also conforms with Section 5.4.11 of the National Land Policy of Zanzibar 2018 that requires institutions responsible for national statistics to collect statistics on land and related activities; and, to share relevant data and information with all relevant stakeholders that will assist in land use planning and management process. It also conforms with Section 2.5 of the National Housing Policy 2008 Zanzibar which aspires on availability of sustainable housing to all categories of the society.

Moreover, the 2022 TBC provides a reliable source of buildings data that enables the Government to evaluate the progress of implementation of Sustainable Development Goal (SDG) No. 11 of 2016, which aspires to make cities and human settlements inclusive, safe, resilient and sustainable. Building census data are also useful in implementing the Declaration No. 5 of the 2016 International New Urban Agenda, which emphasises on appropriation in planning, designing, financing, developing, governing and managing human settlements especially towns and large cities.

1.2 Objectives of Building Census

The main objective of the 2022 TBC is to equip the nation with adequate and reliable buildings data to enhance evidence-based decision making in all administrative levels for sustainable development of human settlements.

The specific objectives are to enable the Government to:

- (i) Obtain statistics that will help to establish the database of all buildings in the country;
- (ii) Review and improve various policies, laws, regulations, and programs that govern the housing development and settlements sector in the country;
- (iii) Obtain information on the use of various buildings in the country such as number of buildings that are used for housing, business, and various community services including schools, health centres, hospitals and police stations;
- (iv) Assess Government contribution to the availability of housing in the country as directed by the Human Settlement Development Policy, 2000 and Zanzibar National Housing Policy 2008.
- (v) Evaluate the ratio of houses built in planned and unplanned areas; and ratio of access to community services in those buildings; and
- (vi) Identify the state of urban development in existing buildings stock such as multi storey buildings, single-storey buildings and buildings characteristics.

CHAPTER TWO

BUILDINGS STOCK

Key Points

- More than nine out of ten (94.4%) buildings in Tanzania are single storey.
- Ninety one percent of all buildings in Tanzania are used for residential purposes.
- More than Ninety eight percent of all residential and commercial-residential buildings in Tanzania are of single unit.

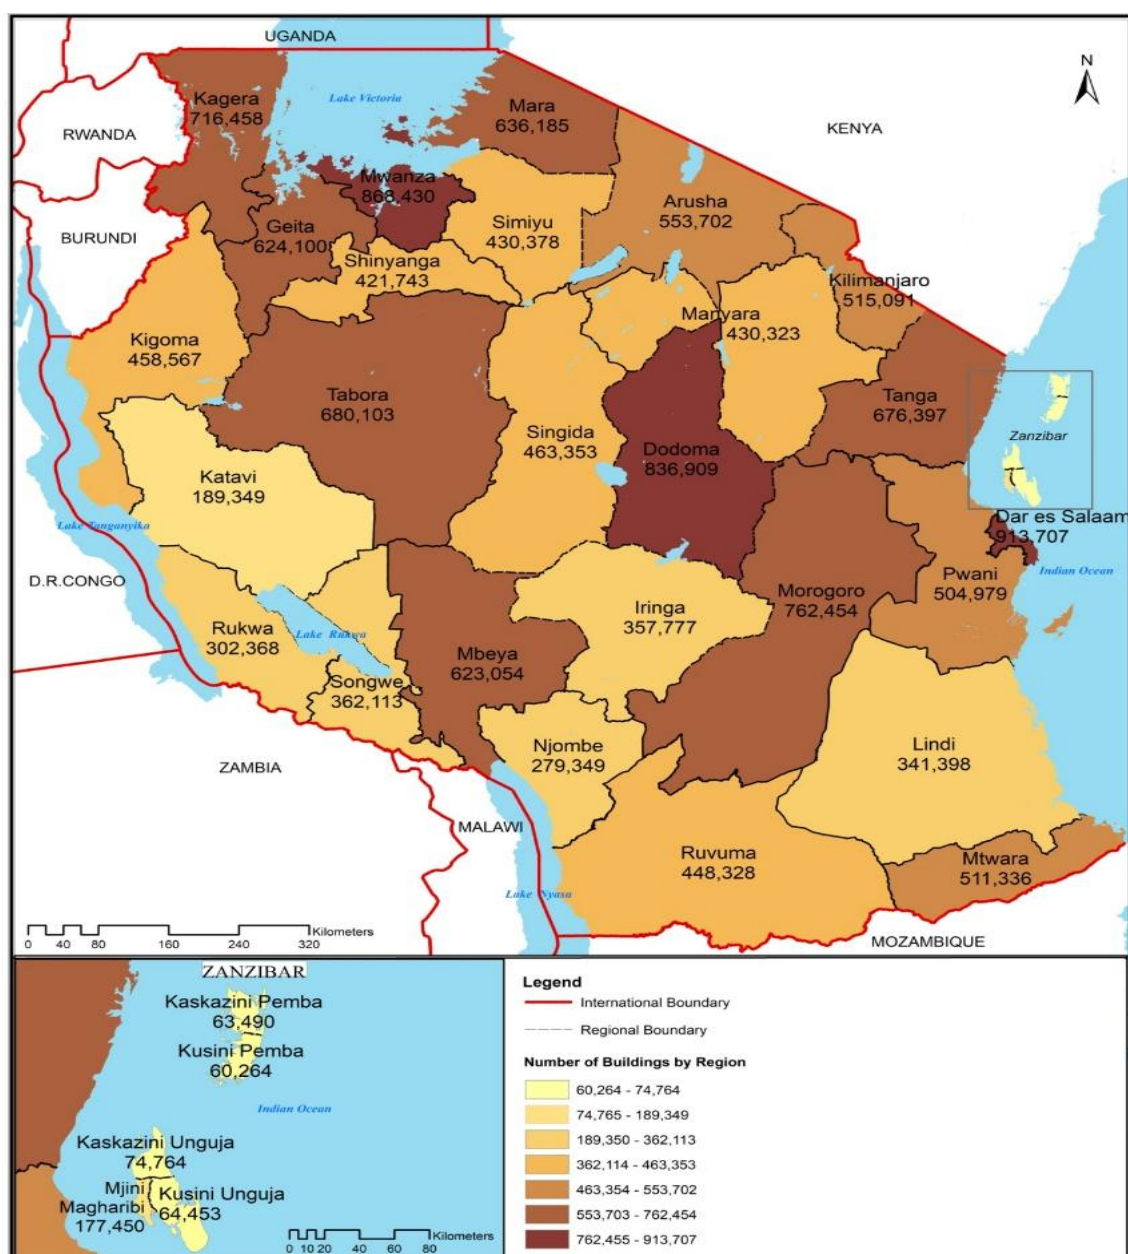

2.0 Introduction

This chapter presents findings of the 2022 TBC on buildings stock which include number of buildings, types of buildings, main use of buildings and number of housing units in residential and commercial - residential buildings at national and regional levels.

2.1 Number of Buildings

The results show that, the total number of buildings in Tanzania is 14,348,372 whereas 13,907,951 buildings are in Tanzania Mainland and 440,421 are in Tanzania Zanzibar. Rural areas have more buildings (10,038,201) compared with urban areas (4,310,171). Across regions in Tanzania Mainland, Dar es Salaam has more buildings (913,707) followed by Mwanza (868,430) and Dodoma (836,909). In Tanzania Zanzibar, Mjini Magharibi Region has more buildings (177,450) followed by Kaskazini Unguja (74,764) (Map 2.1 and Table 2.1).

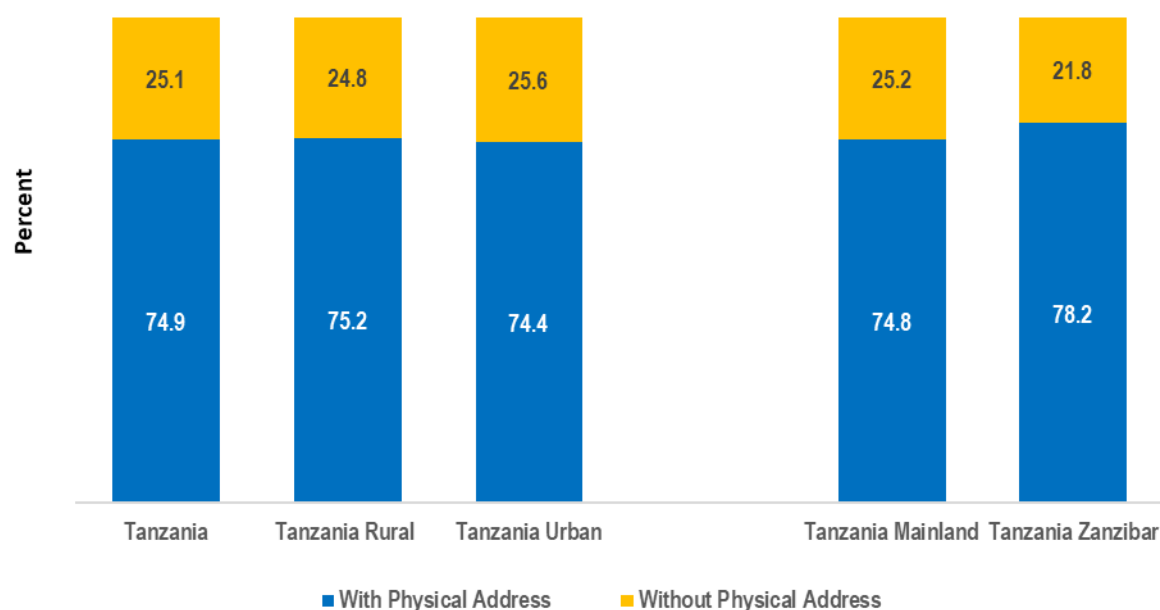

Map 2.1: Number of Buildings by Region; Tanzania, 2022 TBC

2.2 Buildings with Physical Addresses

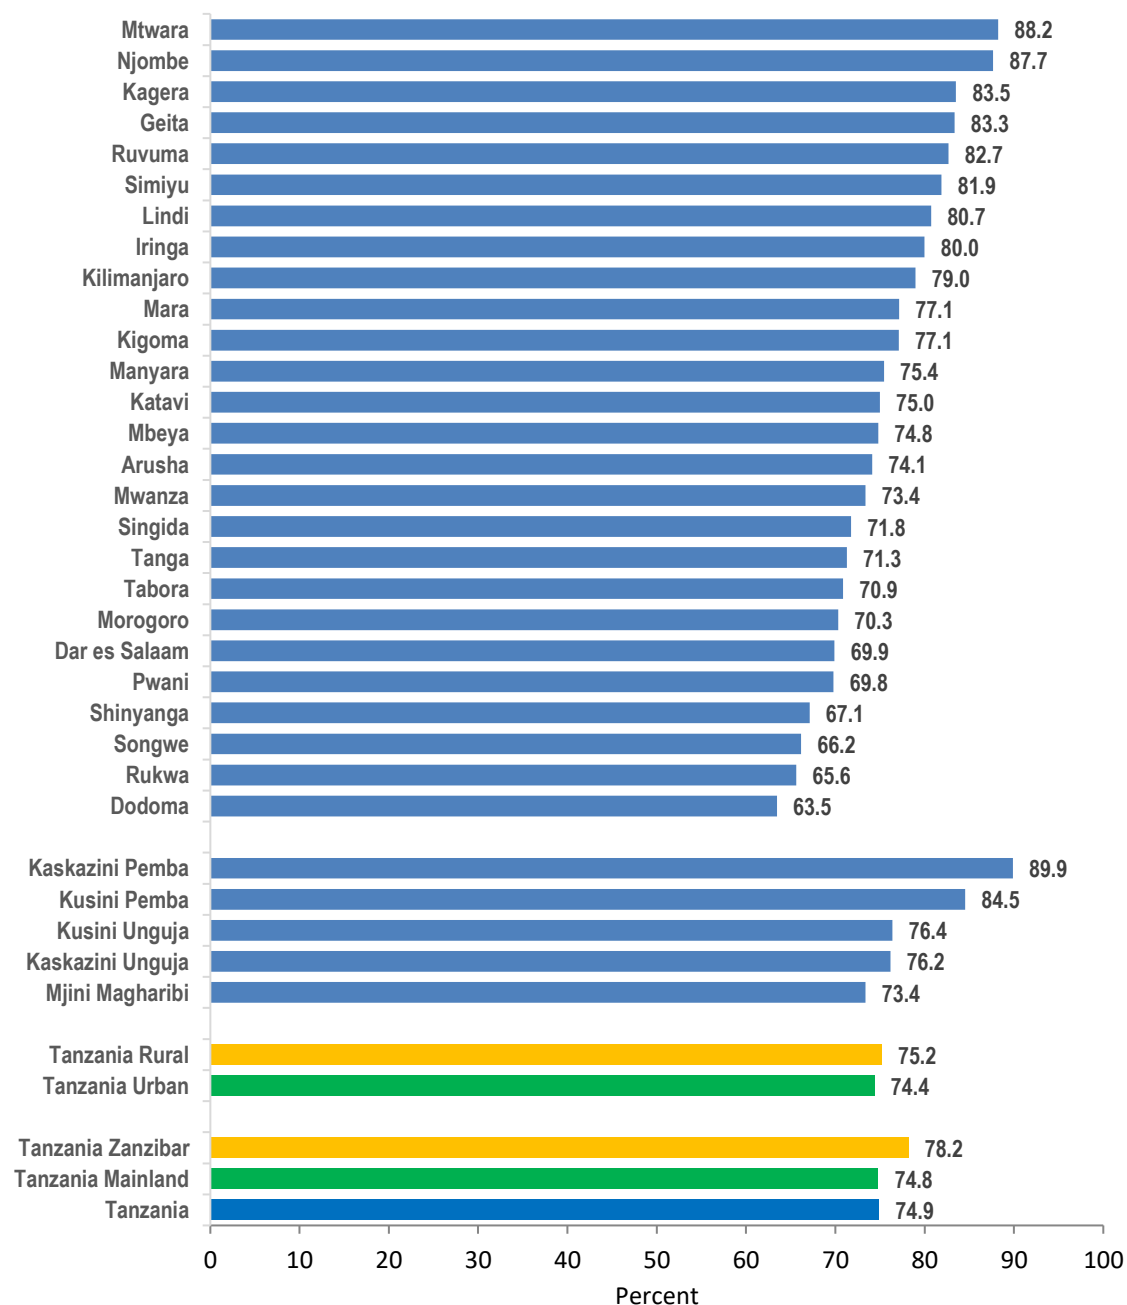

The results show that about three quarters (74.9%) of buildings in Tanzania have physical addresses. Similar results are observed in Tanzania Mainland. In Tanzania Zanzibar about 8 out of 10 (78.2%) buildings have physical addresses. Three quarters (75.2%) of buildings in rural areas and 74.4 of those in urban areas have physical addresses (Table 2.2 and Figure 2.1).

Figure 2. 1: Percentage Distribution of Buildings With and Without Physical Addresses; Tanzania, 2022 TBC

In Tanzania Mainland the results show that Mtwara Region has the highest percentage (88.2%) of buildings with physical addresses followed by Njombe (87.7%) and Kagera (83.5 %). Regions with small percentages of physical addresses are Dodoma (63.5%), Rukwa (65.6%) and Songwe (66.2%). For Tanzania Zanzibar, Kaskazini Pemba Region has a high percentage (89.9 %) of all buildings with physical addresses followed by Kusini Pemba (84.5 %). Mjini Magharibi has the lowest percentage (73.4 %) (Figure 2.2 and Table 2.2).

Figure 2. 2: Percentage Distribution of Buildings with Physical Addresses by Region: Tanzania, 2022 TBC

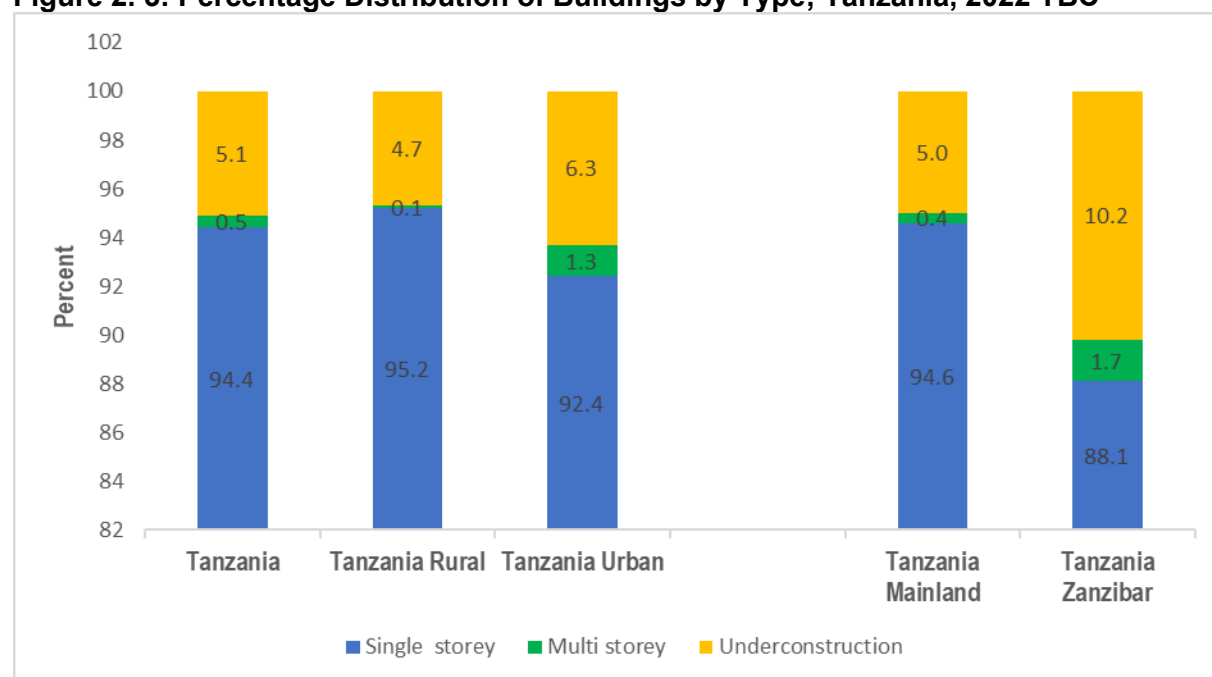

2.3 Type of Buildings

Buildings were categorised into single-storey building (one floor buildings) and multi-storey buildings (more than one floor buildings). The results reveal that, most of the buildings in Tanzania are single storey (94.4%) and few are multi-storey (0.5%). Moreover, 5.1 percent of buildings are under construction. A similar pattern is observed in Tanzania Mainland.

