PRESS RELEASE

NATIONAL CONSUMER PRICE INDEX (NCPI) FOR JUNE, 2026

1. METHODOLOGICAL NOTE

1.1 Definition

The NCPI measures changes over time in the cost of a fixed basket of goods and services purchased by a representative sample of households in Tanzania. The current NCPI basket contains 383 goods and services, comprising 132 food and non-alcoholic beverage items and 251 non-food items. With respect to geographical coverage, the NCPI uses price data collected from all 26 regional headquarters on the Tanzanian mainland.

1.2 Weights and a Reference Period

The NCPI weights are based on household monetary expenditure data from all 26 mainland regions, covering both urban and rural households. These weights are derived from the 2017/18 Household Budget Survey. The base price reference period is the average from January to December 2020, and the index reference period is the year 2020.

1.3 Classification

The NCPI follows the United Nations *Classification of Individual Consumption by Purpose* (COICOP), 2018 version, and is disseminated using 13 COICOP divisions. In addition, the rebased NCPI is published alongside several supplementary index aggregations, including: Core Index; Energy, Fuel and Utilities Index; Non-Core Index; Services Index; Goods Index; Education Services and Products Ancillary to Education Index; and All Items Less Food and Non-Alcoholic Beverages Index.

1.4 Elementary and Higher-Level Indices

The NCPI is compiled using the geometric mean of price relatives for elementary index aggregates and higher-level aggregates are compiled using Lowe Index formula, a type of Laspeyres index.

2.1 Headline Inflation Rate

The Headline Inflation Rate measures the overall inflation when all items in the fixed CPI basket are included. Table 1 shows that the annual Headline Inflation Rate for June 2026 has decreased to 4.0 percent from 4.2 percent recorded in May 2026. This decrease indicates that the pace of price changes for commodities in the year ending June 2026 has decreased compared to the price in the year ended May 2026. The overall index increased from 120.18 in June 2025 to 125.04 in June 2026.

2.2 Food and Non-Alcoholic Beverages Inflation Rates

Food and Non-Alcoholic Beverages Inflation Rate for June 2026 has decreased to 4.1 percent from 5.6 percent that was recorded in May 2026. Furthermore, inflation rate for all items excluding food and non-alcoholic beverages for June 2026 has increased to 4.0 percent from 3.6 percent recorded in May 2026.

2.3 Core Inflation Rates

The Core Index excludes items with volatile prices, namely unprocessed food, energy, and utilities with the exception of maize flour. By excluding these volatile items from the overall NCPI, policymakers obtain a more stable measure of inflation. The Core Index covers 297 items, representing 73.9 percent of the total NCPI weight. In June 2026, Core Inflation Rate has increased to 3.7 percent from 3.4 percent that was recorded in May 2026.

Chart 1: Movement of National Consumer Price Indices (NCPI) and Inflation Rates from June, 2025 – June, 2026. (2020 = 100)

Chart 1 shows that the National Consumer Price Index (NCPI) recorded a gradual upward trend between June 2025 and June 2026, increasing from 120.18 to 125.04. During the same period, the Annual Headline Inflation Rate remained relatively stable, fluctuating between 3.2 percent and 4.2 percent, before easing to 4.0 percent in June 2026. The steady increase in the NCPI indicates a gradual rise in the overall price level, while the inflation rate remained within a moderate range throughout the period.

3. MONTHLY CONSUMER PRICE INDEX BETWEEN MAY 2026 AND JUNE, 2026

Between May 2026 and June 2026, the National Consumer Price Index increased from 124.90 to 125.04. This increase in the overall index is mainly attributed to the increase of prices for some food and non-food items. Food items contributing to an increase include: sorghum grains (by 5.1%); wheat flour (by 1.3%); sorghum flour (by 4.5%); pasta products (by 0.2%); poultry live (by 3.7%); meat of poultry (by 0.1%); fresh fish (by 2.7%); dried sardines (by 3.5%); raw milk of cattle (by 0.3%); irish/round potatoes (by 0.7%); fresh cassava (by 2.9%); dried lentils (by 3.8%); dried peas (by 3.6%); dried cowpeas (by 0.3%); flour of cassava (by 1.9%); bottled drinking water (by 0.6%) and soft drinks (by 1.7%). Non-food items contributing to an increase of the overall index include: clothing materials (by 1.1%); footwear for men (by 0.1%); footwear for women (by 0.2%); footwear for children (by 0.3%); actual rentals paid by tenants (by 0.2%); products and materials for maintenance of the dwelling (by 1.0%); gas (by 4.3%); kerosene (by 4.5%); charcoal (by 3.0%); diesel (by 2.6%); bus fare (by 3.1%); taxi fare (by 2.6%) and motorcycles/ bodaboda fare (by 7.6%).
