

The 2025 TGES Additional Tables

44 tables, with a table of contents

National Bureau of Statistics, Tanzania

Statistics for Development

Table of Contents

No.	Title	Page
1	Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex	4
2	Proportion of population using safely managed drinking water services, by sex	4
3	Proportion of population with access to electricity, by sex	4
4	Proportion of population using safely managed sanitation services	4
5	Proportion of population using a hand-washing facility with soap and water, by sex	5
6	Proportion of population living in households where sanitation facilities are poorly illuminated, lack a lock, or are shared with other households	5
7	Proportion of population whose dwelling unit or land is located in high environmental-risk areas, by sex and location	5
8	Proportion of population living in households with basic electronics for access to early warning information, by sex and location	5
9	Proportion of population living in households whose off-grid electricity uses renewable energy, by sex and location	6
10	Proportion of population with primary reliance on clean fuels and technologies, by sex	6
11	Proportion of households where women and girls are in charge of cooking, by type of fuel (clean/unclean)	6
12	Proportion of households where women and girls are in charge of gathering cooking fuel, by time to source	6
13	Proportion of population exposed to hazards in the past 12 months who were able to access and understand early warning information, by sex	7
14	Proportion of population exposed to hazards in the past 12 months who were able to access and understand early warning information, by location	7
15	Proportion of population exposed to hazards in the past 12 months whose time spent on unpaid care work by Sex	7
16	Proportion of population exposed to hazards in the past 12 months whose time spent on domestic work increased as a result, by sex	8
17	Proportion of population exposed to hazards in the past 12 months whose time spent on water collection increased, by sex	8
18	Proportion of population exposed to hazards in the past 12 months whose water source was damaged or subject to shortages, by sex of the person in charge of water collection	8
19	Proportion of population exposed to hazards in the past 12 months who had to switch to unclean fuels for cooking, heating or lighting, by sex of the person in charge of cooking	9
20	Proportion of population exposed to hazards in the past 12 months whose time spent on fuel and firewood collection increased as a result, by sex	9
21	Proportion of population exposed to hazards in the past 12 months who had to switch to unimproved sanitation by sex	9
22	Proportion of population exposed to hazards in the past 12 months who had to start sharing sanitation facilities as a result, by sex	10
23	Proportion population exposed to hazards in the past 12 months who encountered barriers to (a) accessing medical care by sex	10
24	Proportion population exposed to hazards in the past 12 months who encountered barriers to accessing hygiene products as a result, by sex	10
25	Proportion population exposed to hazards in the past 12 months who encountered barriers to accessing hygiene products as a result, by Location	11

No.	Title	Page
26	Proportion of population exposed to hazards in the past 12 months who lost access to public transportation as a result, by sex	11
27	Proportion of population exposed to hazards in the past 12 months who lost access to public transportation as a result, and location	11
28	Proportion of population exposed to hazards in the past 12 months whose mental health was affected as a result, by sex	12
29	Proportion of population exposed to hazards in the past 12 months whose physical was affected as a result, by sex	12
30	Proportion of population exposed to hazards in the past 12 months who noted that crime or violence have worsened as a result, by sex	12
31	Proportion of population exposed to hazards in the past 12 months who noted that crime or violence have worsened as a result, by sex and crime	13
32	Proportion of population exposed to hazards in the past 12 months who noted that crime or violence have worsened as a result, by sex	13
33	Proportion of population exposed to hazards in the past 12 months whose crops or livestock were damaged or destroyed, by sex	13
34	Proportion of population exposed to hazards in the past 12 months whose crops or livestock were damaged or destroyed, by sex and whether this was main source of income	14
35	Proportion of population who experienced displacement or moved to a different area as a result of climate change, by sex	14
36	Proportion of population exposed to hazards in the past 12 months who experienced temporary or permanent displacement as a result, by sex	14
37	Proportion of population engaged in decision-making groups on disaster/hazard response, out of total population by sex	15
38	Number of deaths, missing persons and directly affected persons attributed to disasters (missing, death, injury, illness, displacement, damage to livelihoods, damage to assets) per 100,000 population, by sex	15
39	Number of people whose damaged or destroyed dwellings were attributed to disasters, per 100,000, by sex	15
40	Number of people whose livelihoods were disrupted or destroyed, attributed to disasters, per 100,000 people, by sex	16
41	Proportion of population with access to information on the effects of climate change, by sex	16
42	Proportion of population whose personal income decreased as a result of climate-related hazards experienced in the past 12 months, by sex	16
43	Proportion of population who decreased food intake as a result of climate change, by sex	16
44	Proportion of land or livestock users who attributed their increased use of pesticides or antibiotics to the effects of climate change, by sex	17

How to read the tables: the bar under each value shows its share on a 0–100 scale (light grey for “No”, dark grey for “Yes”). Tables 38 and 39 report counts, so they have no bars.

