## **ACKNOWLEDGEMENTS**

This statistical report shows the performance of industrial sector based on an industrial survey that was undertaken jointly by the Ministry of Industry, Trade and Marketing (MITM); the National Bureau of Statistics (NBS); and the Confederation of Tanzania Industries (CTI). The report is being issued together with the Analytical Report. The statistics presented reflect the contribution of the industrial sector to the economy.

The Survey Executive Committee was comprised of Ms. Joyce K.G Mapunjo, the Permanent Secretary, MITM; Dr. Albina A. Chuwa, the Director General, NBS; and Ms. Christine Kilindu, the Executive Director, CTI.

The survey management team was comprised of Ms. E.S. Sikazwe, Director of Industry Development, MITM; Mr. M. Oyuke, Director of Economic Statistics Directorate, NBS; and Mr. H. Kamote, Director of Policy, CTI. Others were Eng. E.N Pallangyo, Assistant Director Industrial Research and Investment Section, MITM; Eng. P.B Marwa, Assistant Director Industrial Support and Promotion Section, MITM; Mr. S. Mbaruku, the former Director of Economic Statistics Directorate, NBS; and Ms. J. Sawe, Industrial and Construction Statistics Manager, NBS.

The core field research team was composed of Mr. F. Khalfani, Mr. A.M. Mnyenyelwa, Mr. J. K Mwambeso, Ms. M. Warioba, Ms. A. V. Kamara, Ms. Veronica C. Mwangoka, Mr. G. Mockray, Mr. E. D. Kitundu. Other members of the Survey Team from MITM, NBS, and CTI included Mr. W. Ndossi, Ms. M. Ikongwe, Ms. N. Ngali, Mr. G. Mrimi, Ms. N. Mjema, Ms. S. Lugongo, Ms. F. Zimamoto and Mr. G. Mackanja for their tireless efforts and great contributions at different stages of the survey, we say thank you.

Management team is indebted to a number of institutions and people who supported it in many ways while carrying out the industrial performance survey. The inputs of representatives of the private sector like Tanzania Chamber of Commerce, Industry and Agriculture (TCCIA); the individual investors and industrial entrepreneurs, have ensured that the findings in this report reflect the realities on the ground.

We are also grateful to the Ministry of Finance and Economic Affairs, Planning Commission and the Prime Ministers' Office through Regional Administration and Local Government Authorities in all the twenty one (21) regions on Tanzania Mainland where this survey was undertaken. We highly appreciate the invaluable support from the Regional Commissioners, Regional Administrative Secretaries, District Commissioners, Regional Statistical Officers, Regional and District Trade Officers for their assistance and facilitation in many ways while undertaking the survey. We also thank the Tanzania Investment Centre (TIC) and the Bank of Tanzania for their invaluable inputs and contributions to this report.

Likewise we extend special thanks to UNIDO ("Delivering as *One UN* ") for the assistance to improve the Industrial Statistical System in Tanzania Mainland, Dr. Haji Semboja, *UDSM (National expert in this survey)*, Mr. G. G. Mshana (*National consultant in this survey*), Mr. Yoshiyasu Mizuno (*Industrial expert at MITM*), Mr. E. Mhede and Mr. F. Roman for their valuable comments and inputs on the drafts of this report.

Dr. Albina A. Chuwa  
Director General, National Bureau of Statistics  
September, 2010

## **TANZANIA MAINLAND PROFILES**

Tanzania lies just south of the equator between the great lakes of Victoria, Tanganyika and Nyasa on one hand and the Indian Ocean on the other. Tanzania has frontiers with eight countries and including 60,000 square kilometres of inland water has a total area of 945,000 square kilometres. This is about the same size as Nigeria and little smaller than France and Spain combined. Except for a narrow belt along the 900 kilometres coast, most of its land lies above 200m. altitude, and much of the country is higher than 1,000 metres, above sea level. In the north Mt. Kilimanjaro, with a permanent ice cap, rises to over 5,500 metres, with the highest peak Kibo reaching 5,895 metres. While this is the highest point in Africa the lowest point is to be found somewhere along the floor of lake Tanganyika.

A distinctive feature of Tanzania is the rift valley whose form is marked in many places by long, narrow and deep depressions often filled with lakes. The great Rift Valley runs from near the mouth of the Zambezi River northward through Tanzania, Kenya, Ethiopia and across the Red Sea to Israel. Lake Tanganyika lies in the Western rift, which continues northwards through Lake Kivu.

The rivers flow into the India Ocean or the Great Lakes. However, most of them cease flowing during the dry season, and only the Rufiji, entering the Indian Ocean opposite Mafia Island and the Kagera, flowing into Lake Victoria, are navigable by anything larger than a canoe.

Lake Tanganyika drains into the Congo River system hence into the Atlantic Ocean. Lake Nyasa waters reach the Zambezi, hence the Indian Ocean. Lake Victoria, which differs from other major lakes of Tanzania in that it has been formed by a gentle down-warping of the earth's crust in a shallow subsidence, drains into the Nile, hence into the Mediterranean Sea.

Woodland, bush land and wooden grasslands, are the predominant types of vegetation. The main climatic feature is the long dry spell from May to October, followed by a period of low rainfall, which is often concentrated into relatively few days of heavy showers.

The main rainy season on the coast is from March to May but there is a second season from October to December; total rainfall increases towards the north. Around Lake Victoria rainfall is well distributed throughout the year but there is a peak during March to May.

***Source: National Bureau of Statistics – Tanzania in Figure***

## **EXECUTIVE SUMMARY**

In 2008, the number of large industrial establishments operating on Tanzania Mainland was 729. The highest concentration of these establishments was in Dar es Salaam (383) followed by Arusha (51), Mwanza (39), Singida (27), Tanga (27), Kagera (26) and Kilimanjaro (24).

Of the total establishments, 643 were privately owned while 72 were publicly owned and 14 in the remaining establishments were mixed. The industrial establishments that were owned by nationals were 549 and establishments reported to be wholly foreign-owned were 121 while 59 establishments were joint ventures

Out of the 729 industrial establishments in 2008, the majority (680 or 93 percent) were in the manufacturing sector.

The total number of persons engaged in the 729 industrial establishments was 117,622 of whom 107,388 were in manufacturing. Establishments in Dar es Salaam employed the largest number of workers at 34,554 (29 percent) persons of whom 31,713 were in manufacturing.

The 643 private establishments employed a total of 103,237 workers compared to 12,394 in 72 public establishments.

Establishments which were owned by nationals employed 53,950 compared to 42,192 persons that were in foreign owned establishments. The jointly owned establishments had 21,515 workers.

