The 2022 Population and Housing Census: Urambo District Council Population Projections Report, 2023 to 2050; Tanzania, September 2025.

## URAMBO DISTRICT COUNCIL ADMINISTRATIVE BOUNDARIES

## Acknowledgement

The National Bureau of Statistics and Office of the Chief Government Statistician, Zanzibar conducted the 2022 Population and Housing Census and the Tanzania Buildings Census to provide necessary information for policy implementation, planning, monitoring and evaluation of development processes. The Census collected detailed information on demographic characteristics, disabilities, migration, possession of national documents and orphanhood, education, economic activities, land ownership and information related to ICT ownership and use, fertility, mortality, housing ownership and assets, agriculture, community facilities and buildings. Some information on physical addresses was also collected.

The preparation of Council Population Projections Report 2023-2050 is part of the activities in the series of further analysis and production of reports based on the 2022 Population and Housing Census data. Urambo District Council Population Projections Report 2023-2050, estimates future population, providing the demographic changes that reflect the region's developmental challenges and opportunities.

We therefore express our appreciation to all experts who have put their time and efforts to produce this report. In particular we would like to thank Dr. Ruth Davison Minja, the Director of Population Census and Social Statistics NBS; Fahima Mohamed Issa, Director of Social Statistics, Census and Survey, (OCGS); Seif Ahmad Kuchengo, the National Census Coordinator; Abdul-majid Jecha Ramadhan, the Tanzania Zanzibar Census Coordinator, National Census Technical Team, Statisticians, Demographers, Information Technology and Geographic Information System officers for their commitment which led to successful completion of this report.

We also extend our appreciation to all professionals, regional and district supervisors, enumerators, and field supervisors, as well as the media, for their dedicated work. Certainly, the census would not have been successful without their commitment and dedication. We would also like to thank the public for their cooperation during the entire period of the Census.

**Dr. Amina Suleiman Msengwa**  
Statistician General  
National Bureau of Statistics

**Salum Kassim Ali**

Statistician, Zanzibar

## Executive Summary

Urambo District Council Population Projections Report presents population projections to the Ward level for the period of 2023 to 2050. In this report, ward-level population projections were derived using the projected council population as the control total. The base population for each ward was derived by adjusting the enumerated population through a proportional allocation method, which utilized both enumerated and adjusted council-level data. For each age group, disaggregated by sex, the proportion of the ward population relative to the council population was calculated.

This proportion was then applied to the adjusted council population for the corresponding age group to obtain the adjusted ward-level population. This approach assumes that the age distribution within each ward reflects that of the council. It enables sex- and age-specific disaggregation of population figures in contexts where direct ward-level adjustments are not available. The adjusted base population was subsequently used to project the ward-level population in line with the projected council-level population.

Population pyramids for Tabora Region and Urambo District Council as per the 2022 PHC have a broad base which indicates high fertility and a youthful age structure, with a large proportion of its population in the young and/or youthful ages. Conversely, a slightly narrower base is observed in 2050 population projections pyramids indicating declining fertility.

Report highlights projection results for selected age group. The projections show that population in Urambo District Council is fast growing shown by increasing number of people from 273,507 in 2023 to 562,281 in 2050. Population growth rate is projected to decrease from 3.2 percent in 2025 to 2.0 percent in 2050.

# CHAPTER ONE

## Introduction

### 1.0 Background

The 2022 Population and Housing Census was the sixth and the first digital census to be undertaken in Tanzania after the Union of Tanganyika and Zanzibar in 1964. Other post union censuses were carried out in 1967, 1978, 1988, 2002 and 2012. The 2022 PHC was carried out with the reference of midnight of the 22<sup>nd</sup>/23<sup>rd</sup> August 2022. The main objective of conducting the Census was to provide up-to-date and reliable data that are essential for the formulation of realistic development plans and making informed decisions for socio-economic development.