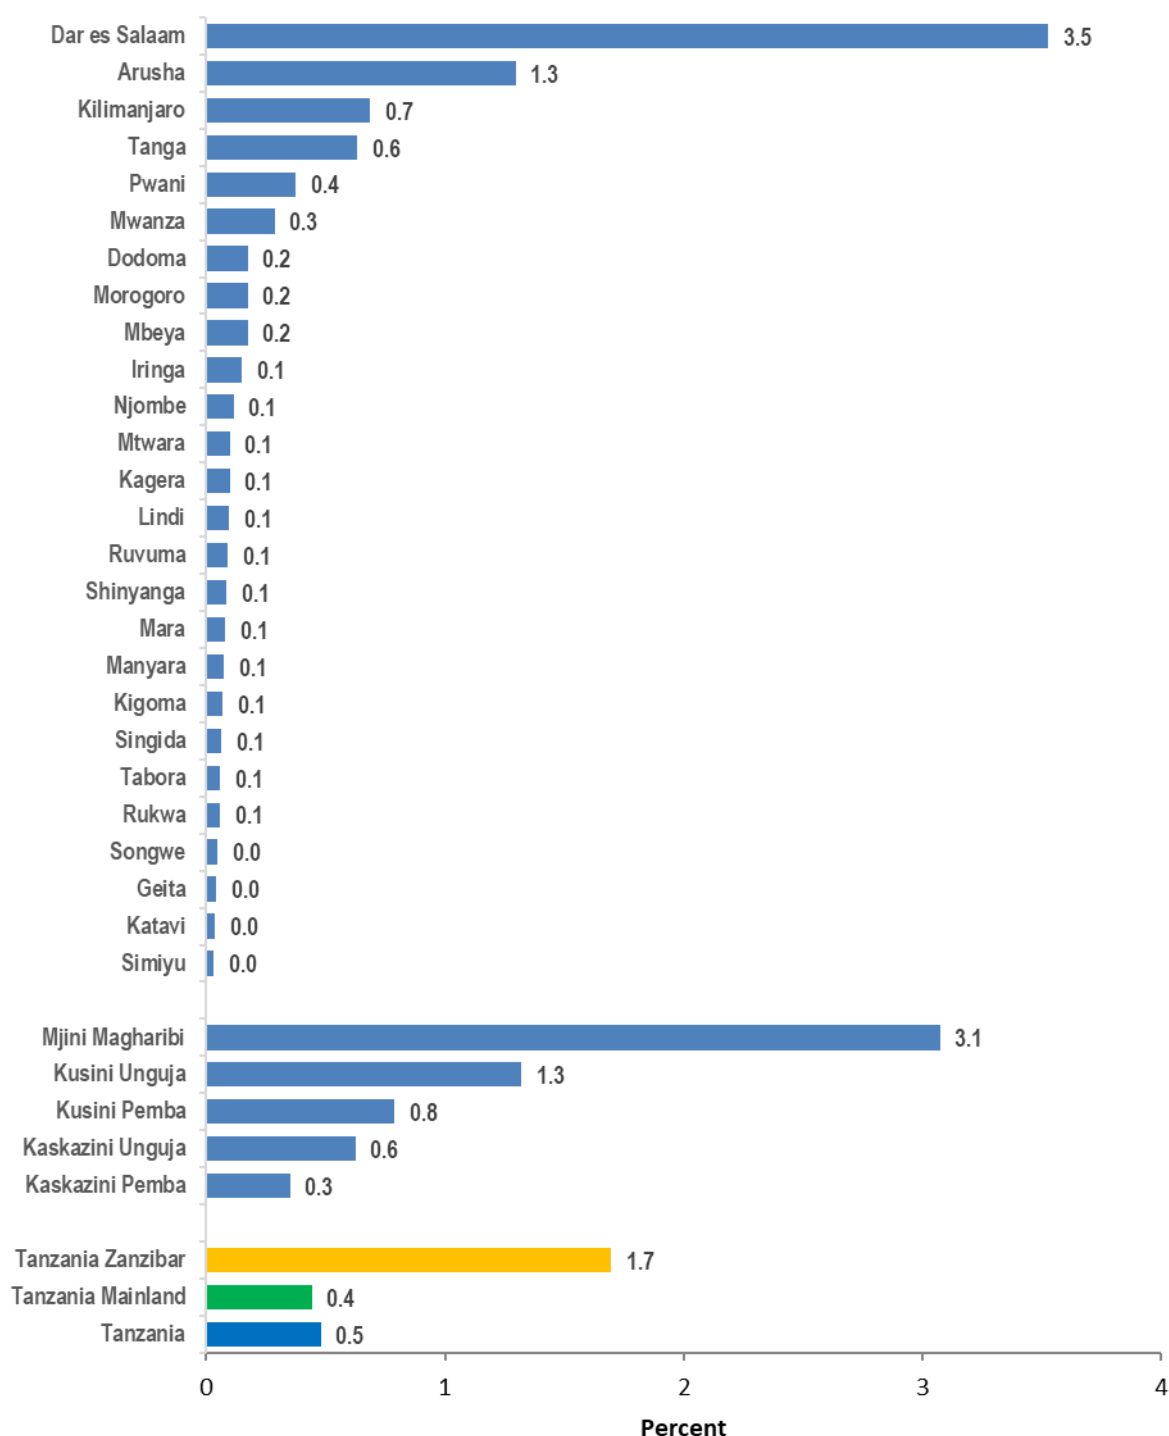

About nine out of ten (88.1%) of all buildings in Tanzania Zanzibar are single-storey while almost two percent (1.7%) are multi-storey buildings; and about ten percent (10.2%) are under construction. In Tanzania, more than ninety percent of all buildings in rural (95.2 %) and urban (92.4 %) are single storey buildings (Figure 2.3 and Table 2.1).

Figure 2. 3: Percentage Distribution of Buildings by Type; Tanzania, 2022 TBC

In Tanzania Mainland, Dar es Salaam has the highest proportion of multi-storey buildings (3.5%) followed by Arusha (1.3%) and Kilimanjaro (0.7%) while 12 regions have less than 0.1 percent of multi-storey buildings. For Tanzania Zanzibar, Mjini Magharibi Region has the highest proportion of multi-storey buildings (3.1%) while Kaskazini Pemba has the lowest proportion (0.3%) (Figure 2.4 and Table 2.1).

Figure 2. 4: Percentage Distribution of Multi Storey Buildings by Region; Tanzania, 2022 TBC

2.4 Number of Storeys in a Multi-storey Building

The number of storeys in a building consists of all storeys that are primarily above the ground floor and in which there are habitable rooms or office space or other space conforming to the intended use of the building. This section presents an analysis of the number of floors in multi-storey buildings, encompassing both ground and additional floors. Results in Table 2.4 indicate that most of multi-storey buildings in

Tanzania are (77.6%) comprise ground plus one storey buildings followed by buildings with ground plus two storey (12.5%). 89.6 percent of multi-storey buildings in rural are ground plus one storey while 75.3 percent in urban area.

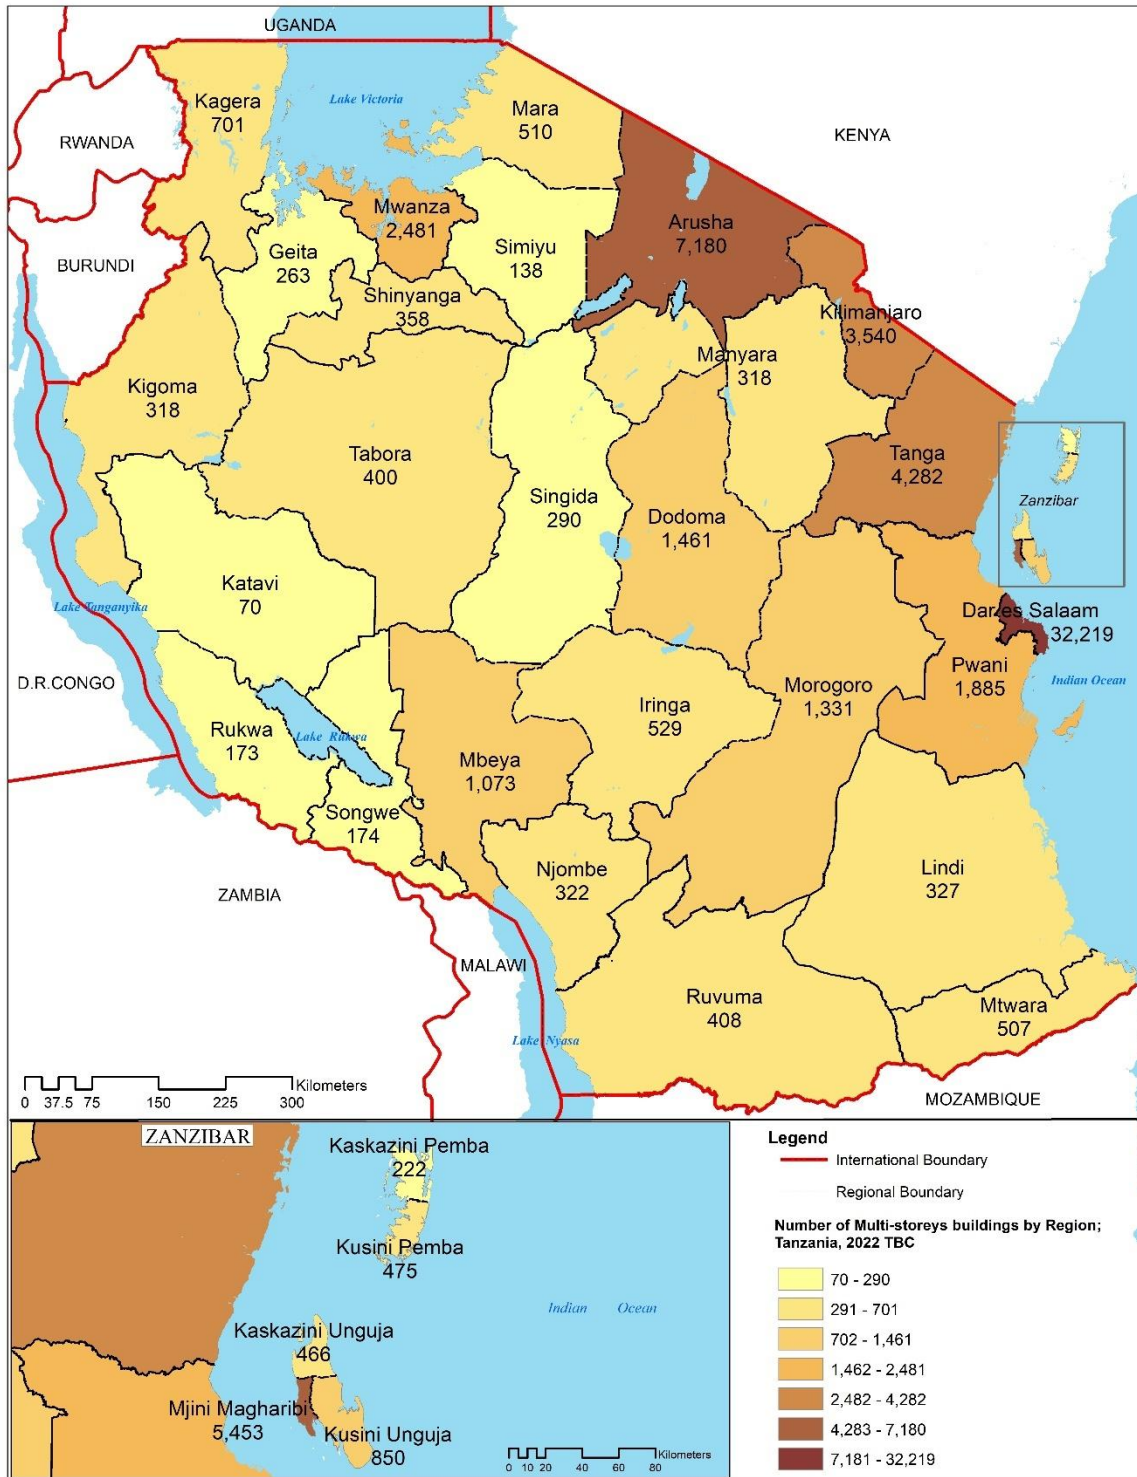

In Tanzania Mainland, Simiyu has the highest proportion (92.0%) of its multi storey buildings with ground plus one storey followed by Katavi (90.0%) and Tanga (89.7%). On the other hand, Dodoma has the lowest multi-storey buildings with one storey (66.5%).

In the case of Tanzania Zanzibar, Kaskazini Pemba most (88.2%) of its multi-storey buildings are ground plus one followed by Kusini Unguja with 88.0 percent. (Map 2.2 and Table 2.1).

Map 2.2: Number of Multi Storeys Buildings by Region 2022

2.5 Main Use of Building

The main use of buildings is divided into three main groups which are residential, commercial-residential and non-residential. Results reveal that most (91.4 %) of the buildings in Tanzania are used for residential purposes while commercial-residential is 3.4%. Other buildings are for non-residential uses (5.2%) which may be commercial, institutional or industrial use. The same pattern is observed in both rural and urban areas.

The main uses of buildings in Tanzania Mainland and Tanzania Zanzibar follow a similar pattern as that of Tanzania .

Across regions, Geita region (93.7%) has the highest number of its buildings being used by Residential followed by Mwanza and Kigoma (93.6). In Tanzania Zanzibar, Kaskazini Unguja (90.9) followed by Kaskazini Pemba (90.6) (Table 2.2 and Map 2.3).

Table 2.2: Percentage Distribution of Buildings by Main Use; Place of Residence and Region, Tanzania 2022 TBC

Forty three percent (330,302 buildings) of non-residential buildings in Tanzania are for commercial use only, 16.5 percent (126,225 buildings) are used for institutions (services provision) and 14.6 percent (111,988 buildings) are for religious activities. A similar situation is observed in Tanzania Mainland. However, in Tanzania Zanzibar, 35.6 percent of all non-residential buildings are for commercial use (8,659 buildings), while 25.5 percent (6,213 buildings) are for religious use and 14. 2 percent (3,452 buildings) are for institutional use (Figure 2.5, Table 2.3 and Table 2.8)

Figure 2. 5: Percentage Distribution of Non – Residential Buildings by Type of Use; Tanzania, 2022 TBC

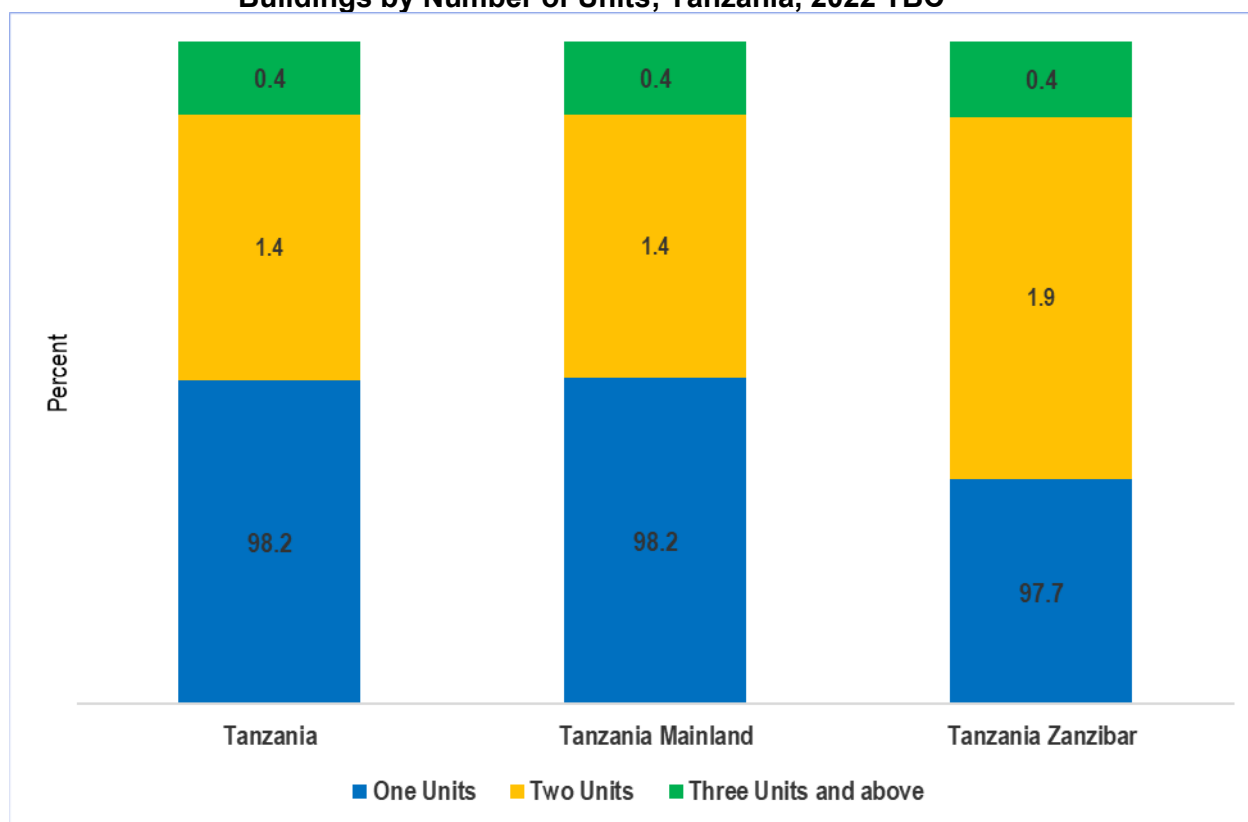

2.6 Number of Units in Buildings

Information on the number of units in the building was collected only in residential and commercial-residential buildings. The results show that most (98.2%) of the buildings in Tanzania are of single unit while only 1.4 percent of all buildings have two units. In addition, Tanzania has the least percentage (0.4%) of buildings that have three units and above. A similar pattern is observed in Tanzania Mainland.