The 729 of the industrial establishments paid a total of Tsh. 435,744 million as compensations to their employees.

The gross output or total value of goods and services produced by the industrial establishments amounted to Tsh. 5,859,862 million in 2008. Sales of goods amounted to Tsh. 5,739,361 million of which 14 percent or Tsh. 807,636 million were exports comprised mainly by food products. Receipt from services amounted to only Tsh. 38,519 million.

The total cost of production, i.e. intermediate consumption amounted to Tsh. 3,735,398 million of which Tsh. 2,820,556 million represented the cost of raw materials purchased.

An analysis of value added by industry group shows that nearly 84 percent of total value added (or Tsh. 1,797,383 million) was from industrial establishments in 2008 came from the "Manufacturing" sub-sector.

## **1.0 OVERVIEW**

### **1.1 Introduction**

Tanzania Mainland with an area of 945,000 square kilometres lies south of the equator and had an estimated population of around 38.3 million people in 2007. The economy, which grew by 7.1% in 2007 compared to 6.7% the previous year, is heavily dependent on agriculture. However, tourism is one of the dynamic sectors with significant growth in recent years. The industrial sector which comprises Mining/Quarrying, Manufacturing and Electricity, Gas and Water supply contributes an estimated 13.3% of GDP and is dominated by “food processing”, “beverages and tobacco”, “manufacture of non-metallic products” and “manufacture of chemicals”. However, it has the potential to contribute substantially towards employment creation, exports, revenue generation and economic growth. In the short and medium term, it is considered as the engine of growth which can transform the economy from a low productivity agricultural one to a highly productive industrialized one. Promotion of industrialization is enshrined in the Tanzania Development Vision (TDV) 2025 and the National Strategy for Growth and Reduction of Poverty (NSGRP).

In order to monitor the sector correctly, more information need to be collected and analyzed for use in planning and other purposes. One of the objectives of the government is to upgrade and modernize the approach to data collection, processing and dissemination of reliable statistics.

UNIDO has provided assistance to improve the Industrial Statistical System in Tanzania Mainland in order to provide coherent, relevant, timely and reliable industrial statistics for knowledge-based industrial policy making. The objective of the Industrial Statistics sub-component was to enhance the capacity of the Ministry of Industry, Trade and Marketing (MITM), the National Bureau of Statistics (NBS) and the Confederation of Tanzania Industries (CTI) to collaborate in the collection, compilation, analysis, report writing and dissemination of industrial statistics.

The first mission was fielded by the UNIDO Industrial Statistician in September 2008 during which an assessment of the data needs of different users was made and a work plan was proposed for the implementation of the recommended activities.

The second mission was undertaken in January/February 2009 as a follow up on the progress made and organized training in Industrial Statistics with emphasis on the utilization of the revised international recommendations for industrial statistics released in 2008. Following recommendations made previously for the improvement of the Industrial Statistical System in Tanzania the following were agreed:

- i. To conduct a joint Annual Industrial Survey involving the MITM, the National Bureau of Statistics and the Confederation of Tanzanian Industries (CTI).
- ii. To put in place an appropriate coordination mechanism between the MITM, NBS and CTI through setting up the Executive, Steering and Technical Committees and sign Memorandum of Understanding (MOU) for implementation of statistical activities including the conduct of the survey.

A third mission was undertaken in April/May 2010 by the UNIDO Industrial Statistician for the purpose of final data cleaning, generation of preliminary and final tables, and the production of the statistical report.

This report gives the major findings of the survey conducted in 2009 for the calendar year 2008 in regard to industrial establishments with ten or more workers. The survey was conducted under the provision of the Statistics Act 2002. The results are based on the UN

international recommendations for industrial statistics. It is hoped that the results will be of use to those engaged in planning, decision making and policy formulation.

## **1.2 Objective of the survey**

The Survey aimed at producing basic statistics according to UN international recommendations for industrial statistics. The survey was also intended to:

- i. Collect statistics on the operating characteristics and structure of industrial establishments operating in the country;
- ii. Assess the contribution of industrial sector to the overall economy;
- iii. Obtain data for computing national accounts estimates;
- iv. Obtain data for construction of Input-Output tables

### **1.2.1 General objective**

To collect and establish data that would serve for future monitoring and evaluation of implementation of adopted industrial policies, programmes and strategies. The survey aimed at providing information on the economic characteristics of Tanzania's industrial sector to management, policy makers and the private sector for uses in planning, policy formulation/review and monitoring and evaluation of government programmes aimed at improving the sector.

### **1.2.2 Specific objectives**

- (i) To assess the current status of the industrial sector in the country;
- (ii) To identify conditions that affect firm-level productivity and competitiveness;
- (iii) To secure inputs for use by the Government and other organs in developing/reviewing policies, programmes and strategies that support sector-productivity growth;
- (iv) To provide the private sector with facts to support dialogue with Government and other partners so as to enhance public-private sector partnership; and
- (v) To update existing data at the level of industrial establishments.

## **2.0 TERMS AND DEFINITIONS**

### **2.1 Employees: (operatives and other employees)**

Persons who during the reference period performed some work for an agreed amount of pay in cash or in kind. It includes operatives, and all persons employed on permanent, temporary or on casual terms

### **2.2 Operatives**

These are workers who are directly engaged in the production or related activities of the establishments including any clerical or working supervisory personnel whose function is to record or expedite any step in production process. They are paid workers who perform essentially manual work that is a direct part of the industrial activity of the establishment. Included in this group are persons engaged in extracting, packaging, inspecting or shipping of goods as well as persons engaged in clearing, maintenance, testing or record keeping services and working foremen.

### **2.3 Other employees**

Includes all paid workers other than the operatives. It includes all personnel in production management above the working foremen, managerial, technical, clerical and other office workers. Directors and all others who are not in receipt of regular pay are excluded.

### **2.4 Persons engaged**

This is the total labour force comprising of operatives, other employees, working proprietors and unpaid workers.

### **2.5 Compensation of employees**

Compensation of employees comprises all payments on wages and salaries to employees both in kind and in cash as well as contributions to social security, private pensions, casualty insurance and similar schemes.

### **2.6 Wages**

All cash payments made by the employer to the operatives in connection with the work done. It includes bonuses, overtime, cost of living allowances, commissions and payments made during vacation, sick leave, maternity or casual leave.

### **2.7 Salaries**

All cash payments paid to other employees, commissions and other allowances in connection with the work done. It also includes bonuses and overtime payments.

## **2.8 Benefits in kind**

These are payments made in kind to employees. It is the net cost to the employer of those goods and services given to employees free of charge or at markedly reduced prices. They include food, beverages, tobacco, household clothing etc.