Population censuses are among the most important sources of demographic and socio-economic data in the country for preparation, monitoring and evaluation of social and economic development policies and programmes. The Census data with other information from administrative sources and surveys are of paramount importance for tracking the implementation of national, regional, continental and global development goals such as the Tanzania Third National Five-Year Development Plan 2021/22 - 2025/26 and Zanzibar Development Plan 2021/22 - 2025/26; the East African Community Vision 2050; the Southern African Development Community Vision 2050, the 2030 Sustainable Development Goals (SDGs) and Africa Agenda of 2063.

Between the 2022 PHC and the next census, there is a need for updated population information to provide the needed statistics to achieve those development goals. The National Bureau of Statistics and the Office of Chief Government Statistician, Zanzibar have computed population projections to offer insights into the future demographic dynamics, informing planners, policy makers, researchers and the public in general about potential changes. Population projections are computed estimates of future population sizes and structures based on the past and current situation of a population.

In this report, brief explanation of the methodology used to make projections is presented together with the projected population for the period of 2023 to 2050 at Councils and Ward levels. It is anticipated that projected numbers in this report will be used by data users for planning, as well as to monitor and evaluate progress made towards achieving national, regional and international development agenda.

Population can be projected by interpolation or extrapolation. If the desired date is between census dates, then an interpolation method is the desired one. Projected population is obtained by interpolating between the two censuses. Interpolation can be made using either the same cohort or the same age groups in the census.

Cohort interpolation is advisable if the age information is reliable. This technique is recommended if data is available by single years for populations that have actual and significant age fluctuations. In addition, information on annual intercensal births is needed for determining the number of persons born during the intercensal period (i.e. those who were only enumerated in the preceding census).

Interpolation, using the same age groups in each census, is frequently used in developing countries including Tanzania, since information on single years is unreliable and the age structure usually does not have actual fluctuations. The procedure is acceptable particularly when the interpolation date is close to the census date. The interpolation can be made either linearly or exponentially. If the desired date is close to the one for the census dates, both possibilities give similar results. However, if the interpolation date is several years from the census date, linear interpolation produces higher values than exponential interpolation. In most cases, the exponential interpolation is more suitable than the linear interpolation.

Another procedure for adjusting the population is to shift or move the population from a given date (for instance, a census date) to another date (for instance mid-year). If the total population for the desired date is available, extrapolation can be used. Another possibility is to use the levels of mortality, fertility and migration to estimate a population growth rate, and thereafter use the growth rate to calculate the total population at the desired date. Once the new total has been calculated, the age structure can be adjusted proportionately to the new total. The base population used for projections is based on extrapolated population taking into consideration the levels of mortality, fertility and migration.

Nevertheless, the most commonly used method for projecting populations is the cohort component method, which projects each age and sex cohort over time based on components of growth. Annual births create new cohorts, while existing cohorts are decreased by mortality and either increased or decreased by migration (US Census Bureau 2013). The cohort component method of population projection was used to project the

national and regional population in the United Republic of Tanzania, because it has an advantage over other methods.

In this report, ward-level population projections were derived using the projected council population as the control total. The base population for each ward was derived by adjusting the enumerated population through a proportional allocation method, which utilized both enumerated and adjusted council-level data. For each age group, disaggregated by sex, the proportion of the ward population relative to the council population was calculated. This proportion was then applied to the adjusted council population for the corresponding age group to obtain the adjusted ward-level population. This approach assumes that the age distribution within each ward reflects that of the council. It enables sex- and age-specific disaggregation of population figures in contexts where direct ward-level adjustments are not available. The adjusted base population was subsequently used to project the ward-level population in line with the projected council-level population.

### 1.1 The 2022 Population Census Data and Population Projections (done)

Urambo District Council population features the same structure as that of national population with large proportional of children compared to adults. This young population structure indicates the need for strategic regional planning on harnessing demographic dividend. The projections show that population in Urambo District Council is fast growing shown by increasing number of people from 273,507 in 2023 to 562,281 in 2050 (Figure 1.1).