In Tanzania Zanzibar, 97.7 percent are buildings with one unit, 1.9 percent have two units and 0.4 percent have three or more units (Figure 2.6 and Table 2.4).

Figure 2. 6: Percentage Distribution of Residential and Commercial- Residential Buildings by Number of Units; Tanzania, 2022 TBC

The results further show that, more than 94 percent of all residential and commercial-residential buildings in all regions in Tanzania are of one unit. (Figure 2.7 and Table 2.10).

CHAPTER THREE

BUILDING INFORMATION

Key Points

- More than nine out of ten (94.3%) of all buildings in Tanzania are detached (stand-alone) buildings.
- Nearly three-quarters (71.7%) of all buildings in Tanzania are completed buildings.
- More than four out of ten (43.1%) of the buildings in Tanzania have cement or ceramic tiles floor.
- More than three-quarters (77.7%) of buildings in Tanzania are roofed with corrugated iron sheets.
- More than half (58.7%) of all residential and commercial-residential buildings have one or two Bedrooms.
- More than twelve percent (12.8%) of all buildings in Tanzania needs major repair

3.0 Introduction

This chapter presents findings on buildings information which include building categories, occupancy status, building ownership, construction status, building materials used for construction, number of bedrooms, and buildings condition.

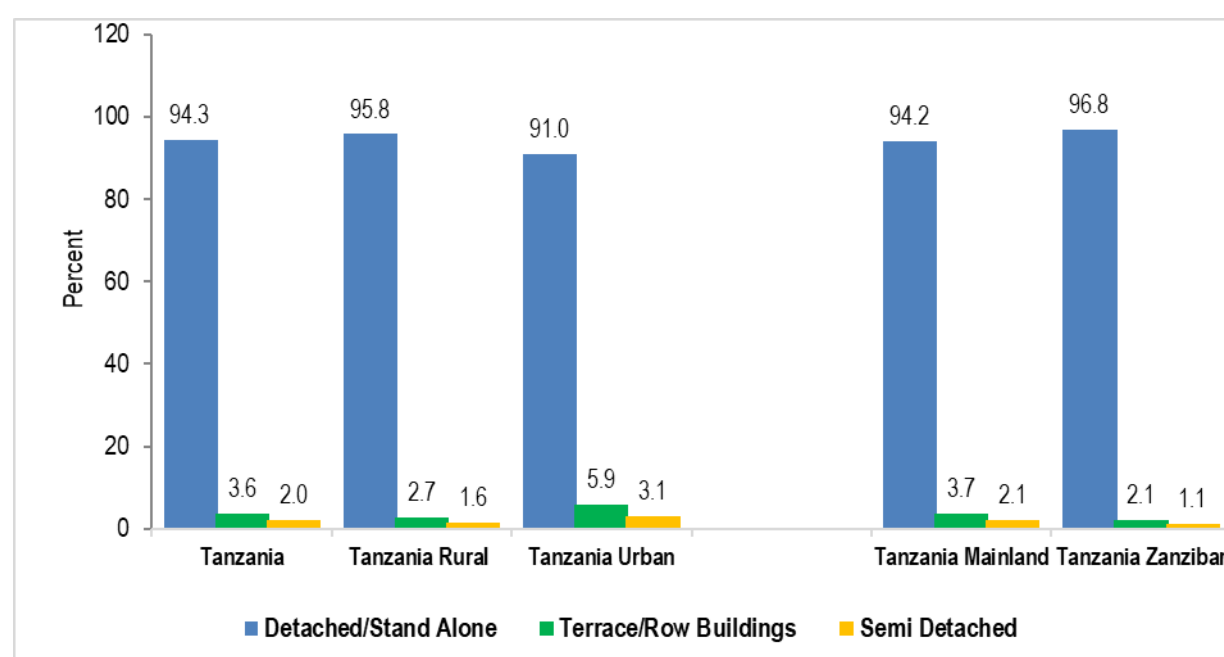

3.1 Building Categories

Building categories include detached (stand-alone), semi-detached and row buildings (terraces). The 2022 TBC results show that most of the buildings (94.3 %) in Tanzania are detached buildings, while a small proportion (3.6%) are terrace buildings and 2.0 percent are semi-detached one. Detached buildings accounts for 94.2 percent of all buildings in Tanzania Mainland compared with 96.8 percent in Tanzania Zanzibar. Other building categories such as row buildings (terraces) accounts for 3.7 percent in Tanzania Mainland and 2.1 percent in Tanzania Zanzibar

Distribution of building categories in Tanzania show that, rural areas have a relatively higher proportion (95.8%) of detached (stand-alone) buildings compared with urban areas (91.0%).

Furthermore, regions with high proportion of detached buildings in Tanzania Mainland are Lindi (97.7%), Mtwara (97.1%) and Tanga (96.8%) while in Tanzania Zanzibar, it is Kaskazini Pemba (98.2%) (Figure 3.1 and Table 3.1).

Figure 3. 1: Percentage Distribution of Buildings by Place of Residence and Category; Tanzania, 2022 TBC

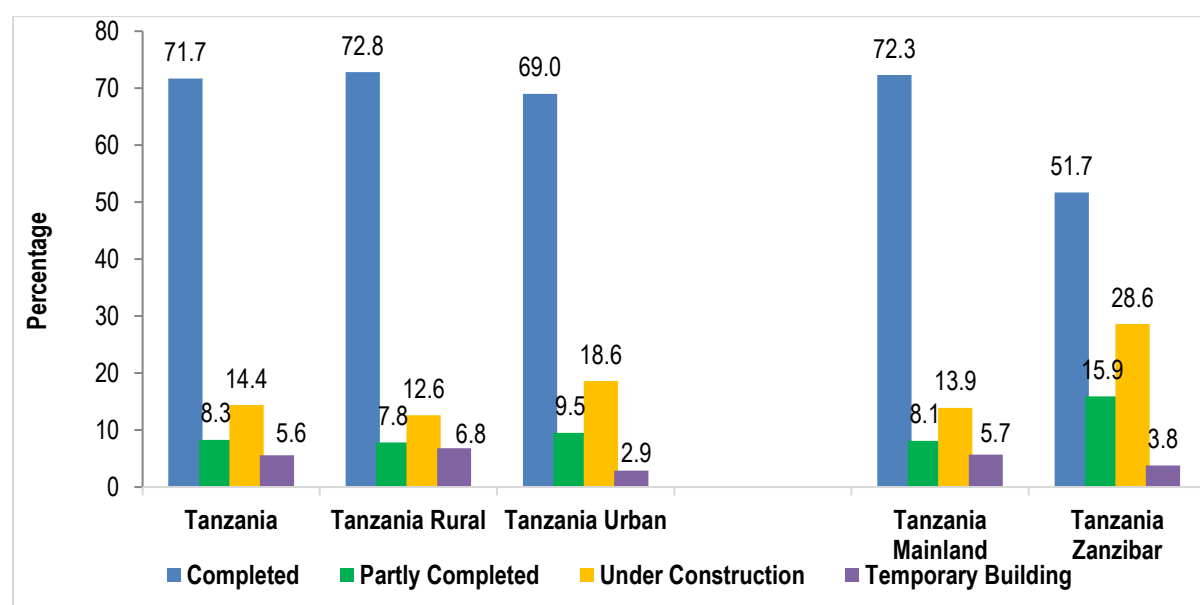

3.2 Building Construction Status

The building construction status is divided into four categories; completed, partly completed, under construction and temporary buildings. The results show that 71.7 percent of buildings in Tanzania have been completed, 14.4 percent are under construction while a small proportion of buildings (5.6%) are temporary. The same pattern is observed in Tanzania Mainland. In Tanzania Zanzibar, 51.7 percent of buildings are completed, with proportionately a higher percentage of buildings (28.6 %) are under construction compared with 13.9 percent in Tanzania Mainland. (Figure 3.2).

The results further show that 72.8 percent of total buildings in rural areas have been completed compared with 69.0 percent in urban areas. Regions with high proportions

of completed buildings in Tanzania Mainland are Simiyu (82.2%), Tabora (81.9%) and Kigoma (81.8%). In Tanzania Zanzibar the region with highest proportion of completed buildings is Kusini Pemba (64.0%) followed by Kaskazini Pemba (59.2%). On the other hand, the regions with high proportions of buildings under construction are Pwani (21.4%) in Tanzania Mainland and Kaskazini Unguja (39.0%) in Tanzania Zanzibar (Table 3.2).

Figure 3. 2: Percentage Distribution of Buildings by Construction Status; Tanzania, 2022 TBC

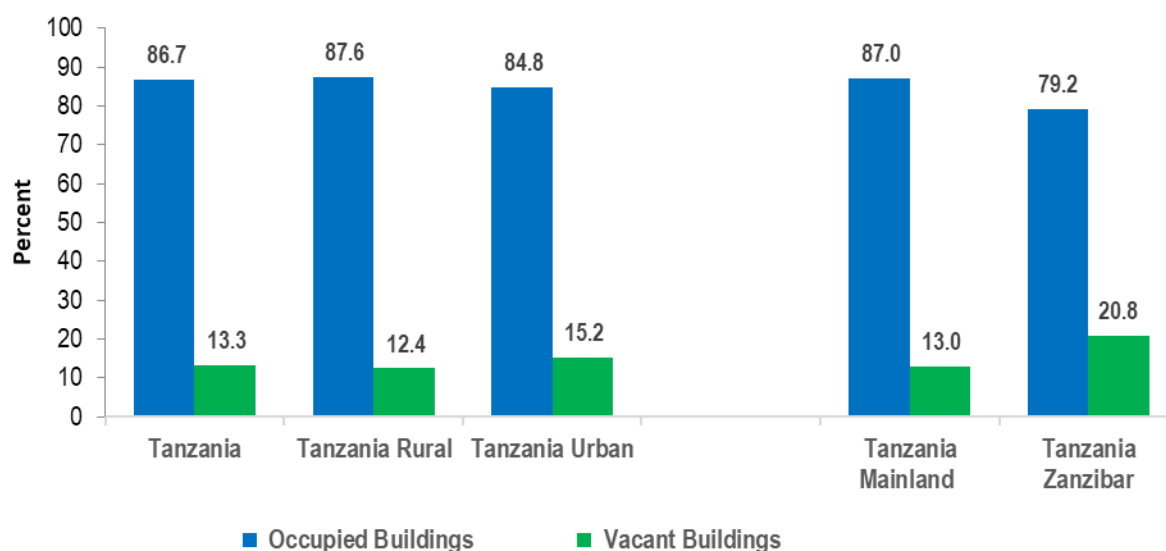

3.3 Building Occupancy Status

The occupancy status of buildings is based on whether the building is occupied or vacant. The results in show that 86.7 percent of all buildings in Tanzania are occupied and 13.3 percent are vacant. A similar pattern is observed in Tanzania Mainland whereas in Tanzania Zanzibar, 79.2 percent of buildings are occupied and 20.8 percent are vacant.

The results further show that a relatively higher proportion (87.6%) of buildings in rural areas are occupied compared with 84.8 percent in urban areas. (Regions with large proportions of occupied buildings in Tanzania Mainland are Simiyu (91.0%) followed by Lindi (90.4%) while in Tanzania Zanzibar they are Kusini Pemba (82.7%) followed

proportions of vacant buildings (19.5%) while in Tanzania Zanzibar Kusini Unguja has the highest proportions of vacant buildings (28.4%) (Figure 3.3 and Table 3.3).

Figure 3. 3: Percentage Distribution of Buildings by Place of Residence and Occupancy Status; Tanzania, 2022 TBC

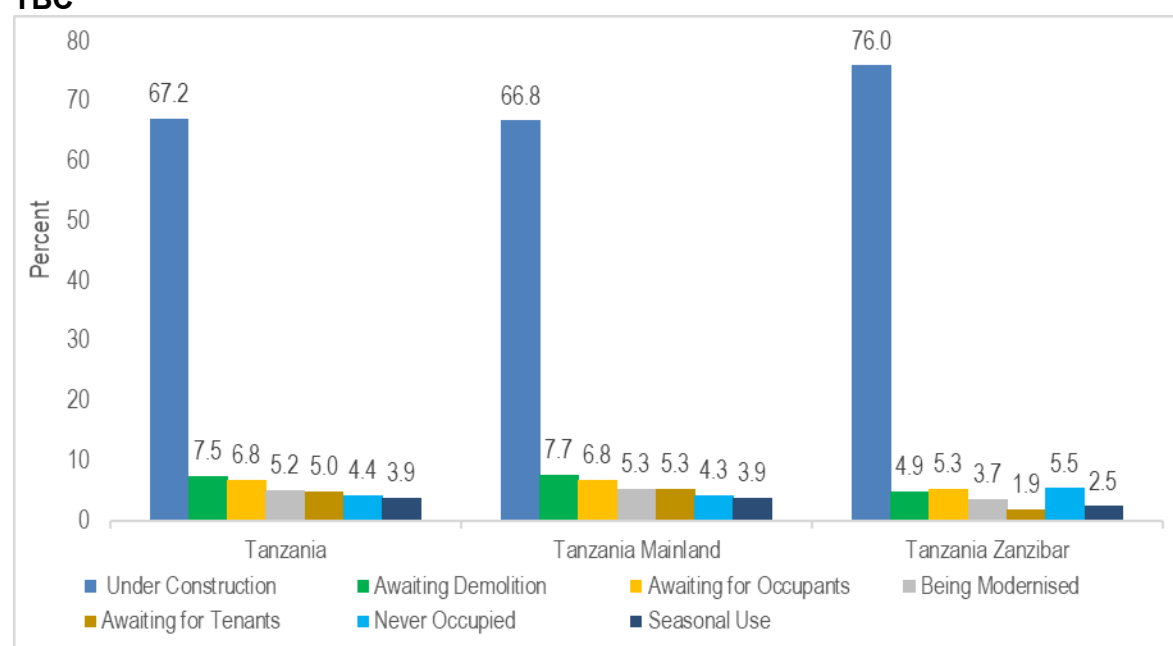

3.3.1 Reasons for Vacant Buildings

Reasons for buildings not being occupied (vacant) include waiting for a tenant or resident, undergoing modernization, being a new building (never occupied), seasonal use, construction in progress and the building awaiting demolition. The results show that 67.2 percent of all vacant buildings in Tanzania are still under construction and 7.5 percent are awaiting demolition. A similar pattern is observed for Tanzania Mainland. Furthermore, a proportionately higher percentage (76.0%) of vacant buildings in Tanzania Zanzibar are due to still being under construction and 5.5 percent are new buildings that have not yet been used.

In rural areas, 62.4 percent of all buildings that are not in use are still under construction and 9.1 percent are awaiting demolition. In urban areas, 76.5 percent of vacant buildings are due to still being under construction, while 13.2 percent are either being improved or a waiting for a tenant or an occupant. In Tanzania Mainland, Kilimanjaro region has highest proportions (11.2%) of its buildings being vacant because they are used on seasonal basis while in Tanzania Zanzibar, Kaskazini Unguja with 4.1 percent of these buildings (Figure 3.4 and Table 3.3.1).

Figure 3. 4: Percentage Distribution of Vacant Buildings by Reason; Tanzania 2022 TBC

3.4 Building Construction Materials

This section describes the types of building materials used for construction of floors, walls and roofs.

3.4.1 Floor Materials

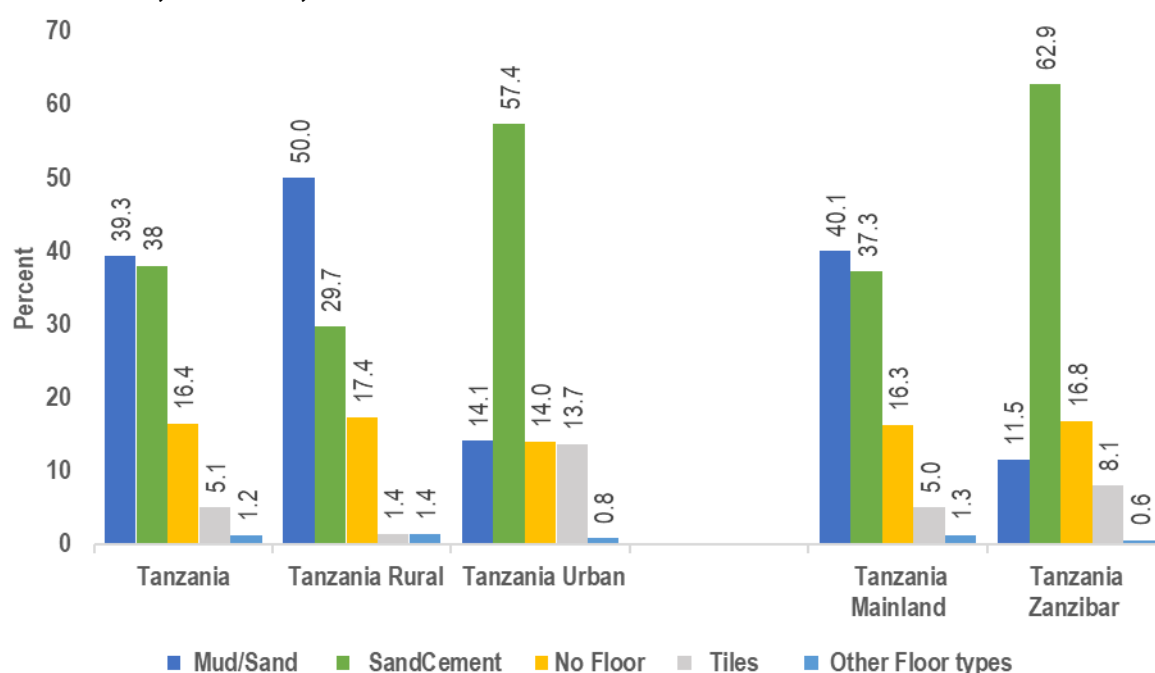

Materials used for floors include sand-cement, ceramic tiles, earth/sand, PVC tiles, parquet or polished wood, wood planks, terrazzo, and cow dung. Other material includes clay, hard plastic or bitumen and bamboo or plant residues. Results show that most buildings in Tanzania (39.3%) have earth or sand floor followed by those with sand-cement (38.0%) and tiles or marble floor (5.1%). However, 16.4 percent of buildings have no floor¹. A similar pattern is observed for Tanzania Mainland. In Tanzania Zanzibar, more than 60 percent (62.9%) of all buildings have sand-cement floors while 11.5 percent have earth or sand and tiles or marble floor (8.1%) as floor material.