## **2.9 Intermediate or production costs**

Intermediate consumption/production costs of industries covers durable and non-durable goods and services used up in production, including repairs and maintenance of the capital stock, research and direct outlays in the financing of capital formation such as transfer costs involved in purchases of land and intangible assets. The consumption of materials and supplies is the total cost of purchases adjusted by change in stocks of raw materials.

## **2.10 Gross output**

Gross output covers the value in the market of industrial goods and services produced including work in progress and products for own use. Value of goods sold is adjusted by the change in stocks of finished goods and work in progress.

## **2.11 Gross valued added**

Gross value added is equal to gross output less the value of the intermediate consumption/production cost. The sum of the value added of all domestic producers gives the contribution to the Gross Domestic Product (**G.D.P**). Gross Value added may be at factor cost, basic prices or at producers' prices depending on the treatment of taxes on production and subsidies. Value added at basic prices is obtained as the difference between gross output and intermediate consumption whereby output is valued at basic prices and intermediate consumption at purchasers' prices.

## **2.12 Net value added**

This represents the difference between gross value added and the depreciation.

## **2.13 Gross operating surplus**

Gross operating surplus is defined as the excess of value added over the cost of workers' compensation.

## **2.14 Depreciation**

Represents the estimated allowance for wear and tear of fixed assets during the respective accounting year. Throughout this report, the unit of value is the Tanzania shilling.

### **2.15 Expenditure on fixed assets**

This is the sum of the cost of new or old capital equipment acquired and value of assets produced on own account construction. Improvements and major alterations to existing fixed assets are also included

### **2.16 Gross additions to fixed assets**

This is the expenditure on fixed assets (additions) less total disposals of fixed assets

### **2.17 Value of Inventories (stocks)**

This item is comprised of the value of all materials and supplies, fuels, finished and semi-finished products and goods for resale, held by, or under the control of, the establishment (at the establishment or in ancillary or other warehouses).

### **2.18 Basic price**

The basic price is the amount receivable by the producer exclusive of taxes on products and inclusive of subsidies on products. It includes taxes on production.

### **2.19 Purchasers' price**

The purchasers' price is the amount payable by the purchaser exclusive of deductible taxes on products (e.g. deductible value added tax).

### **2.20 Size**

In the tables, which show results by size, the following descriptions are used:

10 - 19	-	Establishments with 10 to 19 persons engaged
20 - 49	-	Establishments with 20 to 49 persons engaged
50 - 99	-	Establishments with 50 to 99 persons engaged
100 - 499	-	Establishments with 100 to 499 persons engaged
500+	-	Establishments with 500 or more persons engaged

### **2.12 Ownership**

In the tables, which show results by ownership, the following descriptions are used:

**Public;** All establishments owned by government and all companies in which government has 50 percent or more shares capital.

**Private;** All establishments owned by private, all companies in which government has less than 50 percent shares capital, companies under Regional or District Cooperative Unions, companies under Cooperative Societies and other companies not stated above.

### **2.22 Formulae for derived statistical variables**

- (i)  $\text{Gross output} = \text{Total 5.2} + 5.333 + \text{Total (Additions from own production)} + \text{Total 5.3} + \text{Total 5.32} - 5.323 - 4.21 + 6.3(\text{Closing} - \text{Opening}) + 6.4(\text{Closing} - \text{Opening}) + 6.5(\text{Closing} - \text{Opening})$

- (ii) Intermediate Consumption = Total 4.1 + Total 4.22 + Total 4.31 + Total 4.32 + 3.06 – 6.1(Closing – Opening) – 6.2(Closing – Opening)
- (iii) Expenditure on non-industrial services = Total 4.32 + 3.06
- (iv) Receipt from non-industrial services = Total 5.32 – 5.323 – 4.21 + 6.5(Closing – Opening)
  - Compensation of employees = Total 3 – 3.06 – 3.07
- (vi) Taxes on production = 4.45
  - Subsidies = 5.333
- (viii) Value added = (a) – (b)
- (ix) Gross operating surplus = (h) – (e) – (f) + (g)
  - No. of employees = (2.33 + 2.34 – Total (2.21 + 2.22) – Total (2.23 + 2.24)) for both Tanzanian + Foreign

### **3.0 METHODOLOGY**

#### **3.1 Reference period**

Data on fixed assets and working capital were requested for and supplied on financial year basis, while the rest of the data was requested for and in many cases supplied on a 2008 calendar year basis. Those establishments that could not supply data according to calendar year due to allocation problems were advised to supply the data according to the financial years that covered larger part of the reference calendar year.

#### **3.2 Industrial classification**

Establishments were classified into industries on the basis of major activity in conformity with the International Standard Industrial Classification (ISIC) Revision 4. Each industry is basically defined in terms of its principal products or services, these being similar in nature or commonly associated in production

#### **3.3 Unit of enquiry**

This is an establishment defined as an economic unit which engages under a single ownership or control in one, or predominantly one kind of economic activity at a single physical location i.e. an individual firm, mine, factory or workshop. However, for certain firms which could not furnish separate data on an establishment basis, the enterprise was used as the unit of enquiry. It should be noted here that due to record keeping practices of some firms, it has not been possible in every case to strictly follow the definition of an establishment as stated above. There for in a few cases, the restrictions especially on location were relaxed.

#### **3.4 Scope and coverage of the survey**

The survey covered all industrial establishments with ten or more workers. The survey coverage comprised of 729 establishments.

According to the latest UN International recommendations, the industrial sector is comprised of establishments engaged in “Mining and quarrying” (ISIC Revision 4, Section B), “Manufacturing” (Section C), “Electric power generation, transmission and distribution” (Section D) and “Water collection, treatment and supply” (Section E).

Manufacturing, according to international recommendations, is defined as the physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand, whether it is done in a factory or in the worker’s home, and whether the products are sold at wholesale or retail prices.

#### **3.5 The questionnaire**

The questionnaire was designed according to “The International Recommendations for Industrial Statistics” of the United Nations and took into consideration the requirements of the stakeholders. The information collected satisfies the needs of national accounts and are considered to be useful to the government, researchers and the business community. For the questionnaire used, see Annex A.

The following, was the information collected through the questionnaire

3.5.1 General Information

Name, address, telephone number, principal activity and type of ownership etc.

3.5.2 Employment

Persons Engaged refers to average number of employees (operatives and other employees), working proprietors and unpaid family workers.

3.5.3 Labour costs

Wages, salaries, benefits in kind and employers contribution to social security schemes.

3.5.4 Inputs/purchases

Value of raw, packaging and chemical materials consumed, cost of re-sales, services received and other costs.