**Figure 1.1: Projected Population Trends; Urambo District Council, 2023 – 2050**

Figure 1.2 shows that the annual average population growth rate for Urambo District Council increased from 3.0 percent during 2012-2022 intercensal period to 3.2 percent in 2022-2025, and it is projected to gradually decline to 2.0 percent by 2050.

**Figure 1.2: Average Annual Inter-Censal Population Growth Rates; Urambo District Council, 2022–2050**

**Note:** \* Projected Population Growth Rates

## 1.2 Age-Sex Structure of the Population

As shown in Figures 1.3, Tabora Region as most of the Regions in Tanzania has a very young population as a result of high birth rates over a long period of time. This is evident in the population pyramid which is a graphical representation of the age and sex composition of a specific population. It provides a snapshot of the population's age and sex structure. It also provides useful insights into the patterns of vital events (birth and death rates).

The pyramids for Urambo District Council per the 2022 PHC (Figures 1.4) has a broad base indicative of high fertility and a youthful age structure, that is with a large proportion of its population in the young and/or youthful ages. It creates a high child dependency ratio that places a heavy burden on the working age population and constrains the provision of basic needs and social services. However, this demographic structure suggests a significant working-age population, which can be beneficial for economic growth if effectively harnessed. By 2050, the population pyramid of Urambo District Council will continue to

reflect a relatively young population, though it will be gradually aging as birth rates decline and life expectancy increases.

**Figure 1. 3: Projected Population Pyramid for Five Year Age Groups; Tabora Region, 2022 and 2050**

**Figure 1. 4: Projected Population Pyramid for Five Year Age Groups; Urambo District Council, 2022 and 2050**

### 1.3 Importance of Demographic Projections

Population projection is an important undertaking since it facilitates the Government as well as researchers in making decisions about the future. Policymakers and program planners

rely on population projections to assess future demand for resources such as food, water and energy, as well as services such as health and education.

Examples of possible use of results from population projections include:

- i. Estimating demand for basic human needs, such as food, water, power, transportations;
- ii. Planning for the construction of housing, highways etc.;
- iii. Estimating the labour forces in various places;
- iv. Estimating the potential consumption of goods and services in various regions; and
- v. Facilitating sociological research, such as providing data on sex or age ratio.

Population projections constitute a tool for providing demographic information about the present as well as the future at national and sub-national levels that is not available from censuses and surveys reports. Population projections also estimate the probable size and structure as well as population characteristics beyond the most recent census year. Further, they provide an indication of likely changes in the future size and age-sex structure of the population including school age population. Population projections are used as the denominator for many health indicators such as fertility and mortality rate.

## CHAPTER TWO

### Projections

#### 2.0 Introduction

The chapter presents brief discussion and summary of selected age group for the entire projection period of 2023 to 2050 for Urambo District Council and its Wards.

#### 2.1 Population Growth

Projection results show a decline in annual average population growth rates. Population growth rate for Tabora Region is expected to decrease from 3.4 percent in 2023 to 2.0 percent in 2050 (Figure 2.1). Over the same period, the population of Urambo District Council is projected to increase from 273,507 to 562,281 persons (Tables 2.1).

**Figure 2. 1: Projected Population Growth Rates; Urambo District Council, 2023 – 2050**

#### Age Dependency Ratio

The age dependency ratio is a proxy measure for economic dependence. Age dependency ratio in Urambo District Council is expected to decrease from 113 dependants for every 100 working age persons in 2023 to 69 dependants for every 100 persons of working age in 2050 (Figure 2.2).

**Figure 2. 2: Projected Age Dependency Ratios; Urambo District Council, 2023 – 2050**

## 2.2 Urambo District Council Population Projections Results

This section presents population projections for Urambo District Council from 2023 to 2050. The projection disaggregated by sex. The projection results are presented in Table 2.1.