The regions with relatively high proportions of buildings with sand-cement floor in Tanzania Mainland are Dar es Salaam (60.3. %) followed by Kilimanjaro (55.3%) while Simiyu has the lowest (17.2%). In Tanzania Zanzibar, regions with high proportions

¹ Buildings with no floor refers to those which were at foundation stage during enumeration period

of buildings with sand-cement are Mjini Magharibi (66.3%) followed by Kaskazini Unguja (65.0%). Over fifty (57.4%) percent of buildings in urban areas have sand-cement compared with 29.7 percent of buildings in rural areas (Figure 3.5 and Table 3.4).

Figure 3. 5: Percentage Distribution of Buildings by Type of Floor Materials and Place of Residence; Tanzania, 2022 TBC

Note: Other Flooring materials are PVC tiles, parquet or polished wood, wood planks, terrazzo or cow dung

3.4.2 Wall Materials

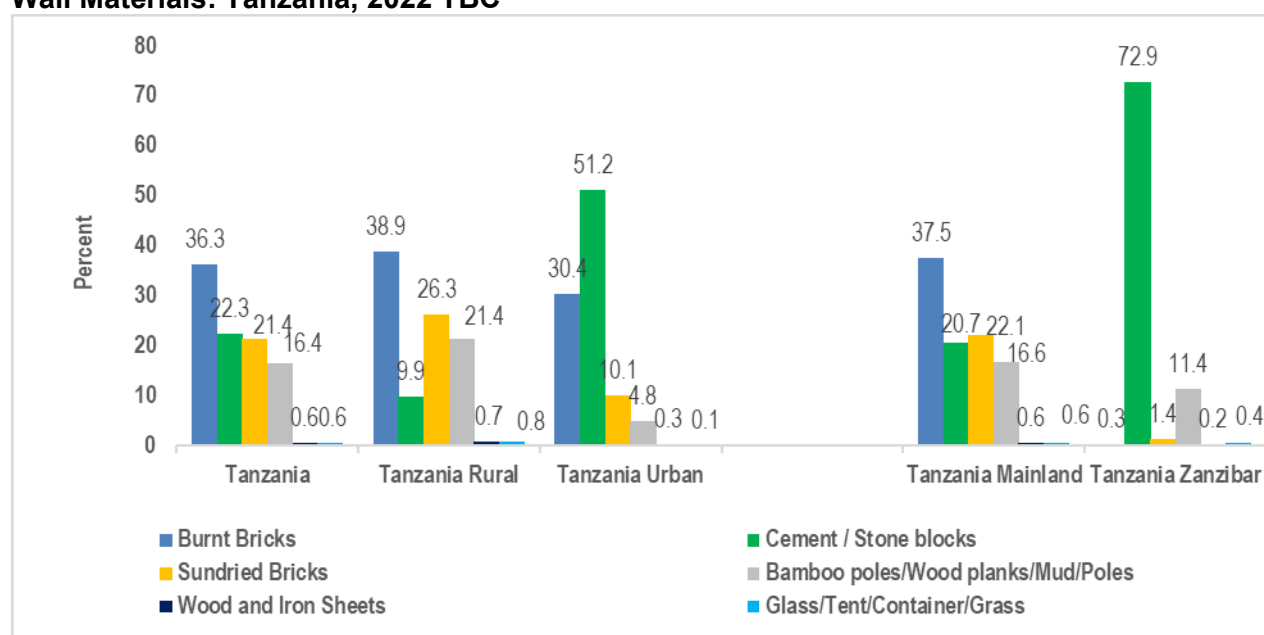

The materials used for construction of walls include stones, sand-cement blocks or stone blocks, sun-dried clay bricks, burnt clay bricks, glass, wood and iron sheets, bamboo poles/mud, wood planks, grass, tents/ containers. The results show that 36.3 percent of buildings in Tanzania, have walls built with burnt clay brick, followed by sand -cement/stones blocks (22.3%) and sun-dried bricks (21.4%).

The results on building materials used for construction of wall in Tanzania Mainland display a similar pattern with those of Tanzania. Results further show, 72.9 percent of all buildings in Tanzania Zanzibar have walls built with sand-cement or stone blocks followed by buildings with walls built with bamboo poles/woods planks or mud/clay and poles (11.4%). In urban areas, 51.2 percent of all buildings have walls built with sand-

cement blocks, followed by burnt clay bricks (30.4%). In rural areas, most buildings (38.9%) are built using burnt clay bricks, followed by sun-dried bricks (26.3%).

The region with the highest percentage of walls built with sand-cement blocks or stone blocks in Tanzania Mainland is Dar es Salaam (95.7%) followed by Pwani (54.7%). Mjini Magharibi Region in Tanzania Zanzibar has the highest percentage (89.8%) of buildings whose walls are built with sand/cement blocks or stone blocks followed by Kaskazini Unguja (76.9%) (Figure 3.6 and Table 3.5).

Figure 3. 6: Percentage Distribution of Buildings by Place of Residence and Types of Wall Materials: Tanzania, 2022 TBC

3.4.3 Roofing Materials

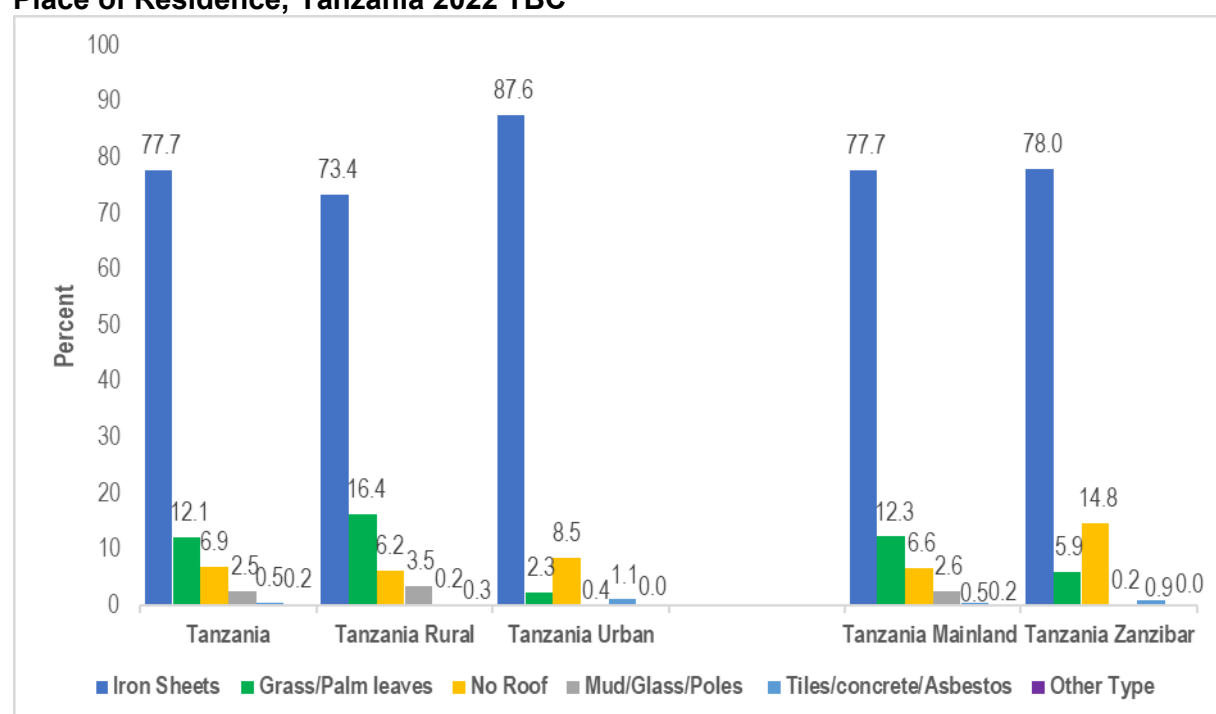

Building materials used for roofing may be permanent or temporary. Permanent building materials include corrugated iron sheets, tiles, concrete and asbestos while temporary roofing materials are thatches (grass or leaves), mud and leaves, plastics/tins, and tents/ container.

The 2022 TBC results reveal that more than three-quarters (77.7%) of buildings in Tanzania are roofed with corrugated iron sheets followed by thatches (grass or leaves) (12.1%). A similar pattern is observed in Tanzania Mainland and Tanzania Zanzibar. However, the proportion of buildings with grass or leaves roof in Tanzania Mainland is more than twice (12.3%) that of Tanzania Zanzibar (5.9%). In urban areas, 87.6

percent of all buildings are roofed with iron sheets, whereas the percentages drop to 73.4 in rural areas.

Regions with high proportion of buildings roofed with corrugated iron sheets are Njombe and Kilimanjaro (91.2% each) followed by Dar es Salaam (89.3%). On the other hand, the regions with largest number of buildings roofed with grass or leaves are Lindi (33.3%) followed by Tabora (32.3%) and Mtwara (25.4%) In Tanzania Zanzibar, regions with high proportions of buildings roofed with corrugated iron sheets are Mjini Magharibi (84.8%) followed by Kusini Pemba (80.5%) while Kaskazini Pemba has the lowest proportion (65.6%). Further, the region with the highest proportion of buildings roofed with grass or leaves is Kaskazini Pemba (19.7%) (Figure 3.7 and Table 3.6).

Figure 3. 7: Percentage Distribution of Buildings by Type of Roofing Materials and Place of Residence; Tanzania 2022 TBC

Note: "No roof" refers to buildings which were not roofed at the time of the Census enumeration.

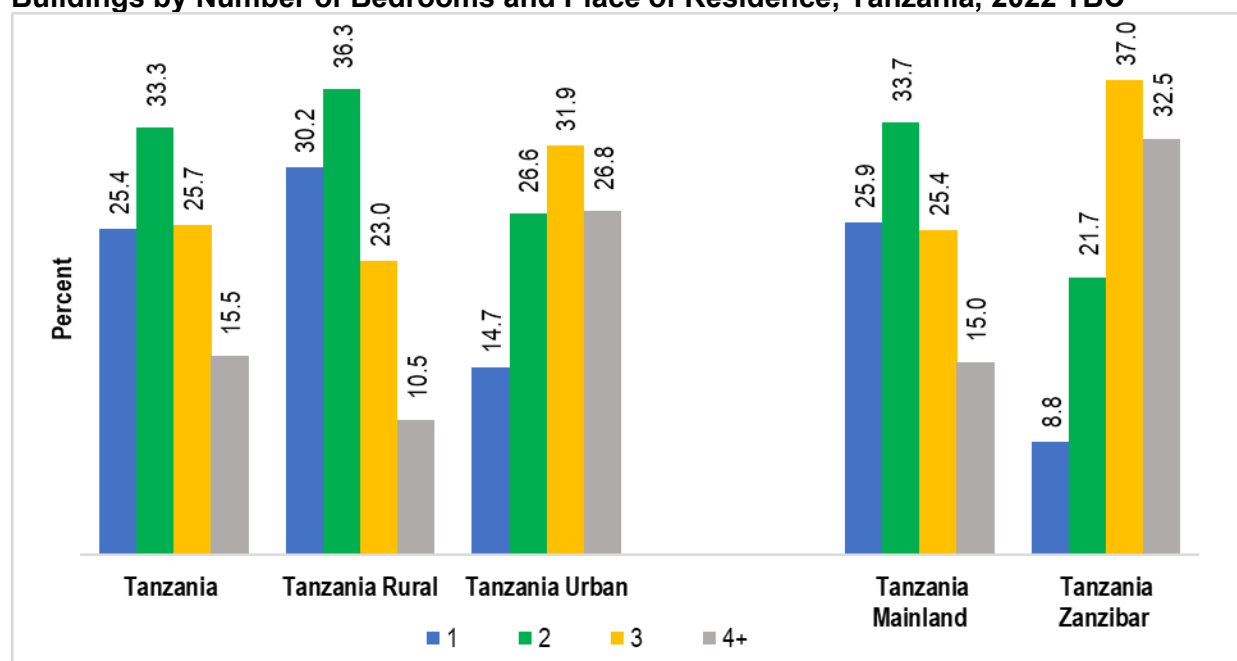

3.5 Number of Bedrooms in Buildings

This section provides information on the number of bedrooms in residential and commercial-residential buildings only. Results show that in Tanzania about a quarter (25.4%) of buildings have one bedroom; about one-third (33.3%) have two bedrooms; 25.7 percent have three bedrooms and 15.5 percent have four or more bedrooms. A similar pattern is observed for Tanzania Mainland.

On the other hand, in Tanzania Zanzibar 8.8 percent of buildings have one bedroom, 21.7 percent have two bedrooms, 37.0 percent have three bedrooms and 32.5 percent have four or more bedrooms.

Moreover, the results show that the highest percentage (36.3%) of buildings in rural areas have two bedrooms, followed by those with one bedroom (30.2%). In urban areas, the highest percentage (31.9%) of buildings have three bedrooms followed by buildings with four bedrooms or more (26.8%) (Figure 3.8 and Table 3.7).

Figure 3. 8: Percentage Distribution of Residential and Commercial – Residential Buildings by Number of Bedrooms and Place of Residence; Tanzania, 2022 TBC

3.6 Building Condition

This section provides information on the condition of buildings to determine whether they are suitable and appropriate for their intended functions. Condition of buildings include the following; the building needs no repair, needs minor repair, needs major repair, renovation or repair is in progress, construction is in progress, construction has

stopped for a long time (dormant construction) and not fit for human habitation (dilapidated).

The results in show that 41.0 percent of buildings in Tanzania do not need repair, 38.5 percent need minor repair, 12.8 percent needs major repair and 0.9 percent are not fit for human use (dilapidated).

The results of buildings condition in Tanzania Mainland portray a similar pattern with that of Tanzania. However, in Tanzania Zanzibar, 25.1 percent of buildings do not need repair 25.0 percent needs major repair, 37.1 percent needs minor repair while 0.8 percent are not fit for human use (dilapidated).

Results also reveal that, 40.5 percent of all buildings in rural areas do not require repair while 39.8 percent needs minor repair, 12.9 percent needs minor repair and 1.0 percent are deemed unsuitable for human use. Additionally, in urban areas, 42.3 percent of all buildings do not need repair, 35.3 percent requires minor repair, 12.5 percent needs major repair and 0.9 percent are not suitable for human use (Figure 3.9 and Table 3.8).

CHAPTER FOUR

BASIC SERVICES IN BUILDINGS

Key Points

- Almost a quarter (22.8%) of all buildings in Tanzania get electricity from the national grid whereas about three out of ten buildings (27.5%) use alternative sources of electricity.
- Almost a quarter (24.3%) of all buildings in Tanzania have water services.
- More than three quarters (75.5%) of all buildings in Tanzania have toilet services.
- About 73 percent (72.6%) of all buildings in Tanzania are accessible by road.
- About 4 percent (3.9%) of all buildings in Tanzania have infrastructure for Persons With Disabilities.
- About 18.5% of Central Government buildings have infrastructure for disability.
- 25.4 percent of Services Provision Institutions (Schools, Colleges, Hospitals, Health centres, Bus terminals, Airport etc) have infrastructure for people with disability

4.0 Introduction

This chapter provides information on basic services available in buildings/Units collected during the 2022 TBC. Services are grouped into two major categories namely, services in buildings (electricity, water, toilet); and accessibility into building (roads and infrastructure for persons With disabilities).

4.1 Electricity Services

Sources of electricity in buildings are categorized into two main groups; electricity from the national grid (TANESCO/ZECO) and electricity from alternative sources (e.g. solar energy, generators and others).