TABLE 1

Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex

Ownership or secure rights over agricultural land	Sex	
	Female	Male
No	56.3	35.5
Yes	43.7	64.5

TABLE 2

Proportion of population using safely managed drinking water services, by sex

Using safely managed drinking water services	Sex	
	Female	Male
No	98.2	98.1
Yes	1.8	1.9

TABLE 3

Proportion of population with access to electricity, by sex

Access to Electricity	Sex	
	Female	Male
No	1.4	1.3
Yes	98.6	98.7

TABLE 4

Proportion of population using safely managed sanitation services

Using safely managed sanitation services	Sex	
	Female	Male
No	12.8	10.3
Yes	87.2	89.7

TABLE 5

Proportion of population using a hand-washing facility with soap and water, by sex

Population using a hand-washing facility with soap and water	Sex	
	Female	Male
No	99.9	99.9
Yes	0.1	0.1

TABLE 6

Proportion of population living in households where sanitation facilities are poorly illuminated, lack a lock, or are shared with other households

Proportion of population living in households where sanitation facilities are poorly illuminated, lack a lock, or are shared with other households	Sex	
	Male	Female
No	97.4	97.3
Yes	2.6	2.7

TABLE 7

Proportion of population whose dwelling unit or land is located in high environmental-risk areas, by sex and location

Proportion of population whose dwelling unit or land is located in high environmental-risk areas	Male		Female	
	Rural	Urban	Rural	Urban
No	48.0	55.3	52.0	56.0
Yes	52.0	44.7	48.0	44.0

TABLE 8

Proportion of population living in households with basic electronics for access to early warning information, by sex and location

Proportion of population living in households with basic electronics for access to early warning information	Male		Female	
	Rural	Urban	Rural	Urban
No	82.8	85.8	86.0	89.5
Yes	17.2	14.2	14.0	10.5

TABLE 9

Proportion of population living in households whose off-grid electricity uses renewable energy, by sex and location

Proportion of population living in households whose off-grid electricity uses renewable energy	Male		Female	
	Rural	Urban	Rural	Urban
No	0.0	0.2	0.0	0.2
Yes	100.0	99.8	100.0	99.8

TABLE 10

Proportion of population with primary reliance on clean fuels and technologies, by sex

Proportion of population with primary reliance on clean fuels and technologies	Sex	
	Female	Male
No	21.3	21.9
Yes	78.7	78.1

TABLE 11

Proportion of households where women and girls are in charge of cooking, by type of fuel (clean/unclean)

Proportion of households where women and girls are in charge of cooking	Energy Use	
	Clean	Unclean
No	13.1	6.7
Yes	86.9	93.3

TABLE 12

Proportion of households where women and girls are in charge of gathering cooking fuel, by time to source

Proportion of households where women and girls are in charge of gathering cooking fuel	15–29 mins	30–44 mins	45–59 mins	60 mins	15 mins
No	24.4	12.8	8.2	9.6	17.2
Yes	75.6	87.2	91.8	90.4	82.8

TABLE 13

Proportion of population exposed to hazards in the past 12 months who were able to access and understand early warning information, by sex

Proportion of population exposed to hazards in the past 12 months who were able to access and understand early warning information	Sex	
	Male	Female
No	79.6	84.3
Yes	20.4	15.7

TABLE 14

Proportion of population exposed to hazards in the past 12 months who were able to access and understand early warning information, by location

Proportion of population exposed to hazards in the past 12 months who were able to access and understand early warning information	Male		Urban	
	Rural	Urban	Rural	Urban
No	75.4	81.3	82.4	85.4
Yes	24.6	18.7	17.6	14.6

TABLE 15

Proportion of population exposed to hazards in the past 12 months whose time spent on unpaid care work by Sex