3.5.5 Output

Quantity and value of principal products manufactured, sales and service rendered to other firms, value of capital goods constructed by the establishment for own use and the value of subsidies received.

3.5.6 Inventory of working capital

Value of stocks of materials and stores, finished products and work in progress at the beginning and end of the accounting year.

3.5.7 Expenditure on fixed assets and depreciation

Capital expenditure on land, buildings and structures, machinery/equipment, vehicles and other fixed assets during the accounting year. Depreciations and disposals made on the respective fixed assets.

3.6 Response

Of the 874 surveyed establishments, 39 were found to be either closed or engaged in non-industrial activities. Out of the remaining 835 establishments 106 were small as then were operating with fewer than ten workers. The number of potential respondents therefore stood at 729. However, of these 52 did not respond to the survey despite all effort made by the fieldworkers. For these establishments, production estimates were worked out based on their previous responses to the NBS surveys. The production data presented in this report therefore refer to the 729 industrial establishments.

3.7 Data collection

Data collection was undertaken by a trained team of 33 enumerators under the supervision of 16 supervisors. Training of field-staff took place from 28<sup>th</sup> September to 6<sup>th</sup> October 2009. The NBS was responsible for the training of supervisors which was held in Dar es Salaam for

3 days. The Supervisors were then responsible for the training of enumerators in their respective regions.

Fieldwork started on the 7 October 2009 and was completed by the end of March 2010. The field-staff recruited in the 21 regions visited all establishments and helped in filling in the questionnaires. Respondents were asked to provide the data from their accounting records for calendar year 2008.

### 3.8 Data processing

Completed questionnaires were sent to the NBS headquarters in Dar es Salaam where they were edited and coded by MITM, NBS and CTI staff. The data entry system used was CSPro after which the data were transferred to Microsoft Access for generation of tables. The editing exercise was carried out on all questionnaires and estimates were made for the 52 establishments by means of substitutions using their 2007 responses. The cleaned dataset was then used to generate the preliminary tables as per tabulation plan. The statistical expert subsequently worked on the consolidation and formatting of the final tables.

### 3.9 Organisation of the report

The report presents the industrial statistics according to the latest UN recommendations (2008). The tables are grouped separately at the end of the report and refer to establishments with 10 or more workers. In total, there were 729 such establishments operating at the time of the survey.

The report also presents the main results relating to qualitative information that were also collected through the survey. Tables referring to such information are integrated within the section giving the major findings. The tables therefore refer to the respondents only as indicated therein.

## **4.0 MAJOR FINDINGS**

The Industrial Sector on Tanzania Mainland is relatively small but growing quite rapidly. According to national accounts estimates compiled by the NBS, the sector accounted for around 13.3% of GDP in 2007. The present survey reveals that, within the sector, manufacturing activities represent 84% in terms of value added but over 91% in terms of employment. The manufacturing sector is rightly seen as having the potential to contribute substantially towards employment creation, exports, revenue generation and economic growth.

### **4.1 Industrial statistics of establishments**

#### **4.1.1 Introduction**

Taking into consideration the reliability and precision of the data and to ensure confidentiality of information at individual establishment level, data have been classified in 19 main industrial groups of ISIC Revision 4.

#### **4.1.2 Limitations of the presented statistics**

This survey was the first to be jointly conducted by “parties”. The survey results comprise a comprehensive data set, which the parties as well as other users can make best use of. However, the users are cautioned that the survey had limitations which are listed below:

- i. The survey was conducted according to the international recommendations for industrial statistics. The tendency among establishments to hide information relating mainly to outputs and to over-report on inputs due to the belief that information supplied would be transmitted to the income tax authorities were apparent and dealt with in this exercise. The regular conduct of such surveys would help in dissipating this fear and at the same time improve the quality and reliability of the information supplied.
- ii. A number of establishments were engaged in several equally important but dissimilar activities. Because of non-availability of separate records, these establishments have been classified according to the activity with the highest output. Figures relating to a particular ISIC group might, therefore, include data for other secondary activities as well.
- iii. Many establishments could not provide detailed information for certain items such as:
  - a. Consumption of electricity, water and fuels separately
  - b. Purchase of raw materials and sales from own production by main product,
  - c. Values of stocks as well as values of fixed assets by type
  - d. Level of stocks and assets.

These and other missing data had to be estimated

- iv. A number of establishments do not have books of accounts.

The report includes tables on sales and purchases by product category. These should, however, be used with caution since many establishments did not report such details.

The above limitations, however, have no serious effect on the overall quality and reliability of the survey results. Statistics presented in this report reflect the current status and structure of the large establishments Tanzania Mainland's industrial sector. The Government, business community and other users can make very good use of these results, which constitute the only available information based on international recommendations for industrial statistics. In making use of the survey results in statistical/economic analysis, users to keep in mind the above limitations.

#### 4.1.3 Number of establishments

The numbers of industrial establishments that engage 10 or more person and operated on Tanzania Mainland were 729 in 2008. The highest concentrations of such establishments were in Dar es Salaam (383) followed by Arusha (51), Mwanza (39), Singida (27), Tanga (27), Kagera (26) and Kilimanjaro (24). (**Annex Table 1**)

Of the total establishments 643 were privately owned followed by publicly owned (72) and mixed ownership (14). The industrial establishments that were owned by nationals were 549, and the wholly foreign-owned were 121, the remaining 59 were in joint venture (**Annex Tables 2 and 3**).

Out of the 729 industrial establishments in 2008, the majority (680 or 93 percent) operated in the manufacturing sub-sector. Within this sub-sector, 240 were engaged in the "manufacture of food products, beverage and tobacco" with 203 solely in food manufacturing. Other important activities were "manufacture of furniture" (96), "manufacture of grain mill products" (61), "Printing" (54), "manufacture of rubber, plastics and non-mineral products" (41), "manufacture of basic metals and other metal products" (38), "manufacture of chemicals" (37) and "manufacture of vegetables and animal oils and fats" (31). **Annex Table 3** gives more details on the number of industrial establishments by important industry group.

There were 45 establishments engaging 500 or more persons of these 41 were in manufacturing. Out of the 45 establishments that engage 500 or more persons 11 were in Dar es Salaam. Arusha and Morogoro had 6 establishments each. The number of establishments engaging with 10 but less than 50 workers was 431. The number of establishments that engage 50 and up to 99 persons was 106 while those engaging 100 up to 499 persons were 147 (**Annex Tables 4 and 5**)

The following was the distribution of establishments by type of legal organisation: private limited companies (347), private companies (193), sole proprietorships (71), public (30), partnerships (29), parastatals (27), Cooperatives (26), and others (6). (**Annex Table 6**).