**Table 2. 1: Projected Population by Sex; Urambo District Council, 2023-2050**

| Year | Total      |         |         |
|------|------------|---------|---------|
|      | Both Sexes | Male    | Female  |
| 2023 | 273,507    | 134,550 | 138,957 |
| 2024 | 282,262    | 138,899 | 143,363 |
| 2025 | 291,439    | 143,471 | 147,968 |
| 2026 | 300,715    | 148,039 | 152,676 |
| 2027 | 309,997    | 152,666 | 157,331 |
| 2028 | 319,755    | 157,433 | 162,322 |
| 2029 | 329,727    | 162,334 | 167,393 |
| 2030 | 339,466    | 167,193 | 172,273 |
| 2031 | 349,958    | 172,301 | 177,657 |
| 2032 | 359,783    | 177,230 | 182,553 |
| 2033 | 370,783    | 182,575 | 188,208 |
| 2034 | 381,323    | 187,768 | 193,555 |
| 2035 | 392,308    | 193,215 | 199,093 |
| 2036 | 403,364    | 198,638 | 204,726 |
| 2037 | 414,183    | 203,990 | 210,193 |
| 2038 | 425,534    | 209,544 | 215,990 |
| 2039 | 436,921    | 215,059 | 221,862 |
| 2040 | 447,937    | 220,551 | 227,386 |
| 2041 | 459,727    | 226,301 | 233,426 |
| 2042 | 470,566    | 231,762 | 238,804 |
| 2043 | 482,377    | 237,501 | 244,876 |
| 2044 | 493,734    | 243,115 | 250,619 |
| 2045 | 505,249    | 248,808 | 256,441 |
| 2046 | 516,844    | 254,513 | 262,331 |
| 2047 | 527,934    | 260,044 | 267,890 |
| 2048 | 539,498    | 265,748 | 273,750 |
| 2049 | 551,043    | 271,402 | 279,641 |
| 2050 | 562,281    | 276,986 | 285,295 |

## 2.3 Ward Population Projection Results

This section presents population projections for all wards of Tabora District Council from 2023 to 2050. The projection disaggregated by sex. The projection results are presented in Table 2.2 to Table 2.15.

**Table 2. 2: Projected Population by Ward and Sex; Kapilula, Urambo and Vumilia Wards, 2023-2050**

| Year | Kapilula   |       |        | Urambo     |        |        | Vumilia    |        |        |
|------|------------|-------|--------|------------|--------|--------|------------|--------|--------|
|      | Both Sexes | Male  | Female | Both Sexes | Male   | Female | Both Sexes | Male   | Female |
| 2023 | 6,106      | 2,886 | 3,220  | 25,566     | 12,141 | 13,425 | 12,189     | 6,044  | 6,145  |
| 2024 | 6,298      | 2,973 | 3,325  | 26,400     | 12,534 | 13,866 | 12,554     | 6,224  | 6,330  |
| 2025 | 6,512      | 3,079 | 3,433  | 27,324     | 12,961 | 14,363 | 12,975     | 6,440  | 6,535  |
| 2026 | 6,715      | 3,167 | 3,548  | 28,235     | 13,407 | 14,828 | 13,375     | 6,637  | 6,738  |
| 2027 | 6,912      | 3,258 | 3,654  | 29,172     | 13,850 | 15,322 | 13,795     | 6,854  | 6,941  |
| 2028 | 7,136      | 3,364 | 3,772  | 30,117     | 14,299 | 15,818 | 14,206     | 7,066  | 7,140  |
| 2029 | 7,358      | 3,464 | 3,894  | 31,138     | 14,795 | 16,343 | 14,667     | 7,294  | 7,373  |
| 2030 | 7,556      | 3,564 | 3,992  | 32,066     | 15,230 | 16,836 | 15,090     | 7,508  | 7,582  |
| 2031 | 7,817      | 3,684 | 4,133  | 33,145     | 15,748 | 17,397 | 15,571     | 7,737  | 7,834  |
| 2032 | 8,011      | 3,775 | 4,236  | 34,104     | 16,203 | 17,901 | 15,986     | 7,948  | 8,038  |