Proportion of population exposed to hazards in the past 12 months whose time spent on unpaid care work	Male	Female
No	87.7	85.7
Yes	12.3	14.3

TABLE 16

Proportion of population exposed to hazards in the past 12 months whose time spent on domestic work increased as a result, by sex

Proportion of population exposed to hazards in the past 12 months whose time spent on domestic work increased	Male	Female
No	83.4	83.4
Yes	16.6	16.6

TABLE 17

Proportion of population exposed to hazards in the past 12 months whose time spent on water collection increased, by sex

Proportion of population exposed to hazards in the past 12 months whose time spent on water collection increased	Male	Female
No	74.6	77.4
Yes	25.4	22.6

TABLE 18

Proportion of population exposed to hazards in the past 12 months whose water source was damaged or subject to shortages, by sex of the person in charge of water collection

Proportion of population exposed to hazards in the past 12 months whose water source was damaged or subject to shortages	Sex	
	Male	Female
No	74.4	77.5
Yes	25.6	22.5

TABLE 19

Proportion of population exposed to hazards in the past 12 months who had to switch to unclean fuels for cooking, heating or lighting, by sex of the person in charge of cooking

Proportion of population exposed to hazards in the past 12 months who had to switch to unclean fuels for cooking, heating or lighting	Sex	
	Male	Female
No	86.3	85.9
Yes	13.7	14.1

TABLE 20

Proportion of population exposed to hazards in the past 12 months whose time spent on fuel and firewood collection increased as a result, by sex

Proportion of population exposed to hazards in the past 12 months whose time spent on fuel and firewood collection increased	Sex	
	Male	Female
No	88.0	87.1
Yes	12.0	12.9

TABLE 21

Proportion of population exposed to hazards in the past 12 months who had to switch to unimproved sanitation by sex

Proportion of population exposed to hazards in the past 12 months who had to switch to unimproved sanitation	Sex	
	Male	Female
No	94.8	95.3
Yes	5.2	4.7

TABLE 22

Proportion of population exposed to hazards in the past 12 months who had to start sharing sanitation facilities as a result, by sex

Proportion of population exposed to hazards in the past 12 months who had to start sharing sanitation facilities	Sex	
	Male	Female
No	94.6	94.6
Yes	5.4	5.4

TABLE 23

Proportion population exposed to hazards in the past 12 months who encountered barriers to (a) accessing medical care by sex

Proportion population exposed to hazards in the past 12 months who encountered barriers to (a) accessing medical care	Sex	
	Male	Female
No	89.9	91.5
Yes	10.1	8.5

TABLE 24

Proportion population exposed to hazards in the past 12 months who encountered barriers to accessing hygiene products as a result, by sex

Proportion population exposed to hazards in the past 12 months who encountered barriers to accessing hygiene products	Sex	
	Male	Female
No	97.0	98.3
Yes	3.0	1.7

TABLE 25

Proportion population exposed to hazards in the past 12 months who encountered barriers to accessing hygiene products as a result, by Location

Proportion population exposed to hazards in the past 12 months who encountered barriers to accessing hygiene products	Male		Female	
	Rural		Rural	
No	99.1	96.1	98.6	97.9
Yes	0.9	3.9	1.4	2.1

TABLE 26

Proportion of population exposed to hazards in the past 12 months who lost access to public transportation as a result, by sex

Proportion of population exposed to hazards in the past 12 months who lost access to public transportation	Sex	
	Male	Female
No	96.5	97.5
Yes	3.5	2.5

TABLE 27

Proportion of population exposed to hazards in the past 12 months who lost access to public transportation as a result, and location

Proportion of population exposed to hazards in the past 12 months who lost access to public transportation	Male		Female	
	Rural	Urban	Rural	Urban
No	97.7	96.1	98.4	97.0
Yes	2.3	3.9	1.6	3.0

TABLE 28

Proportion of population exposed to hazards in the past 12 months whose mental health was affected as a result, by sex

Proportion of population exposed to hazards in the past 12 months whose mental health was affected	Sex	
	Male	Female
No	62.3	67.6
Yes	37.7	32.4

TABLE 29

Proportion of population exposed to hazards in the past 12 months whose physical was affected as a result, by sex

Proportion of population exposed to hazards in the past 12 months whose physical was affected	Sex	
	Male	Female
No	85.5	86.7
Yes	14.5	13.3