Of the establishment operating in 2008, 224 (30.7%) were establishments before 1990. The remaining establishments were established as follows: 1990 – 1994 (59, 8.1%), 1995-1999 (135, 18.5%), 2000-2004 (167, 22.9) and 2005 or later (144, 19.8) (**Annex Tables 7 and 8**).

#### 4.1.4 Employment and compensation of employees (wages and salaries)

The total number of persons engaged in the 729 industrial establishments was 117,622 of whom 107,388 were in "manufacturing". Establishments in Dar es Salaam at 34,554 (29%) employed the largest number of workers of whom 31,713 were in "manufacturing". Other regions which had relatively significant numbers of workers were Morogoro (19,474), Arusha (15,174 of whom 6,207 in textiles manufacturing), Iringa (12,779), Tanga (6,152), Kagera

(5,926) and Kilimanjaro (6,639). Employment in the other regions ranged between 201 in Lindi to 5,245 in Mwanza (**Annex Table 9**).

The 643 private establishments employed a total of 103,237 workers compared to 12,394 by the 72 public establishments. The 14 other (mixed) establishments had 1,991 workers (Table 10).

Establishments which were owned by nationals employed 53,950 persons compared to 42,192 by the foreign ones. The jointly owned establishments had 21,515 workers (**Annex Table 11**)

Most of the workers 70,089 (60%) were employed by the 45 establishments that were in the 500 or more size group. The 11 establishments in this category which were in Dar es Salaam had a total of 10,350 workers while Morogoro and Arusha each with 6 such establishments employed 18,353 and 11,747 persons respectively. (**Annex Tables 12 and 13**)

Out of the 107,388 workers in “manufacturing”, 43,792 were in food product manufacturing. Other important industry sub-sectors in terms of employment were “manufacture of other textiles” (13,430), “manufacture of beverages and tobacco products” (12,593), “manufacture of rubber, plastics and non-mineral products” (6,685), “manufacture chemicals including pharmaceutical products” (4,687), “printing” (3,695) and “manufacture of basic metals and fabricated metal products” (3,213). Details of employment by industrial activities are shown in **Table 14**.

Establishments which started operation before 1990 employed 62,660 workers. The establishments which started operation during the 2000 to 2004 period employed 20,390 while those that were established after 2005 employed 12,615 workers (**Annex Table 15**).

From 30<sup>th</sup> June 2008 to 31<sup>st</sup> December, 2008 the number of persons increased from 110,839 to 111,073. **Annex Tables 17 and 18** give the details by industry and region respectively.

**Annex Tables 19 and 20** show the distribution of persons engaged by employment status and sex. Out of the 111,622 workers, 83,450 (71%) were males. The paid employees were 116,381 comprised of 16,474 managerial and professional staff, 95,296 operatives (52,063 skilled) and others were 4,611. There were 1,685 foreign workers of whom 1,518 were males.

#### 4.1.5 Gross Output

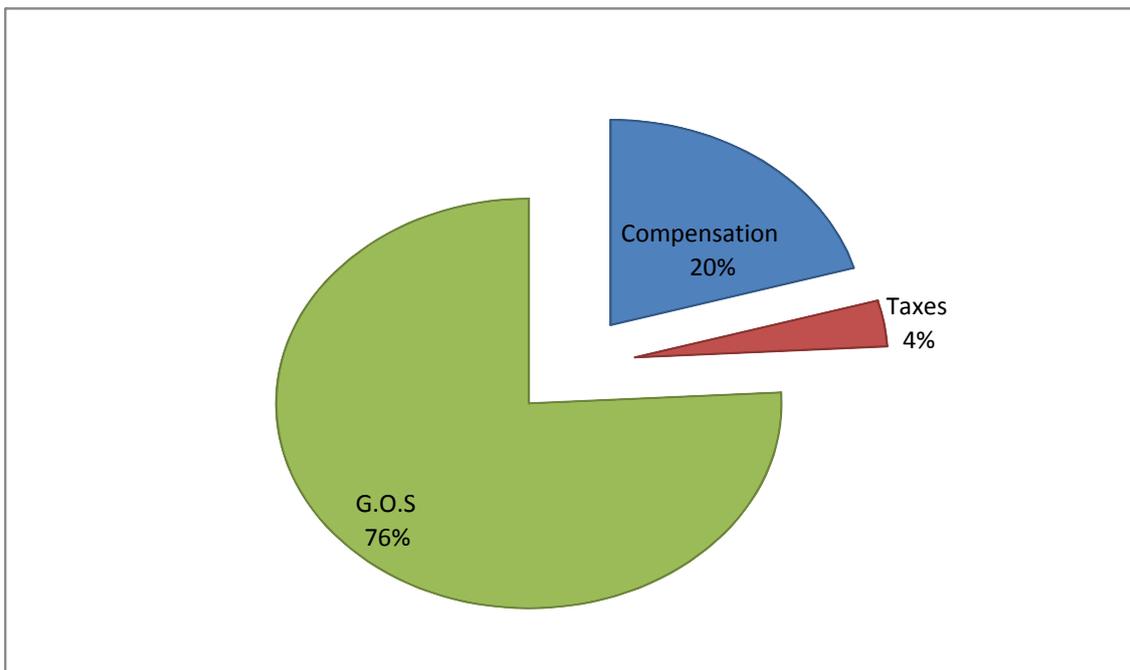

The gross output or total value of goods and services produced by the industrial establishments amounted to Tsh. 5,859,862 million in 2008. Sales of goods amounted to Tsh. 5,739,361 million of which around 14% or Tsh. 807,636 million were exported comprised mainly of food products. Receipt from services amounted to only Tsh. 38,519 million. Annex Table 26 shows the detailed breakdown of gross output by industrial activity.

Total cost of production, i.e. intermediate consumption amounted to Tsh. 3,735,398 million of which Tsh. 2,820,555 million represents the cost of raw materials purchased. Around 19% or Tsh. 527,341 million worth of raw materials were imported by the manufacturing industrial establishments. Services consumed amounted to Tsh. 594,985 million of which Tsh. 151,688 industrial whilst the consumption of electricity, water and fuels stood at Tsh. 442,099 million. A breakdown of intermediate consumption by industrial activity is given in Annex Table 22.