4.1.1 Electricity from the National Grid

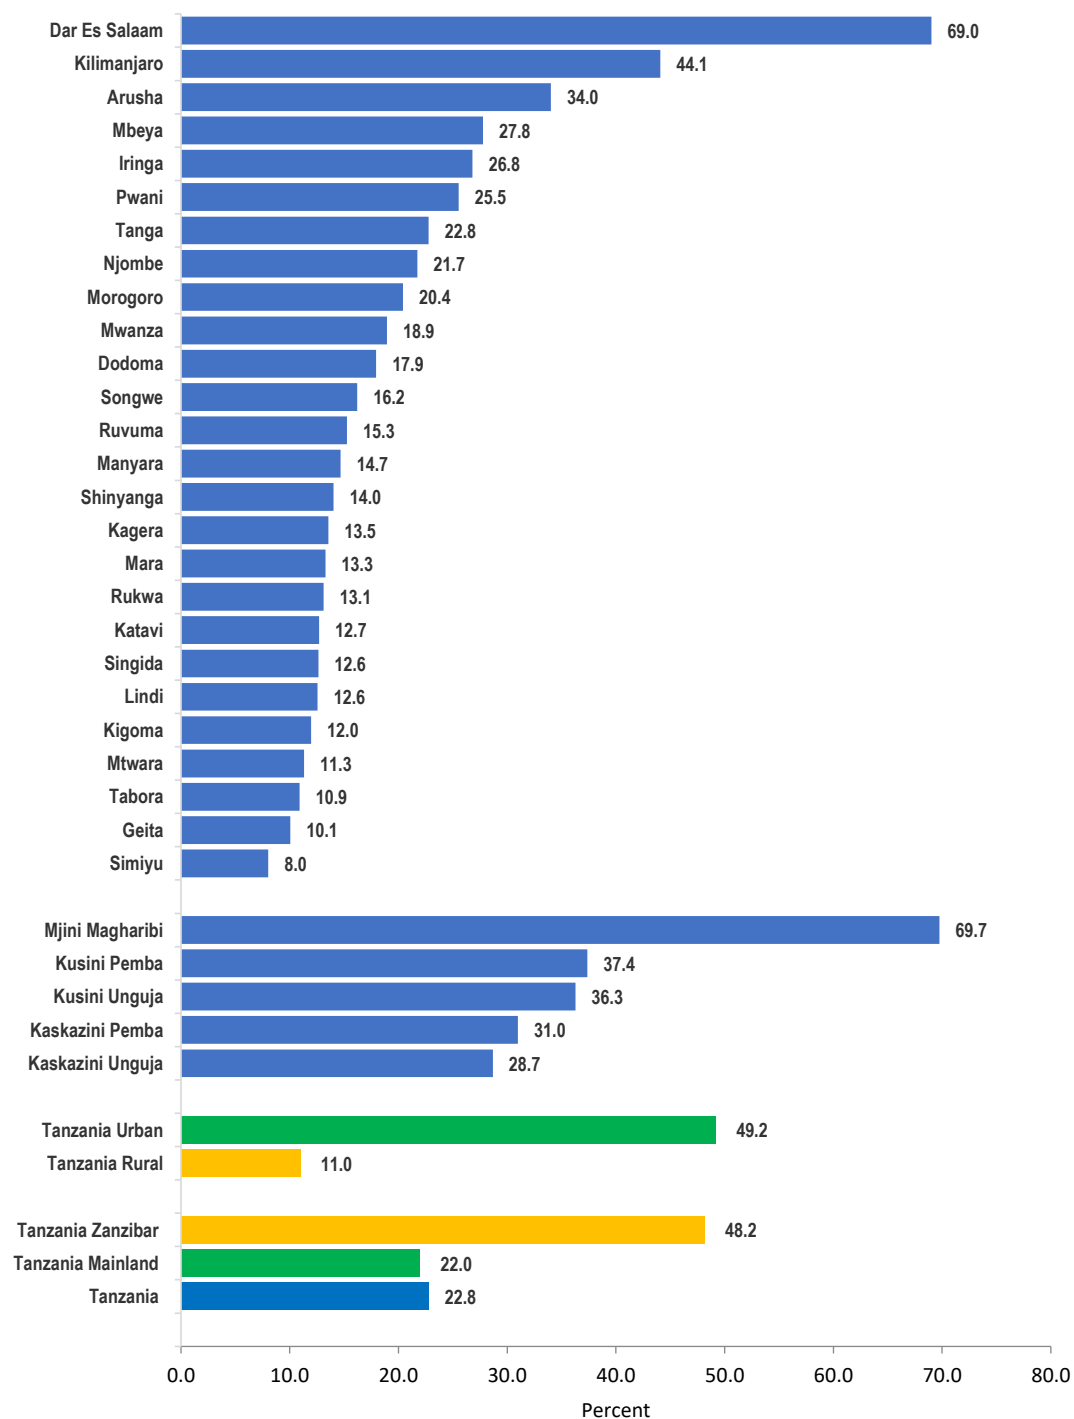

The 2022 TBC results show that almost a quarter (22.8) of all buildings/units in Tanzania get electricity from the national grid. About half (49.2%) of all buildings/units in urban areas get electricity from the national grid compared with 11.0 percent in rural

areas. In Tanzania Mainland about a quarter (22.0%) of all buildings/units are connected to the national grid compared with almost a half of all buildings/units (48.2 %) in Tanzania Zanzibar.

In Tanzania Mainland the region with the largest percentage of buildings/units getting electricity from the national grid is Dar es Salaam (69.0 %) followed by Kilimanjaro (44.1 %) and Arusha (34.0 %). On the other hand, the region with the smallest percentage of buildings that get electricity from the national grid is Simiyu (8.0 %), followed by Geita (10.1%) and Tabora (10.9%).

In Tanzania Zanzibar, Mjini Magharibi Region has the largest percentage (69.7%) of buildings with electricity from the national grid followed by Kusini Pemba (37.4%). On the other hand, Kaskazini Unguja Region has the smallest percentage (28.7.%) of buildings with electricity from the national grid (Figure 4.1 and Table 4.1).

Figure 4. 1: Percentage Distribution of Buildings/Units with Electricity from the National Grid by Place of Residence and Region; Tanzania, 2022 TBC

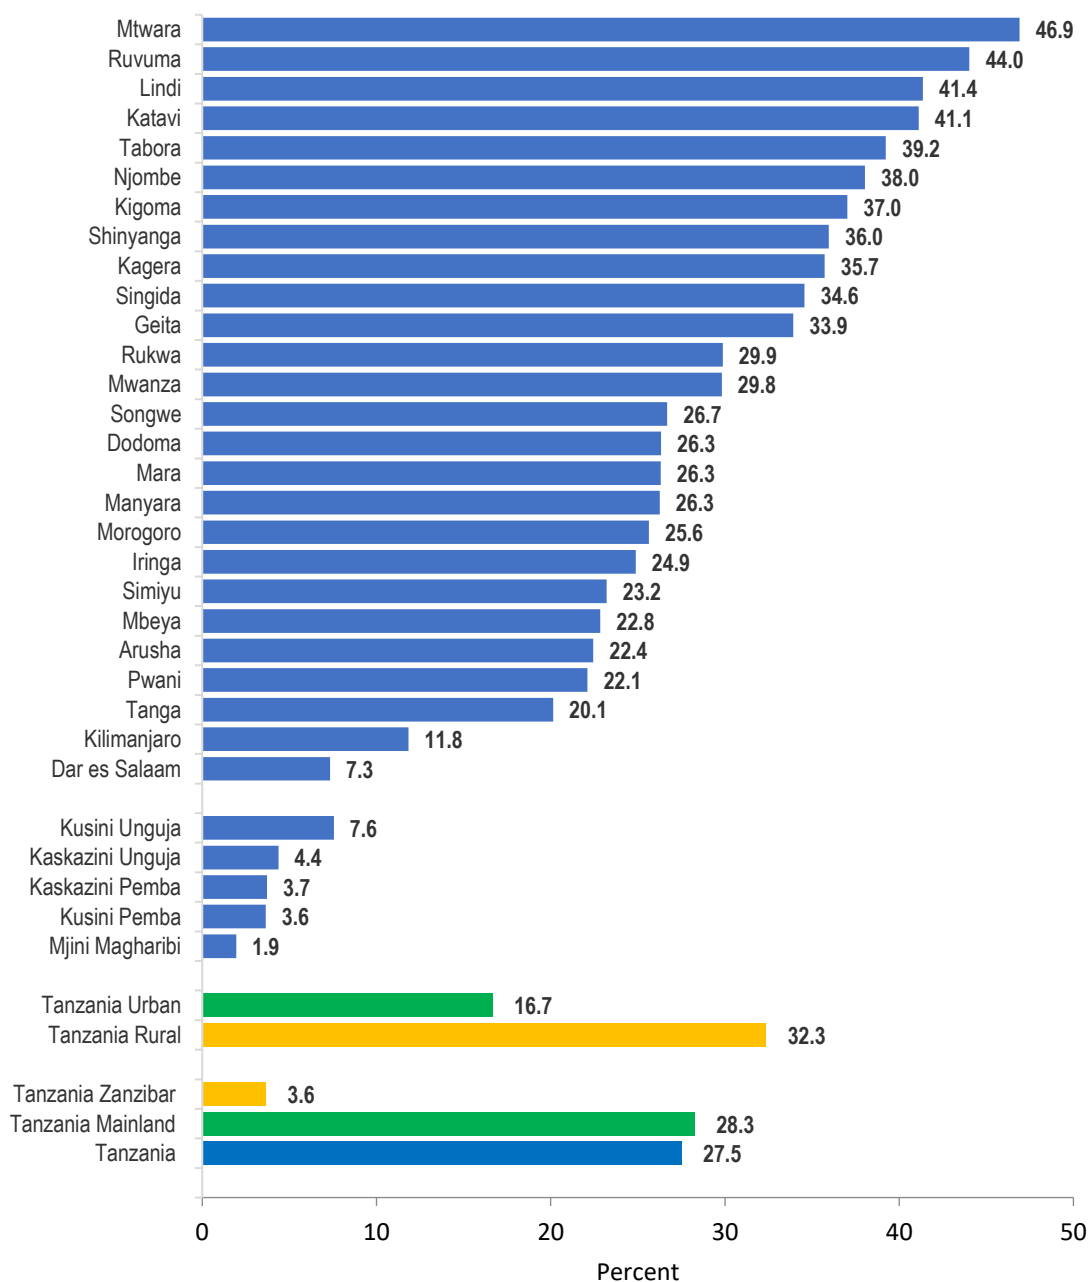

4.1.2 Alternative Sources of Electricity

Alternative sources of electricity in respect to the 2022 TBC include all other sources of electricity except electricity from the national grid. Results, show that about three out of ten buildings in Tanzania (27.5%), Tanzania Mainland (28.3%) and 3.6 percent in Tanzania Zanzibar use alternative sources of electricity. A higher proportion of buildings/units in rural areas (32.3%) use alternative sources of electricity compared to urban areas (16.7%).

In Tanzania Mainland, Mtwara Region has the largest percentage (46.9%), of buildings/units using alternative sources of electricity, followed by Ruvuma (44.0%) and Lindi (41.4%). On the other hand, the region with the smallest percentage of buildings/units using alternative sources of electricity is Dar es Salaam (7.3%), followed by Kilimanjaro (11.8%) and Tanga (20.1%).

The results further show that in Tanzania Zanzibar, Kusini Unguja Region has the largest percentage (7.6%) of buildings/units with alternative sources of electricity while Mjini Magharibi has the smallest percentage (1.9%) (Figure 4.2 and Table 4.1).

Figure 4. 2: Percentage Distribution of Buildings with Alternative Sources of Electricity by Place of Residence and Region; Tanzania, 2022 TBC

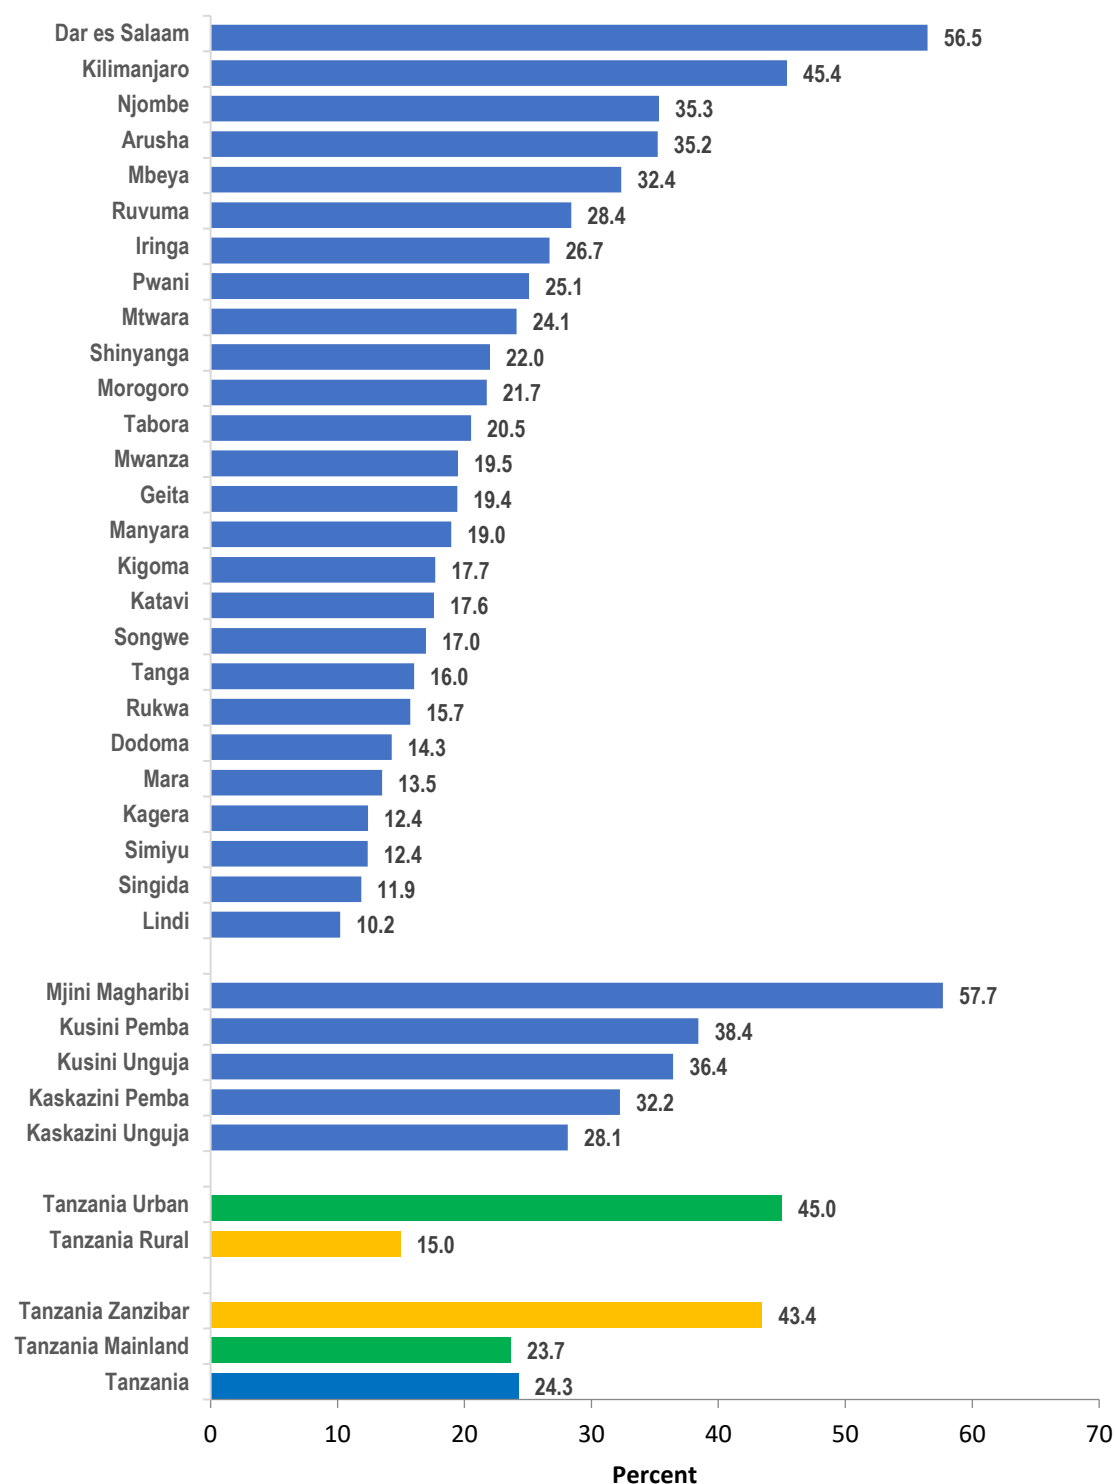

4.1.2 Water Service

According to the 2022 TBC, water services in a building implies water availability within buildings/units and/or on the premises of the building. Almost a quarter (24.3%) of all buildings/units in Tanzania have water services in the buildings/units or on the premises. Buildings/units with water service in Tanzania Mainland account for 23.7 percent of all buildings while in Tanzania Zanzibar, they account for 43.4 percent.

Almost half (45.0%) of the buildings/units in the urban areas have water services in the buildings/units or the premises compared with 15.0 percent in rural areas.

Across regions in Tanzania Mainland, Dar es Salaam (56.5%), Kilimanjaro (45.4%) and Njombe (35.3), have large percentages of buildings with water service in buildings/units or on the premises. On the other hand, Lindi (10.2%), Singida (11.9%) and Simiyu (12.4%) regions have small percentages of buildings with water service in buildings/units or on the premises. In Tanzania Zanzibar, the percentage of buildings/units with water services ranges from 28.1 percent in Kaskazini Unguja Region to 57.7percent in Mjini Magharibi (Figure 4.3 and Table 4.1).

Figure 4. 3: Percentage Distribution of Buildings with Water Services by Place of Residence and Region; Tanzania, 2022 TBC

4.1.3 Toilet Services

In this report toilet services in the building implies toilet availability within and/or on the premises of the building. Results show that more than three quarters of all buildings/units in Tanzania (75.5%) and Tanzania Mainland (75.7%) and 69.0 percent of all buildings in Tanzania Zanzibar have toilet services in the buildings/units or on the premises. In addition, most of the buildings in urban areas (80.2%) have toilet services compared with 73.4 percent in rural areas.

The region with largest percentage of buildings/units with toilet services in Tanzania Mainland is Dar es Salaam (83.3%), followed by Ruvuma (83.1%) and Mtwara (82.9%). On the other hand, Mara Region has the smallest percentage (57.2%) of buildings/units with toilets services followed by Tabora and Arusha (67.0% each).

In Tanzania Zanzibar, Mjini Magharibi Region has the largest percentage of buildings/units (79.1%) with toilet services while Kaskazini Pemba has the smallest percentage (49.9%) (Figure 4.4 and Table 4.1).

4.2 Accessibility of the Building

This section provides information on accessibility of buildings by road and the presence of infrastructure for Persons with Disabilities (PWDs).

4.2.1 Building Accessibility by Road

The 2022 TBC results show that 72.6 percent of all buildings in Tanzania, 72.9 percent in Tanzania Mainland and 61.6 percent in Tanzania Zanzibar are accessible by road. Notably, most of the buildings in urban areas (83.2%) are accessible by road compared with 68.1 percent of buildings in rural areas.

Across regions in Tanzania Mainland, Njombe (87.1%), Dar es Salaam (83.8%) and Kilimanjaro (83.7%) have large proportions of buildings accessible by road whereas Simiyu has the smallest proportion (55.9%) and Rukwa (57.4%). In Tanzania Zanzibar, Kusini Unguja Region has the largest proportion (69.7%) of buildings accessible by road while Kaskazini Pemba has the smallest proportion (52.1%) (Figure 4.5 and Table 4.2).