TABLE 30

Proportion of population exposed to hazards in the past 12 months who noted that crime or violence have worsened as a result, by sex

Proportion of population exposed to hazards in the past 12 months who noted that crime or violence have worsened	Sex	
	Male	Female
No	86.8	88.9
Yes	13.2	11.1

TABLE 31

Proportion of population exposed to hazards in the past 12 months who noted that crime or violence have worsened as a result, by sex and crime

Proportion of population exposed to hazards in the past 12 months who noted that crime or violence have worsened	Sex	
	Male	Female
No	92.4	94.3
Yes	7.6	5.7

TABLE 32

Proportion of population exposed to hazards in the past 12 months who noted that crime or violence have worsened as a result, by sex

Proportion of population exposed to hazards in the past 12 months who noted that crime or violence have worsened	Sex	
	Male	Female
No	91.1	92.7
Yes	8.9	7.3

TABLE 33

Proportion of population exposed to hazards in the past 12 months whose crops or livestock were damaged or destroyed, by sex

Proportion of population exposed to hazards in the past 12 months whose crops or livestock were damaged or destroyed	Sex	
	Male	Female
No	39.9	41.8
Yes	60.1	58.2

TABLE 34

Proportion of population exposed to hazards in the past 12 months whose crops or livestock were damaged or destroyed, by sex and whether this was main source of income

Proportion of population exposed to hazards in the past 12 months whose crops or livestock were damaged or destroyed	Male		Female	
	Main source	Not Main source	Main source	Not Main source
No	30.7 	30.0 	27.7 	30.0
Yes	69.3 	70.0 	72.3 	70.0

TABLE 35

Proportion of population who experienced displacement or moved to a different area as a result of climate change, by sex

Proportion of population who experienced displacement or moved to a different area as a result of climate change	Sex	
	Male	Female
No	97.1 	98.4
Yes	2.9 	1.6

TABLE 36

Proportion of population exposed to hazards in the past 12 months who experienced temporary or permanent displacement as a result, by sex

Proportion of population exposed to hazards in the past 12 months who experienced temporary or permanent displacement	Sex	
	Male	Female
No	96.9 	97.1
Yes	3.1 	2.9

TABLE 37

Proportion of population engaged in decision-making groups on disaster/hazard response, out of total population by sex

Proportion of population engaged in decision-making groups on disaster/hazard response, out of total population	Sex	
	Male	Female
No	96.4	98.9
Yes	3.6	1.1

TABLE 38

Number of deaths, missing persons and directly affected persons attributed to disasters (missing, death, injury, illness, displacement, damage to livelihoods, damage to assets) per 100,000 population, by sex

Disaster	Sex	
	Male	Female
No	2,202,902	3,855,208
Yes	14,489,328	20,237,808

TABLE 39

Number of people whose damaged or destroyed dwellings were attributed to disasters, per 100,000, by sex

Dwelling	Sex	
	Male	Female
No	4,957,357	7,758,029
Yes	895,300	1,237,564

TABLE 40

Number of people whose livelihoods were disrupted or destroyed, attributed to disasters, per 100,000 people, by sex

Livelihoods were disrupted or destroyed	Sex	
	Male	Female
No	37.1	38.3
Yes	62.9	61.7

TABLE 41

Proportion of population with access to information on the effects of climate change, by sex

Proportion of population with access to information on the effects of climate change	Sex	
	Male	Female
No	84.8	86.3
Yes	15.2	13.7

TABLE 42

Proportion of population whose personal income decreased as a result of climate-related hazards experienced in the past 12 months, by sex

Proportion of population whose personal income decreased as a result of climate-related hazards experienced in the past 12 months	Sex	
	Male	Female
No	48.0	56.1
Yes	52.0	43.9

TABLE 43

Proportion of population who decreased food intake as a result of climate change, by sex

Proportion of population who decreased food intake as a result of climate change	Sex	
	Male	Female
No	70.1	72.8
Yes	29.9	27.2

TABLE 44

Proportion of land or livestock users who attributed their increased use of pesticides or antibiotics to the effects of climate change, by sex

Proportion of land or livestock users who attributed their increased use of pesticides or antibiotics to the effects of climate change	Sex	
	Male	Female
No	74.6	81.2
Yes	25.4	18.8