After deducting intermediate consumption from gross output we arrive at value added which measures the contribution of the industrial sector to GDP. It works out to Tsh. 2,124,464 million in 2008. Out of the value added generated by the sector, Tsh. 435,744 million were paid to employees as salaries and wages (compensation of employees). The remainder which after deducting Tsh. 77,011 million paid as taxes on production (less subsidies) to government represents gross operating surplus (or gross profits) and amounted to Tsh. 1,611,709 million,

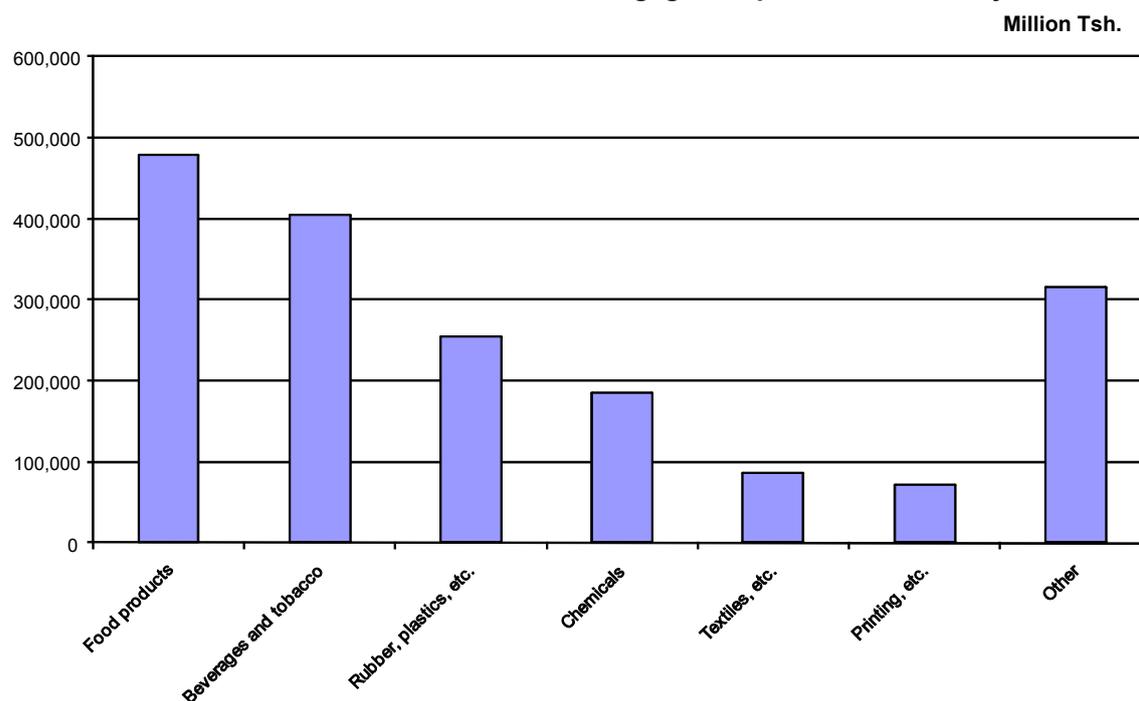

i.e. nearly 76% of value added. The gross operating surplus represents the gross amount that went to employers as remuneration for their capital.

**Figure 4.1.5.1: Components of value added for establishments that engaged 10 persons or more, 2008**

An analysis of value added by activity shows that nearly 84% of total value added (or Tsh. 1,797,383 million) generated by industrial establishments in 2008 came from the “manufacturing” sector. Within this sector, “manufacture of food products” generated the highest value added with Tsh. 479,245 million followed by “manufacture of beverages and tobacco products” (Tsh. 404,436 million), “manufacture of rubber, plastics and non-mineral products” (Tsh. 254,647 million) and “Manufacture of chemicals including pharmaceutical products (Tsh. 184,616 million). Value added of the large industrial establishments by main activity is given in Annex Table 34 and shown graphically in figure 4.1.5.2.

Figure 4.1.5.2: Value added of establishments that engaged 10 persons or more by industrial activity, 2008

#### 4.1.6 Value of fixed assets

The total value of fixed assets held by industrial establishments at the end of 2008 was Tsh. 13,312,028 million. The value takes account of depreciation during the year. Machinery and equipment accounted for around 19 percent of the total. However, it should be noted that many establishments did not provide the details by type of assets and lumped all assets held in the “other” category. Net investment during the year amounted to Tsh. 1,330,369 million mainly due to purchase of machinery and equipment (including transport) and construction of buildings. The value of fixed assets and net investment by industrial activity and type is given in **Annex Tables 30 and 31**.

## 4.2 Qualitative data

This section presents the main findings from the responding of the establishments to questions pertaining to their characteristics, mode of operation and perception (Sections 8, 9 and 10 of the questionnaire).

It should be noted that some establishments did not respond to some of the questions asked, especially qualitative questions. The results are based on those who answered the relevant questions.

### 4.2.1 Membership in professional associations

**Table 4.2.1: Number and percentage of establishments by membership in professionals associations**

Number of responded establishments	Members of professional associations (Number)	Non-members of professional associations (Number)	Percentage of members associated with.					
			CTI	Chamber of commerce	Association of Tanzania Employers	DSE	Chamber of Mines	Other
677	315	362	29	34	21	4	3	9

Out of the 677 large establishments 315 indicated that they were affiliated to professional associations. The table above gives the percentage of establishments affiliated to the different existing associations in the United Republic of Tanzania. The “Tanzania Chamber of Commerce, Industry and Agriculture” is the most popular followed by the “Confederation of Tanzania” (CTI) and the “Association of Tanzania Employers”.

#### 4.2.2 Licensing status

**Table 4.2.2: Number and percentage of establishments by licensing status and reason for not licensing**

Number of responded establishments	Number without a license	Reason for not licensing (%)				
		Finance	Too complicated	Too small	Feel no need	other
677	170	21	31	28	10	10

About 507 establishments indicated that they held a license at the time of the survey and 170 said that they did not. The main reason for not holding a license was that procedures were too complicated (31%). Twenty eight percent (28%) considered themselves to be too small to do while 21% indicated financial reasons.

#### 4.2.3 Tenure

**Table 4.2.3: Number and percentage of establishments by tenure**

Number of responded establishments	Tenure (%)		
	Wholly owned	Wholly rented	Partly rented
677	57	35	8

Most of the establishments (57%) owned their buildings compared to 35% that did not and 8 percent rented part of the premises used for business.

#### 4.2.4 Quality assurance

**Table 4.2.4: Number of establishments by quality assurance and employment**

Number of establishments certified with			Number having		Employment	
Food safety regulations	ISO	Tanzania Bureau of Standards	Raw materials control	Laboratory	Total	Quality control staff
243	128	247	363	199	117,622	4,213

Out of the 677 responses received 247 establishments indicated that they were certified by the Tanzania Bureau of Standards, 243 were certified by the Food Safety Regulations Agency and 128 by the International Organization for Standardization. The large establishments had a

laboratory were 199 and the number of quality control staff was 4,213 out of the total work force of 117,622 persons.