Figure 4. 5: Percentage Distribution of Buildings Accessible by Road by Place of Residence and Region; Tanzania, 2022 TBC

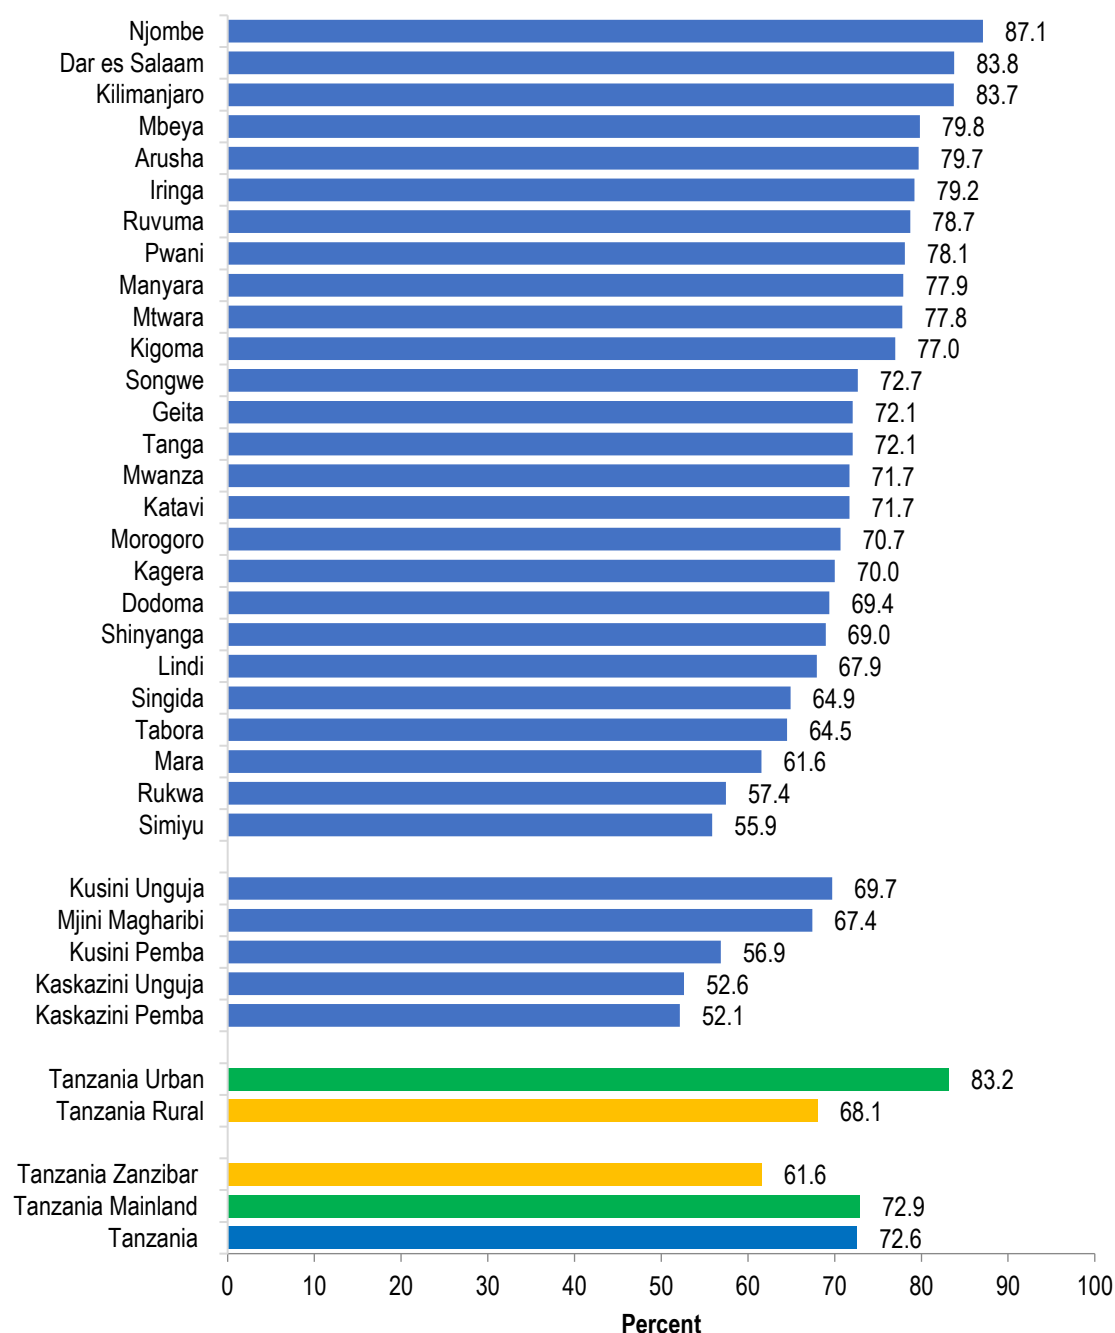

Table 4. 2: Number of Buildings by Building accessibility, Place of Residence and Region; Tanzania, 2022 TBC

4.2.2 Infrastructure for Persons with Disabilities

The results show that about four percent (3.9%) of all buildings in Tanzania and Tanzania Mainland have infrastructure for Persons with Disabilities while in Tanzania Zanzibar is 4.5 percent. In rural and urban areas, buildings with infrastructure for persons with disabilities accounts for 3.2 and 5.7 percent respectively.

In Tanzania Mainland, the region with highest proportion of buildings with infrastructure for PWDs is Dar es Salaam (6.4%) followed by Njombe (5.8%) and Mbeya (5.1%) while Simiyu has the lowest proportion (2.3%). In Tanzania Zanzibar,

Kaskazini Unguja Region has a relatively high proportion (5.6%) of buildings with infrastructure for PWDs while Kaskazini `Pemba has the lowest proportion (2.7%). (Figure 4.6 and Table 4.3).

Figure 4. 6: Percentage Distribution of Buildings with Infrastructure for Persons with Disabilities by Place of Residence and Region; Tanzania, 2022 TBC

4.2.2.1 Infrastructure of People With Disability by Building Ownership Status

The analysis of Building ownership status and infrastructure for people with disability results show that about (18.5%) of Central Government buildings have infrastructure for disability followed by Local Government Authorities (14.4%) buildings, Parastatals/ Governmental institutions buildings (TBA, NHC, WHC, LAPF etc) (13.8%), while low percentage in individual owned buildings (3.6%). In Tanzania Mainland 18.2% of Central Government buildings have infrastructure for disability followed by Local Government Authorities (14.4%), Parastatals/ Governmental institutions buildings (13.8%), while low percentage in individual owned buildings (3.6%).

In Tanzania Zanzibar, 22.6 percent of Central Government building have infrastructure for disability followed by Non-Government Organizations (NGO's, CBO's)/Private Company/Institutions (16.8%) and Private Companies (AVIC, MUTUAL PROPERTIES) which accounts for 14.7 percent. Like in Tanzania and Tanzania Mainland, in Tanzania Zanzibar individual owned buildings have low percentage (4.3%) (Table 4.3 & 4.4).

Table 4.4 Percentage Distribution of Building Ownership with Infrastructure of People with Disability by Place of Residence and Region; Tanzania, 2022 TBC

4.2.2.2 Buildings with Infrastructure of People with Disability by Main Use

The analysis results of main use of building and infrastructure for people with disability show that 9.3 percent of non-residential Buildings have infrastructure for people with disability followed by Residential and Commercial Buildings (6.0%). In Urban areas, 12.5 percent of Non-Residential Buildings have infrastructure of people with disability while in rural areas 7.6 percent of Non-residential Buildings have infrastructure for people with disability. (Figure 4.7 and Table 4.5).

4.2.2.3 Infrastructure of People With Disability in Non-residential Building

The analysis of infrastructure for people with disability on non-residential buildings shows that 25.4 percent of Institutions for services provision (Schools, Colleges, Hospitals, Health) have infrastructure for people with disability followed by Hotels (13.2%). In Tanzania Mainland 25.6 percent of Institutions for services provision (Schools, Colleges, Hospitals, Health) have infrastructure for people with disability followed by Tourists Cottages (13.6%). In Tanzania Zanzibar, Hotel buildings are leading with 21.0 percent followed by Institutions for services provision (Schools, Colleges, Hospitals, Health) with 18.9 percent. (Table 4.7).

CHAPTER FIVE

OWNERSHIP AND TENURE STATUS OF BUILDINGS

Key Points

- Almost nine out of ten (87.0%) buildings in Tanzania are individually owned.
- Of all individually owned buildings in Tanzania, males own about three times (71.5%) as much as females (23.4%) while 5.1 percent are jointly owned.
- About eight out of ten (83.3%) buildings in Tanzania are occupied by owners while only one out of ten (9.2%) are occupied by tenants.
- About two thirds (67.1%) of buildings in Tanzania are built on un-surveyed land.
- One third (33.3%) of all buildings in Tanzania do not have legal land ownership documents.

5.0 Introduction

This chapter provides information on the status of ownership of the building/units, ownership by sex, land surveying and ownership of legal documents of the land where the building is located.

5.1 Building Ownership Status

Ownership by sex considers only individually owned buildings. The results show that most buildings (87.0%) in Tanzania are individually owned followed by co-owned (9.8%) and other ownership (3.3%). Similar patterns are observed in Tanzania Mainland and Tanzania Zanzibar.

In rural areas, 85.5 percent of all buildings are individually owned, 11.4 percent are jointly owned and 3.1 percent other types of ownership. Similarly, in urban areas 90.3 percent of all buildings are individually owned, 6.0 percent are jointly owned and 3.7 percent other types of ownership. (Figure 5.1 and Table 5.1).

Figure 5. 1: Percentage Distributions of Buildings by Ownership Status; Tanzania, 2022 TBC

5.2 Building Ownership by Sex

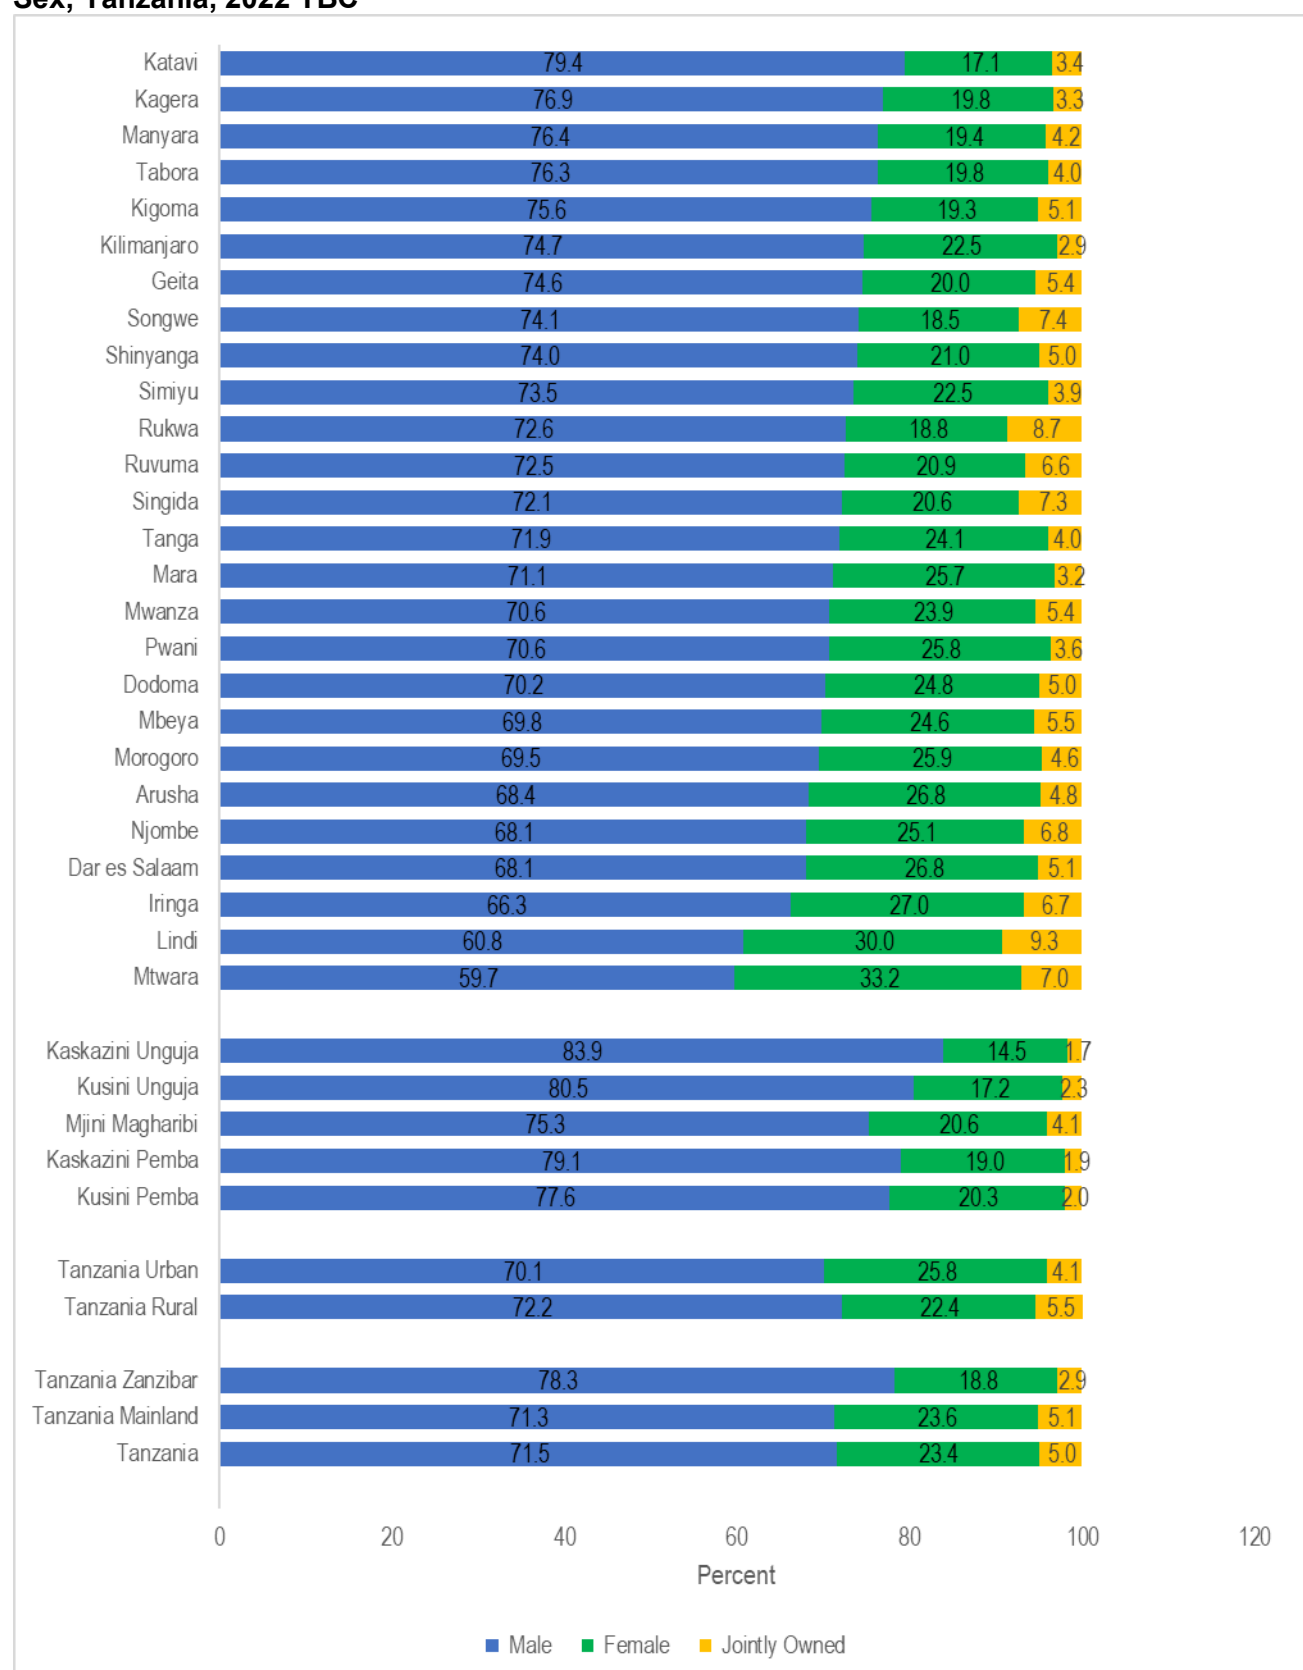

Building ownership by sex considers individually owned buildings/units only. Individual owners of buildings might be males only; females only; or combinations of males and females.

The 2022 TBC results show that 71.5 percent of all individually owned buildings/units in Tanzania are owned by males; 23.6 percent are owned by females and 5.1 percent are jointly-owned by males and females. Similar results are observed in Tanzania Mainland while in Tanzania Zanzibar 78.3 percent of buildings are owned by males, 18.8 percent are owned by females and the remaining 2.9 percent are jointly-owned.

In rural areas 72.2 percent of buildings/units are owned by males, 22.4 percent by females, and 5.5 percent by both males and females. Similarly, in urban areas, 70.1 percent of buildings are owned by males, 25.8 percent by females, and 4.1 percent by both males and females.

Mtwara Region in Tanzania Mainland has the highest proportion of buildings (33.2%) owned by females, followed by Lindi (30.0%) and Iringa (27.0%) while Katavi has the lowest proportion (17.1 %). In Tanzania Zanzibar, Mjini Magharibi Region has the highest proportion of buildings (20.6%) owned by females while Kaskazini Unguja has the lowest proportion (14.5 %) (Figure 5.2 and Table 5.3)

Figure 5. 2: Percentage of Buildings Ownership by Place of Residence, Region and Sex; Tanzania, 2022 TBC

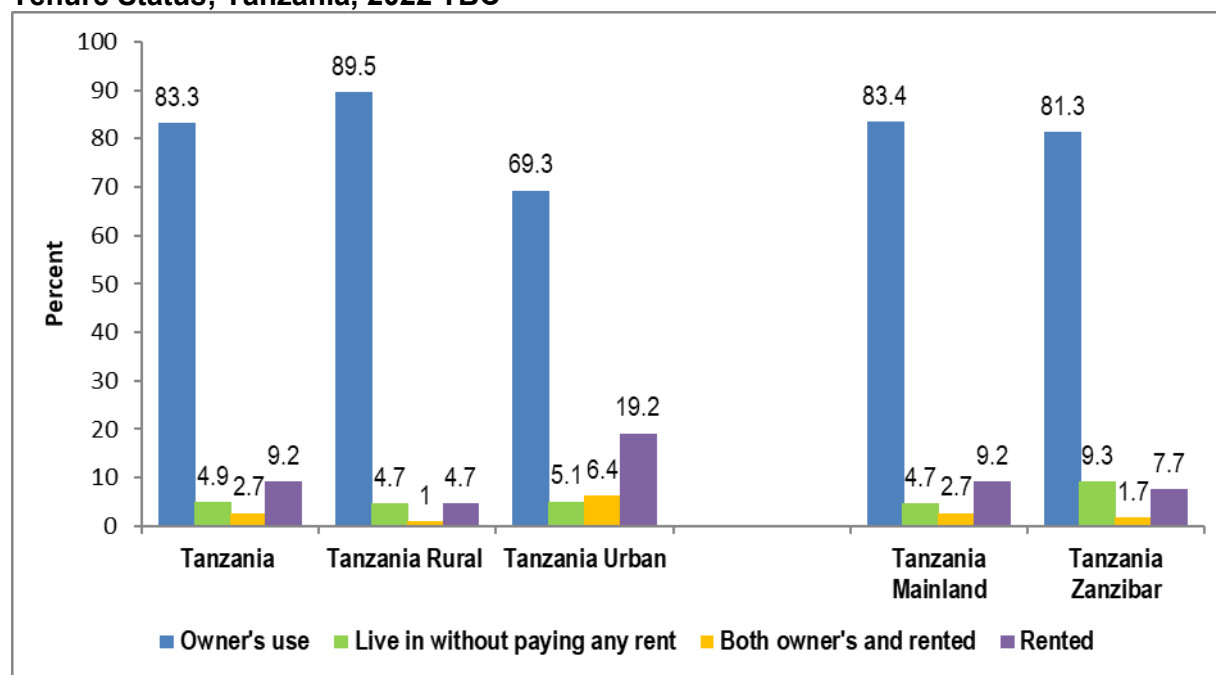

5.3 Occupancy Tenure Status

Occupancy tenure status considers only occupied buildings/units. The results show that 83.3 percent of all buildings in Tanzania are occupied by owners while 9.2 percent are occupied by tenants. A similar tenure pattern is observed in Tanzania Mainland. In Tanzania Zanzibar, eight out of ten buildings (81.3%) are occupied by owners while 7.7 percent are occupied by tenants.

In rural areas, 89.5 percent of all buildings/units are occupied by owners themselves, followed by buildings exclusively occupied by tenants and other individuals without paying rent (4.7% each). In urban areas, 69.3 percent of buildings are occupied by owners themselves, while 19.2 percent are occupied by tenants (Figure 5.3 and Table 5.4).

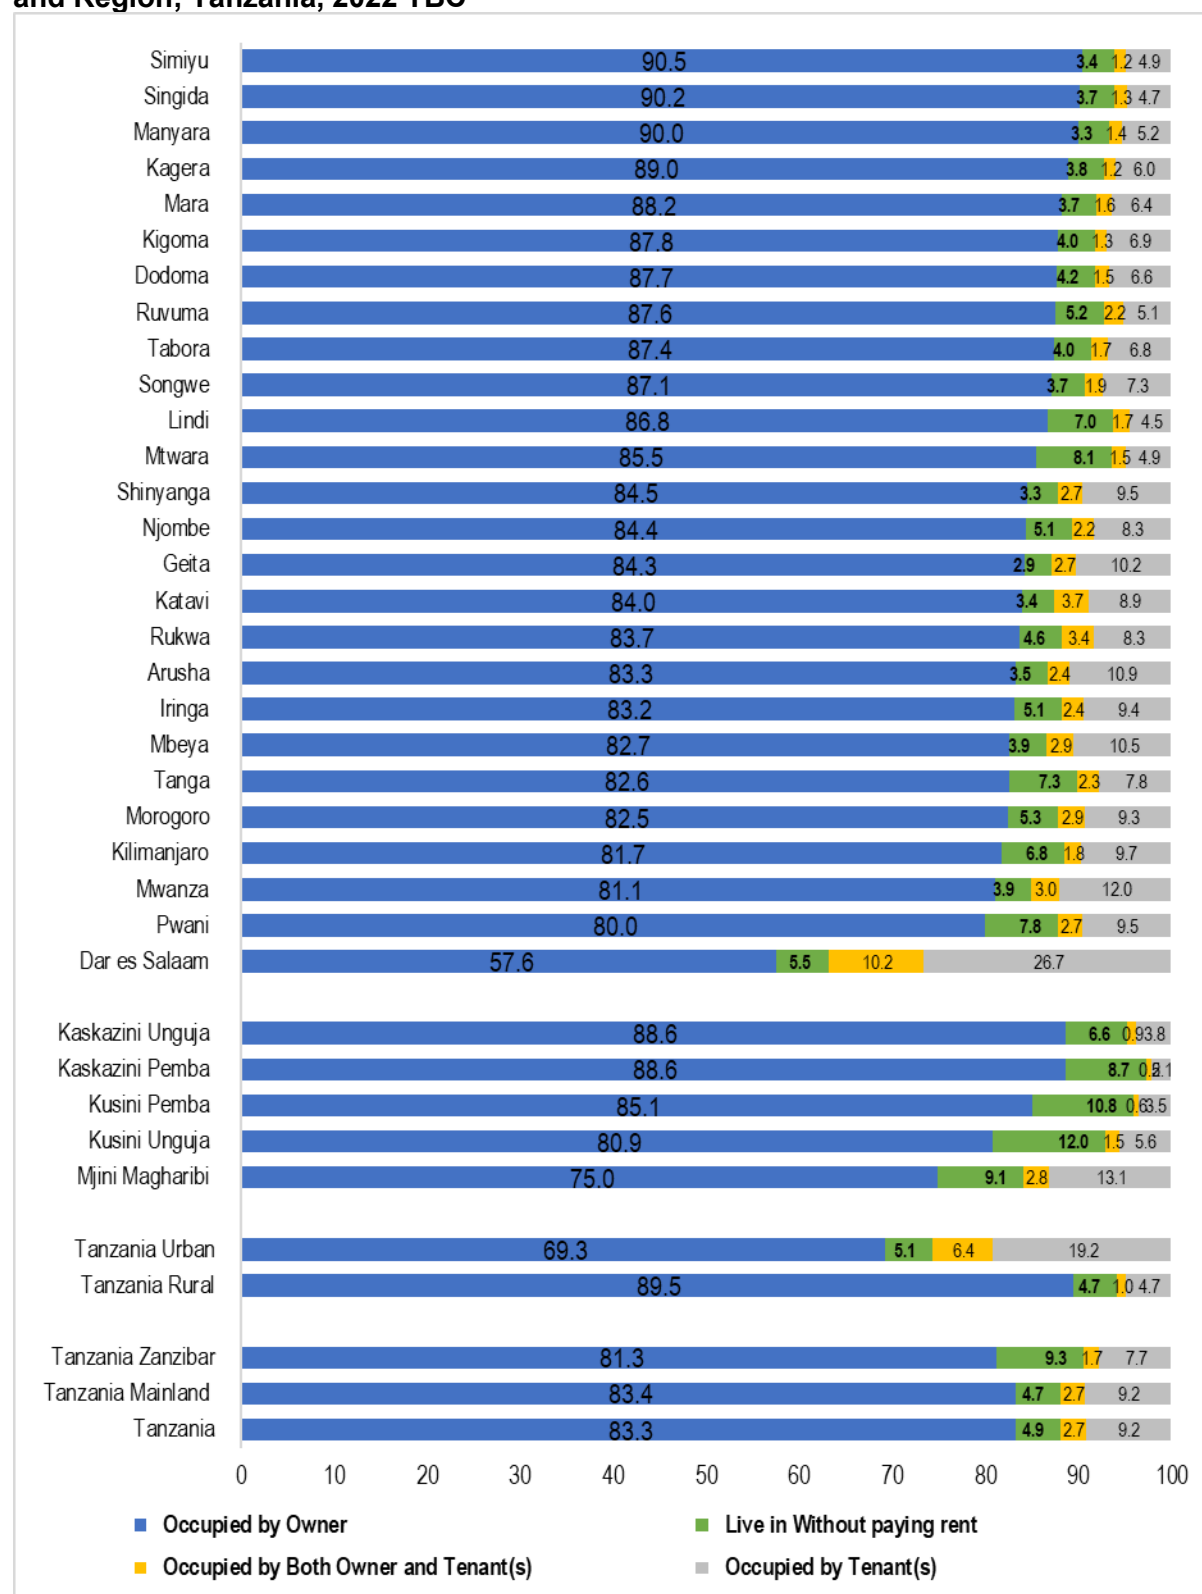

Figure 5. 3: Percentage Distribution of Buildings/unit by Place of Residence and Tenure Status; Tanzania, 2022 TBC

Simiyu Region in Tanzania Mainland has the highest proportion of buildings/units occupied by owners (90.5%) while Dar es Salaam Region has the lowest proportion (57.6%). Furthermore, Dar es Salaam Region has the highest proportion of rented buildings (26.7%) while Lindi Region has the lowest proportion (4.5%).

In Tanzania Zanzibar, both Kaskazini Unguja and Kaskazini Pemba Regions have the highest proportion of buildings occupied by owners (88.6% each) while Mjini Magharibi Region has the lowest proportion (13.1%) (Figure 5.4).

Figure 5. 4 Percentage Distribution of Buildings by Tenure Status, Place of Residence, and Region; Tanzania, 2022 TBC

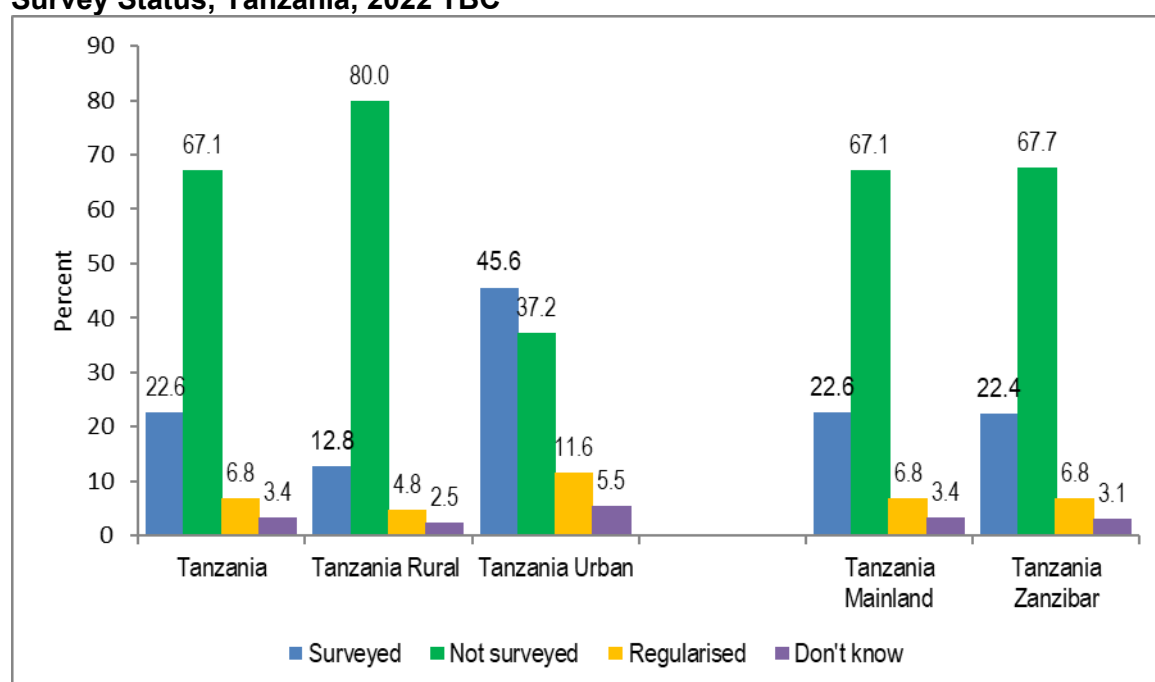

5.4 Land Survey Status

The land survey status is checked by whether the building is built on surveyed land or un-surveyed one. The results show that, two-thirds of buildings (67.1%) in Tanzania are built on un-surveyed land, 22.6 percent on surveyed land and 6.8 percent on regularised land. A similar pattern is portrayed in Tanzania Mainland and in Tanzania Zanzibar.

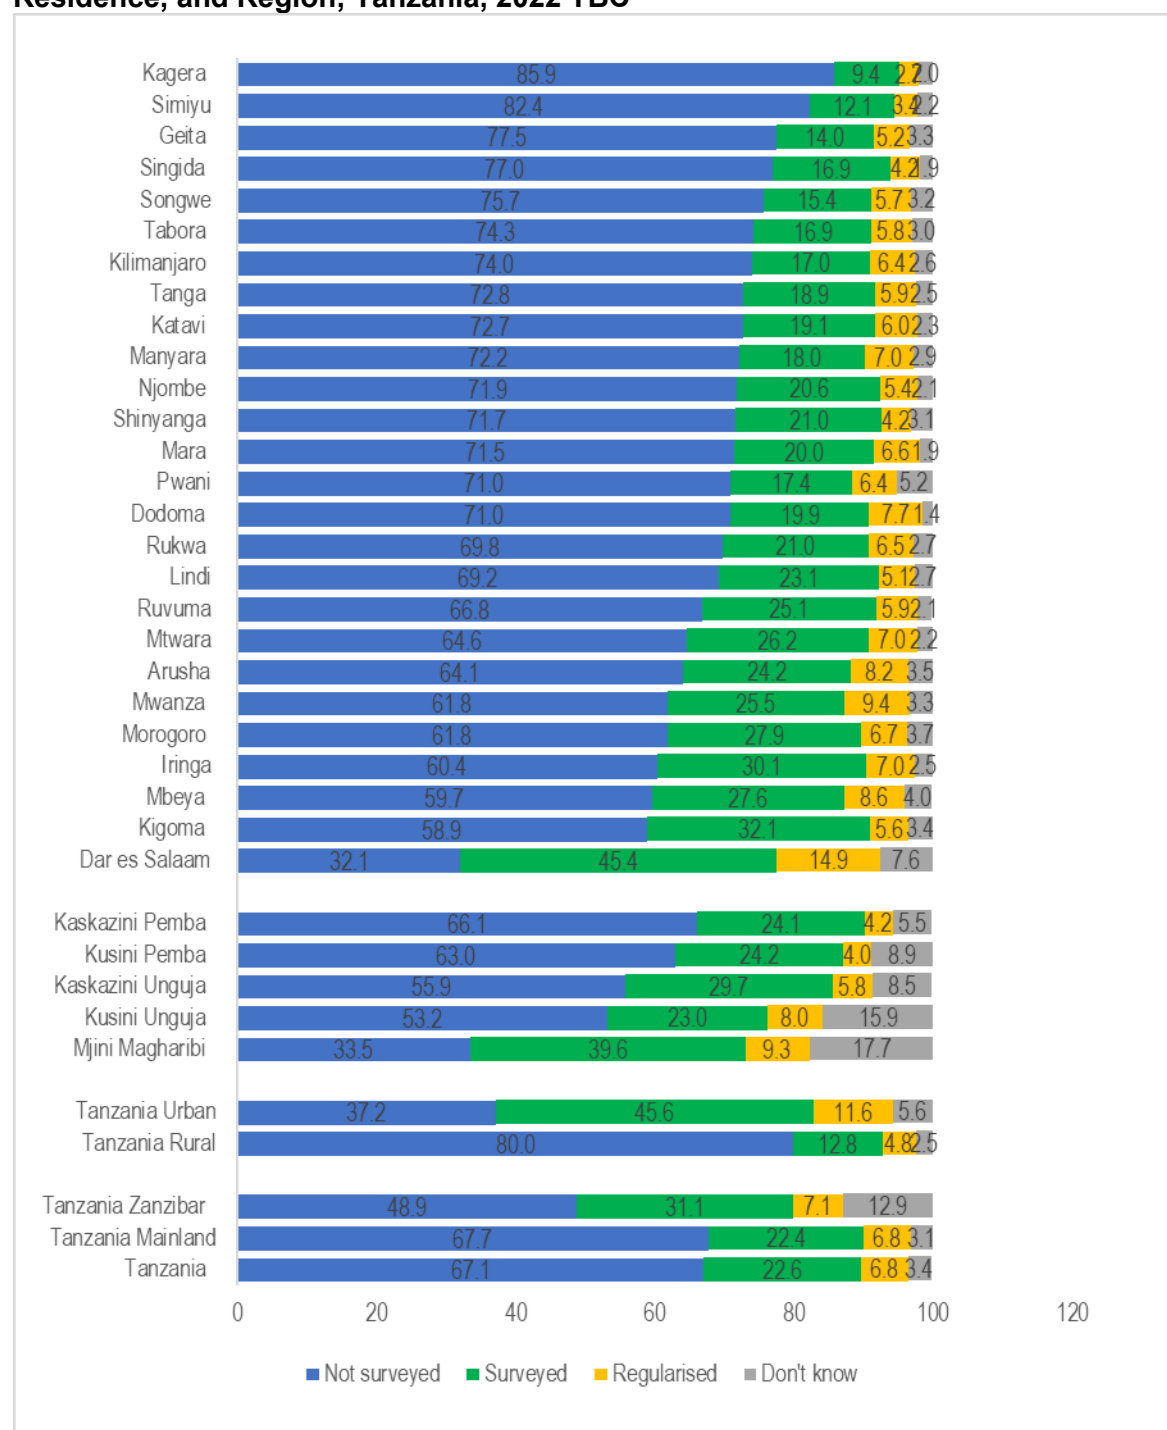

The results further reveal that almost half (45.6%) of buildings in urban areas are built on surveyed land compared with 12.8 percent in rural areas (Figure 5.5).

Figure 5. 5: Percentage Distribution of Buildings by Place of Residence and Land Survey Status; Tanzania, 2022 TBC

In Tanzania Mainland, Kagera Region has the highest proportion of buildings (85.9%) built on un-surveyed land followed by Simiyu (82.4%), while Dar es Salaam has the lowest proportion (32.1%). In Tanzania Zanzibar, Kaskazini Pemba Region has the highest proportion of buildings (66.1%) built on un-surveyed land while Mjini Magharibi has the lowest proportion (33.5%). (Figure 5.6 and Table 5.5).