#### 4.2.5: Medium of exports

**Table 4.2.5: Number of establishments by medium of exports**

Directly	Through parent enterprise	Through another intermediary	Other	Total
76	23	9	3	111

About 111 establishments reported to have exported some or all of their output. Of these 76 exported their products directly, 9 through their parent enterprise and 23 had other intermediaries.

#### 4.2.6: Importance of trade agreements

Table 4.2.6: Number and percentage of establishments by importance of trade agreements

Type of agreement	Number that responded	Importance (%)				
		Not important	Helpful	Important	Very important	Crucial
Regional	111	18	34	34	10	4
International	111	17	33	33	15	2

The majority of the exporting establishments reported that trade agreements were important. However 17 percent of the establishments did not find the agreements useful.

#### 4.2.7 Barriers to expanding exports

**Table 4.2.7: Percentage of establishments by barriers to expanding exports**

Barriers	% of responses
Inadequate supply capacity	32
Stringent sanitary and phytosanitary rules	17
Low compliance to market standards	5
Inability to meet quality standards and delivery	7
Inadequate capacity to exploit preferential trade agreements	7
Limited promotion	5
Inadequate trade negotiations skills and market access	9
Other	17

Table 4.2.7 shows the main barriers mentioned by exporting establishments in regard to expanding their exports. Inadequate supply capacity was a barrier for 32 percent of the establishments. It was followed by stringent sanitary and phytosanitary rules at 17 percent.

#### 4.2.8 Source of water

**Table 4.2.8: Number and percentage of establishments by source of water used**

Number of respondents	Source of water (%)			
	Public network	River	Underground	Other
677	56	11	28	5

About 56% establishments used public network as their source of water. The percentage of establishments that used underground water was 28 percent, 11 percent sourced their water from rivers and 5 percent of the establishments used other sources.

#### 4.2.9: Environmental management

**Table 4.2.9: Number and percentage of establishments by environmental management and treatment facilities**

Number of respondents	Number having environmental regulations	Existence of treatment facilities for waste (%)	
		Yes	No
677	308	42	58

Table 4.2.9 shows that, 308 of those the respondents had environmental regulations in their unit with. 285 (42 percent) having treatment facilities for waste.

#### 4.2.10 Current technology status

**Table 4.2.10: Percentage and average number of establishments by current technology status**

Type of machinery	Percentage (%)	Average age of existing equipments (years)	Expected average lifespan of equipments (Years)
Manual	39	5.7	7.5
Semi-automatic	33	5	7.4
Computerized	6	0.9	1.7

Of the 677 establishments, only 6% reported using computerised machinery while 39 percent used manual machinery and 33 percent semi-automatic machinery. The average age of the computerised machines was around 0.9 year and their remaining lifespan was estimated to be 1.7 years. The average age and expected lifespan of the other machines were estimated to be around 5 and 7 years respectively.

#### 4.2.11 Investment plan

**Table 4.2.11: Number and percentage of establishments by investment position**

Number of respondents	% with investment plans	Reason for investment (%)			
		Replacement of old equipment	Expanding production capacity	Upgrading technology	% investing in other businesses
677	59	20	55	25	24

According to Table 4.2.11 59 percent of the establishments had investment plans and 55% of those with investment plans reported that the main reason for investing was to expand production capacity. The table shows the reason for investing as well as the percentage of establishments investing in other businesses.

#### 4.2.12 IT facilities

**Table 4.2.12: Number and percentage of establishments with IT facilities**

Number of respondents	Percentage with			
	E-mail	Website	LAN	WAN
677	62	31	35	14

The use of IT facilities was quite high among the establishments that responded to the survey questionnaire. The use email facility were responded by 62 percent of the establishments, 35 percent used LAN and 31 percent had websites.

#### 4.2.13 HIV/AIDS

**Table 4.2.13: Number and percentage of establishments by perception of HIV/AIDS**

Number of respondents	% with HIV/AIDS packages	Percentage (%) who think vulnerability to HIV/AIDS would be reduced by:				
		Workplace education	Treatment	Counselling	Capital intensive operations	Other
677	32	52	15	28	2	3

Of the 677 respondents, 216 (32 percent) reported having HIV/AIDS packages in their work places. The percent of respondents thought that the vulnerability to HIV/AIDS could be reduced by education or counselling was 80 percent. Those who thought that vulnerability could be reduced through treatment and other means were 20 percent.

4.2.14 Challenges facing establishments

**Table 4.2.14: Percentage of establishments by main challenges faced**

<b>Main Challenges</b>	<b>Percentage of Responses</b>
High cost of production	17
Inadequate technology or lack of equipments	7
Inadequate physical infrastructure	6
Complicated administrative procedures	2
Shortage of qualified labour	5
Foreign currency fluctuations	7
Insufficient production capacity	3
Shortage of raw materials	8
Taxes	10
Insufficient demand and marketing	9
Unfair competition	9
Infant Private sectors with weak support	5
Environmental challenges	3
HIV/AIDS pandemic	1
Uncertain economic environment	4
Other	3

The more acute challenge faced by Tanzanian establishments is the high cost of production. Table 4.2.14 shows the main challenges mentioned by the respondents.

## **5. WAY FORWARD/ RECOMMENDATIONS**

The following are the recommendations made on the basis of the present survey:

1. The frame, i.e. list of establishments to be covered by the survey should be prepared by the different stakeholders well before the launching of the survey to avoid exclusion of important establishment.
2. Use of computer editing procedure by defining validation rules in the system should be stressed to minimize human errors. The quality of the data can be further improved by the following:
3. Use of a shorter questionnaire. This will reduce respondent burden by requesting information on the main industrial statistics internationally recommended (establishments inputs and outputs). Inclusion of perception/qualitative questions in the survey should be reconsidered.
4. Training of enumerators and supervisors should be provided by parties under supervision of NBS.
5. Need to have the support of various industries and employers' associations before the launching of the survey should be emphasized. This may be facilitated through a workshop to sensitize participants on the importance of statistical data for policy decision making.. CTI should play their role properly and not to assign MITM only
6. Future surveys should be based on lessons learnt from the technical assistance received from the UNIDO. It is firmly believed that the project has been fruitful in building the appropriate capacity for the collection, processing and dissemination of industrial statistics as per internationally agreed principles and recommendations thus the survey should be conducted jointly by MITM, NBS and CTI.

**Table 1: Number of establishments by industrial activity and region-2008**

		(Number)								
ISIC Rev.4	Industrial activity	Region

**The questionnaire**

**PART I: ESTABLISHMENT DESCRIPTION**

1.1 Full Name of the Establishment:.....

1.2 Mailing Address:.....

1.3 Physical location of the establishment

Region:..... 