Figure 5. 6: Percentage Distribution of Buildings by Land Survey Status, Place of Residence, and Region; Tanzania, 2022 TBC

5.5 Land Ownership Documents

All land in Tanzania is public land vested to the respective Presidents of the United Republic of Tanzania and of the Revolutionary Government of Zanzibar as trustees for and on behalf of all the citizens of Tanzania and Zanzibar. However, despite this

trusteeship, individuals and institutions can obtain land ownership for a specified period of time. The 2022 TBC collected information on land ownership status including; Title deeds, Residential licenses, Letters of offer or Acknowledgement of payment, Certificates of Customary Right of Occupancy (CCRO in Mainland), Agreements or contracts, Registration Cards (Zanzibar) and Local Government documents.

Results show that one third (33.3%) of all buildings in Tanzania do not have legal land ownership documents, 24.8 percent of buildings have CCRO, 17.5 percent have Local Government documents and 10.4 percent have title deeds. A similar pattern is observed in Tanzania Mainland. In Tanzania Zanzibar, about a half (45.7%) of all buildings have been built on land that has no legal ownership documents while about a quarter (23.5%) have title deeds.

Furthermore, in rural areas of Tanzania, 40.6 percent of all buildings do not have legal land ownership documents, 32.9 percent are built on land with CCRO and 4.3 percent are built on land with title deeds. In urban areas, 24.9 percent of all buildings have title deeds, 21.9 percent have Local/Village Government documents and 17.3 percent do not have legal land ownership documents.

In Tanzania Mainland, Dar es Salaam Region has the highest proportion (30.3%) of building with title deeds followed by Iringa (16.4%) and Morogoro (14.6%). On the other hand, Kagera Region has the lowest proportion (4.5%) of buildings with title deeds followed by Simiyu (4.6%). In Tanzania Zanzibar, Mjini Magharibi Region has the highest proportion (34.3%) of buildings with title deeds and Kusini Unguja has the lowest (11.1%) (Figure 5.7 and Table 5.6).

CHAPTER SIX

KEY FINDINGS AND POLICY IMPLICATIONS

Key Points

- Most of buildings (94.4%) in Tanzania are single storey.
- Large proportion (86.3%) of all buildings are suitable for human use and habitation.
- Large proportion (72.6%) of all buildings are accessible by road.
- Low proportion (3.9%) of all buildings have infrastructure for Persons with Disabilities.
- Large proportion (71.5 %) of all buildings are owned by men alone compared with to low proportion (23.4 %) of all buildings owned by women alone.
- More than one third (33.3 %) of all buildings are built on land with no ownership documents.
- Large proportion (67.1%) of all buildings are built on unplanned and un-surveyed land.

6.0 Background Information

The 2022 Tanzania Building Census (TBC) is the only trusted and reliable source of building statistics at all administrative levels. It provides baseline for residential and non-residential building data, which are crucial for policy formulation and review, monitoring and evaluation of policies and development frameworks at national, regional and international levels. It is rational to explicitly indicate key findings, policy implication and policy action for planners, business communities, researchers and the public to ensure that the Building Census results are used for evidence-based decision making in development processes.

This policy brief seeks to highlight the importance of utilising data from the Basic Statistics report of 2022 TBC to inform policies, programmes and investments that will drive sustainable development and improve the quality of life for all Tanzanians.

6.1 Building Stock

Building stock is the collection of buildings in a particular area. It provides total number of buildings by type and use.

Key findings

- a) Most (94.4%) of all buildings in Tanzania are single storey

Policy Implication

The presence of a large percentage of single-storey buildings indicates urban sprawl and housing in general, which can have a negative impact on the provision of basic social services such as roads, water, electricity and open spaces. In addition, this urban growth interferes with and reduces natural areas such as forest reserves, grazing land and land suitable for agriculture.

Policy Action

- i. The Government need to enforce the existing land use planning policies and laws, which provide for vertical development for realisation of compact cities.
 - ii. The central Government and Local Government Authorities (urban planning authorities) need to manage and implement the existing land use and urban planning policies, laws and regulations that direct vertical development of buildings especially in urban areas in order to achieve the concept of compact cities.
- b) The majority (91.4%) of buildings in Tanzania are for residential use, 3.4 percent commercial-residential and 5.2 percent non-residential.

Policy Implication

Non-residential buildings include commercial, institutional and industrial buildings. However, the flourishing of many residential buildings in the country shows a great shortage of non-residential buildings that involve various economic activities which provide employment to citizens and increase the income of families and the country as a whole.

Policy Action

The Government needs to manage and implement policies and laws of land and urban planning that direct the presence of balanced land use zoning between residences, businesses, industries, institutions and social services. These would open up the scope of employment and economy in non-residential use sectors.

- c) The results show that majority (98.2%) of all buildings in Tanzania have one unit, 1.4 percent two units and 0.4 percent three units and more.

Policy implication

Construction of single unit residential buildings, apart from causing a shortage of residential houses, leads to cities with large areas and scattered buildings, encroaching on areas reserved for agriculture, forest reserves, animal pastures and wetlands. To a large extent, this overlap of land, leads to the absence of a better ratio of land use and thus causes land use conflicts due to encroachment and non-productive competition for land use.

Policy Action

- i. The Government needs to manage development control and implementation of master plans in order to ensure that towns, municipalities and cities adapt construction of buildings with more than one unit.
- ii. The Government needs to promote construction of buildings with more than one unit in a single plot. This will enable a large number of urban residents to be served in few buildings within a small area so as to ensure efficient use of resources and infrastructure.

6.2 Buildings Information

The provided information on buildings includes construction materials and number of bedrooms

Key findings

- a). More than half (58.6%) of all buildings in Tanzania have walls built with permanent materials (burnt bricks 36.3% and cement bricks 22.3%).
- b). About four out of ten (43.4%) of all buildings in Tanzania have durable floor materials (cement and sand 38.0%, tiles 5.1% and terrazzo 0.3%).
- c). About eight out of ten (78.2%) of all buildings in Tanzania are roofed with permanent materials (77.7% iron sheets, 0.3% tiles, 0.1% concrete and 0.1% asbestos).

Policy implication

The extent of use of permanent construction materials indicates the implementation of Section 4.2. of the National Housing Development Policy of 2000 which emphasizes the use of permanent construction materials for all public and private buildings.

Use of permanent building construction materials is the basis for having strong and safe buildings. In addition, buildings built with temporary construction materials indicate a deficiency or lack of quality and safety for users of the respective buildings.

Policy Action

The Government and other partners need to facilitate;

- i. Research on building materials used in the relevant areas with the aim of making them durable and available at low cost.
- ii. The informal private sector to focus on production of various buildings construction materials to be used principally for residential houses.
- iii. Community development colleges to impart knowledge on production and use of building materials derived from raw materials found in respective local areas, and
- iv. Establishment of small-scale building material industries at the lower levels of the society

d). More than half (58.7%) of all residential and commercial-residential buildings in Tanzania consist of one or two bedrooms.

Policy Implication

- iii. A shortage of bedrooms indicates overcrowding in residential buildings. Overcrowding in buildings causes discomfort and unhealthy living condition and this calls for a need to have good housing with adequate space.

Policy Action

The Government is advised to continue to create an enabling environment in order to: -

- i. Control increase in the price of construction materials;
- ii. Improve affordable housing programme;
- iii. Facilitate availability of cheap loans for houses and building materials; and
- iv. Enable the private investors to invest in low-cost housing projects, especially in large cities that have a large number of people.

- e). More than half (51.3%) of all buildings in Tanzania need repair where as 12.8 percent need major repair and 38.5 percent need minor repair. In addition, 0.9 percent of all buildings are not suitable for human use.

Policy Implication

Buildings in need of repair show less safety for residents and other users as they are dangerous to lives. Buildings built according to the rules and the correct use of durable construction materials last for a long time without needing regular repairs.

Policy Action

The Government is advised to do the following: -

- i. Establish legal guidelines that will govern the maintenance and repair of buildings,
- ii. Conduct campaigns to educate and motivate building owners, tenants and the general public on the importance of regular repair and maintenance of buildings for the health and safety of users as well as the safety of the buildings;
- iii. Continue to oversee implementation of laws and guidelines that require owners to demolish and rebuild damaged and dangerous buildings to ensure the safety of relevant users

6.3 Building Services:

Building services include provision for water, electricity and toilet services as well as infrastructure for Persons With Disabilities. Availability of these statistics will enable the Government to evaluate and determine the level reached according to national and international goals and standards.

Key findings

- a) Nearly a quarter (22.8%) of all buildings in Tanzania are supplied with electricity from national grid and 27.5 percent are connected from alternative electricity sources.
- b) Nearly a quarter (24.3%) of all buildings in Tanzania have water services,
- c) More than three quarters (75.5%) of all buildings in Tanzania have toilet facilities.
- d) Over nine in ten (96.1%) of all buildings in Tanzania have no infrastructure for Person With Disabilities.

Policy implication

The Government intends to improve lives of citizens, facilitate wealth production activities including business, industry and agriculture. This includes improving social services such as health, education and water by ensuring that every area of Tanzania is accessible to all basic services. The presence of a small percentage of buildings with electricity and water services, affects the implementation of economic activities for individual citizens in accessing opportunity to increase income and enhancing their development.

Large percentage of buildings that do not have friendly infrastructure for Persons With Disabilities causes difficulty for this group to reach and use the buildings, thus depriving them the basic rights to access services provided in those buildings.

Policy Action

The Central Government and Local Government Authorities should continue to do the following: -

- i. To facilitate participation of private sector in electricity distribution,
- ii. To create an enabling environment for authorities to provide electricity and water supply services in developing friendly methods to enable low-income citizens to be connected to these services,
- iii. Local Government Authorities should continue promoting good hygiene habits through awareness campaigns and programmes on importance of having and using toilets,
- iv. Utility companies should assist private households in wiring/plumbing, including connection by setting a mechanism to recover costs subsequently (microcredit schemes),
- v. The Government should reinforce laws regarding disability infrastructure facilities and raise awareness on the same,
- vi. Stakeholders to continue to implement the Government directives on the installation of friendly infrastructure for Persons With Disabilities in all public and private buildings,
- vii. Local Government Authorities and stakeholders to continue providing education and mobilize the community on the importance of setting up friendly infrastructure for Persons With Disabilities in all buildings, and

- viii. Encourage the installation of friendly infrastructure For People With Disabilities in all existing buildings that do not have such infrastructure.

6.4 Ownership and Tenure Status of Buildings

Ownership and tenure status of buildings is a state of legal possession and control of buildings. The land tenure system in Tanzania is lease hold which is referred to as Granted the Right of Occupancy (GRO) and Customary Right of Occupancy (CRO), or terms of holding/owning a property/building.

Key findings

- a) About nine out of ten (87.0%) of all buildings in Tanzania are owned by individual persons followed by joint ownership (9.8%), while 3.2 percent of buildings are owned by government and non-government organisations.
- b) Over seven out of ten (71.5%) of all buildings in Tanzania are owned by men alone, while about a quarter (23.4%) are owned by women alone and 5.0 percent are jointly owned.

Policy implication

The prevailing system of buildings ownership by individuals or families is a source of horizontal extension of rural and urban settlements. There is a need to minimise mushrooming of small residential buildings most of which are below standard.

The presence of a small percentage of women who own buildings indicates unequal opportunity to this group, thus creating an obstacle in their economic empowerment. The participation of women in various economic and social fields is important in bringing sustainable development that enables achieving equality and eradicating gender violence.

Policy Action

The Government to facilitate and ensure that;

- i. The existing land and urban planning policies/laws and regulations should be reviewed to ensure that, proportionally large part of urban residential areas is owned and developed by government and/or none-governmental organisations/institution. In order to minimise mushrooming of small residential buildings most of which are below standards,
 - ii. More measures and strategies are put in place in order to increase women's buildings ownership, particularly through land ownership in rural areas and in urban areas to encourage joint ownership.
- c). About 33.3 percent of all building in Tanzania are constructed on lands which do not have land ownership documents.

Policy Implication

The buildings without legal ownership documents indicate that: -

- i. The national programme of land planning, surveying and titling have not yet been able to reach many beneficiaries.
- ii. There is a loss of Government revenue,
- iii. There is tenure insecurity among land holders and increase in land related conflicts,
- iv. There is inability of land owners to use their land as a mortgage for obtaining loans
- v. There are many buildings in unplanned and un-surveyed areas signifying escalation of informal settlements, lack of social services and infrastructure.

Policy Action

- i. The Government need to put more efforts on implementation of National Programme of Land Use Planning, Surveying and Titling together with Land Tenure Improvement Programme (LTIP). However, priority should be given to urban residents where land is rather scarce compared to rural residents,
 - ii. The Central Government through Local Government Authorities should strategically enhance and supervise land use planning and surveying projects to move in a similar pace with the prevailing rapid urbanisation.
- d). Almost seven out of ten (67.1%) of all buildings in Tanzania are built on unplanned and un-surveyed land.

Policy Implication

The presence of a large percentage of buildings built on unplanned and un-surveyed land indicates: -

- i. The increase in disorganised housing that lacks services and important infrastructure;
- ii. Insecurity of tenure;
- iii. Loss of Government revenue from property taxes;

- iv. Haphazard development of land;
- v. Land use conflicts; and
- vi. Social crime and unhealthy environment for people's lives.

Policy Action

Central Government through Local Government Authorities is advised to:-

- i. Strengthen and strategically manage land use plans and surveying projects to match the pace of urban growth, and
- ii. Continue to encourage land owners to plan and survey land to make it legally owned.

6.5 General Policy Implications

This section highlights general implications considered as merits obtained from 2022 Building Census results with respect to policy issues. The benefits on policy issues can be summarised as follows; -

- i. The results enable Government and other relevant institutions to assess and evaluate level of implementation of the internal existing policies, laws and regulations and see whether there is a need for further policy enforcement, policy review or formulation of new ones.
- ii. To provide planning authorities with a rational and reliable benchmark for developing the National program for planning, surveying and owning land considering the existing deficiency of surveyed land as compared with un-surveyed land and low proportion of buildings with legal ownership documents;
- iii. The results enable the Government and all Real Estate Stakeholders to realise the progress made towards implementation of the Sustainable Development Goals (SDGs) No. 11 of 2030, which aspires to have towns and cities which are inclusive, safe, resilient and sustainable for the betterments of current and future generations.
- iv. The results enable the Government and other relevant institutions to assess and evaluate the level of implementation of Resolution No. 5 of the New International Urban Agenda of 2016 (NUA 2016). The agenda calls for attention in planning, designing, financing, developing and managing human settlements, especially towns and cities to ensure that they are inclusive, safe, resilient and sustainable with an aspiration of 'leave no one behind'.
- v. Taking into consideration the importance of land and buildings as factors that influence socio-economic development of individual person and the society; the 2022 TBC results will assist the Government and other relevant stakeholders in improving land use planning and surveying, building quantity, building quality, building types and gender balance in land and building ownership.

Annex: List of Contributors

Contributors to the Building Census Report:

Census Commissars

Hon. Anne Semamba Makinda (Tanzania Mainland)	Amb. Mohamed Haji Hamza (Tanzania Zanzibar)
---	---

NBS/OCGS Board Chairpersons

Dr. Amina Msengwa (NBS)	Amb. Amina Salum Ali (OCGS)
-------------------------	-----------------------------

NBS/OCGS Chief Government Statistician

Dr. Albina Chuwa (NBS)	Salum Kassim Ali (OCGS)
------------------------	-------------------------

NBS/OCGS and MLHSD/MLHD Directors

Ruth Minja (NBS)	Fahima Mohamed Issa (OCGS)
Emilian Karugendo (NBS)	Bakari Kitwana Makame (OCGS)
Daniel Masolwa (NBS)	Haroub Ali Masoud (OCGS)
Daniel Ulindula Andrew (NBS)	Abdalla Khamis Abdalla (OCGS)
Deogratius Kalimenze (DHS) - MLHSD	Ilyasa P. Haji (DPPR) - MLHD

Census Coordinators

Seif Kuchengo (NBS)	Abdul-Majid Ramadhan Jecha (OCGS)
---------------------	-----------------------------------

Authors/Reviewers

Mariam J. Kitembe (NBS)	Hamisa Suleiman Faki (OCGS)
Dr. Mwinyi O. Mwinyi (NBS)	Bakari Khamis Kondo (OCGS)
Phausta Ntigiti (NBS)	Othman Ali Khamis (OCGS)
Mdoka Omar (NBS)	Haji Ame Haji (OCGS)
Pastory Ulimali (NBS)	Amina Musa Khamis (OCGS)
Hilali Abdullah (NBS)	Kazija Khamis Said (OCGS)
Hashim Njowe (NBS)	Ibrahim Makame Nyange (OCGS)
Hellen Hilary (NBS)	Raya Mohammed Mahfoudh (OCGS)
Philbert Mrema (NBS)	Juma Mbwana Juma (OCGS)
Henrick Mwellu (NBS)	Meckson Lorden Nzogela (Ardhi University)
David Mwaipopo (NBS)	Maglan C. Sang'anoi (Ardhi University)

Edward J. Mpanda (MLHHSD)
Dismas W. Minja (MLHHSD)
Bariki Ileta (MLHHSD)
Fidelis W. Kabuje (MLHHSD)
Amina C. Ramadhan (MLHHSD)
Tumaini Setumbi (MLHHSD)

Abdallah Rashid Ali (MLHD)
Said S. Makenzi (MLHD)
Mohammed H. Mohammed (MLHD)
Abdallah A. Magombana (NLUPC)
Doreen Makundi (MLHHSD)

Spatial Data Analysts

Benedict Mugambi (NBS)
Khalid Lewanga (NBS)

Julieth Msuya (NBS)
Yunis Nota (NBS)

Data Processing

Mwanaidi Mahiza (NBS)
Steven Lwendo (NBS)
Stephen S. Jutta (NBS)
Novat T. Buberwa (NBS)
Munir Mdee (NBS)
George Mockray (NBS)
Beatrice Rwegoshora (NBS)

Vicent Kaberengeta (NBS)
Hashim Uzia Mohamed (OCGS)
Bakar K. Omar (OCGS)
Aisha Said Mohammed (OCGS)