--	--

 Village:.....

District:..... 

--	--

 Street:.....

Ward:..... 

--	--	--

 Plot No:.....

1.4 Tel:..... 1.5 Mobile:..... 1.6 Fax No :..... 1.7 E-mail: .....

1.8 Name of contact person:.....

Designation:..... Tel./Mobile:.....

1.9 Economic organisation of the establishment:

Please write correct number in the box provided

--

1. Single establishment
2. Head office – owns or controls other establishments
3. This establishment is owned and controlled by another establishment

*If the box is marked 3, please provide name and address of head office*

Name: .....Address:.....

**1.10 Activity of the Establishment:**

*(For official use only)*

Principle Activity:.....

Other activity:.....

--	--	--	--

**1.11 Main products manufactured:.....**

.....  
 .....  
 .....

**1.12 Origin of ownership (Circle the correct answer)**

- 1 National
- 2 Foreign
- 3 Joint                      If 3, please indicate % of National: .....

--	--

**1.13 Form of ownership( Circle the correct answer)**

- 1 Public
- 2 Private
- 3 Mixed                      If 3, please indicate % of Public: .....

--	--

**1.14 Type of legal organisation: (Circle the correct answer)**

- |                          |   |                              |   |
|--------------------------|---|------------------------------|---|
| Sole proprietorship..... | 1 | Cooperative .....            | 5 |
| Partnership.....         | 2 | Private company .....        | 6 |
| Public.....              | 3 | Private limited company..... | 7 |
| Parastatal.....          | 4 | Other, specify.....          | 8 |

**1.15 Source of finance( Total investments and operating capital):**

- Personal and relatives
- Loans from banks and other credit institutions
- Government
- Other, specify.....

('000) Shs

**1.16 Year the establishment started operation :**

.....

**1.17 Period to which data in this questionnaire refer to: From: ..... To: .....**

**PART II: INDUSTRIAL PRODUCTION**

**2. EMPLOYMENT**

**2.1 Number of persons engaged**

(Number)

Employment as at	code	Tanzanian	Foreign	
<b>30' June – 2008</b>	2.11			Males
	2.12			Females
<b>31' December – 2008</b>	2.13			Males
	2.14			Females

**2.2 Average number of persons engaged including part time workers**

Category	code	Tanzanian	Foreign	
<b>Working proprietors and partners</b> ( <i>Active owners of the legal entity</i> )	2.21			Males
	2.22			Females
<b>Unpaid workers</b> ( <i>Members of religious institutions, family members, prisoners, J.K.T militia and the like</i> )	2.23			Males
	2.24			Females
<b>Employees:</b>				
<b>Managerial and professional staff</b> ( <i>Managerial, technical, clerical and other office workers etc</i> )	2.25			Males
	2.26			Females

Number of outworkers paid by subcontractors as at 31 December 2008	2.35			Males
	2.36			Females

**3. LABOUR COSTS DURING THE REFERENCE PERIOD**

**(‘000) Tshs**

3.01 Gross wages and salaries paid to employees (including bonus and gratuities)	<input type="text"/>
3.02 Overtime payments	<input type="text"/>
3.03 Reimbursement of travel expenses	<input type="text"/>

3.04 Payments in kind, e.g food, drinks, fuel	
3.05 Employer's contribution to social Security Schemes (e.g, NSSF)	
3.06 Training expenses	
3.07 Other labour costs ( <i>please specify</i> )	

**4. PURCHASES MADE DURING THE REFERENCE PERIOD (*please exclude VAT*)**

**4.1 Electricity, water and fuels consumed**

Description	Unit	Quantity	Value (000' Shs)
4.11 Electricity	KWH		
4.12 Water	M <sup>3</sup>		
4.13 Gas			
4.14 Fuel for machines and vehicles			
4.15 Wood, charcoal and peat			
4.16 Other fuels, please specify			
<b>Total</b>			

**4.2. Goods purchased**

4.21 *Cost of goods sold as purchased (000' Shs):*.....

4.22 *Materials and supplies purchased*

**Value in (000' Shs)**

CPC Code	Description	Unit	Imported		Local	
			Quantity	Value	Quantity	Value

*Annual Survey of Industrial Production 2008*

	Other including stationery and spare parts					
<b>Total</b>						

**4.3 Services consumed**

**4.31 Industrial services**

Description	Amount (000' Shs)
4.311 Contract and commission paid for work done on your materials (e.g., outworkers)	<input type="text"/>
4.312 Cost of repairs and maintenance work	<input type="text"/>
4.313 Waste treatment costs	<input type="text"/>
<b>Total</b>	<input type="text"/>

**4.32 Non-industrial services**

Description	Amount (000' Shs)
4.321 Postage and other communication costs	<input type="text"/>
4.322 Rental of building, machinery, plant and equipment	<input type="text"/>

<b>F. OTHER TAXES ON PRODUCTION</b>	4.45	
<b>G. SUBSIDIES</b>	5.333	
<b>H. GROSS OPERATING SURPLUS</b>	(D – E – F)	

**PART III: OTHER INFORMATION**

**Membership**

**8.1 (Please tick as appropriate)**

**8.11 Is the establishment member of any association?**

1 Yes

2 No

*If No go to 8.112*

**8.1 If yes, please indicate whether ( Multiple answers are allowed)**

- Confederation of Tanzania Industries (CTI)* 1
- Tanzania Chamber of Commerce, Industry and Agriculture (TCCIA)* 2
- Association of Tanzania Employers (ATE)* 3
- Dar es Salaam Stock Exchange (DSE)* 4
- Chamber of Mines* 5
- Other, specify.....* 6

**8.112 Awareness of services/Functions provided**

	<i>CTI</i>	<i>ATE</i>	<i>TCCIA</i>	<i>DSE</i>	<i>Mines</i>
<i>Aware</i>					
<i>Not aware</i>					

**8.2 Does the establishment have a license?**

**Yes 1 No 2**

**8.21 If yes,**

<i>Date</i>	<i>License number</i>	<i>Allocating authority</i>	<i>Type of license</i>
E.g 02/08/2005	41527893	<i>Ministry of Trade, Industry and Marketing</i>	<i>Business license</i>

**8.2 If No, why?**

- Finance* 1
- Complicated bureaucratic procedures* 2
- Too small business* 3
- Does not feel the need* 4
- Other, specify.....* 5

**8.3 Tenure of building occupied for own business**

- Wholly owned* 1
- Wholly rented* 2
- Partly rented* 3

- 8.73 Evaluate the importance of International Trade Agreements (eg. W.T.O)
- Not important 1
- Helpful 2
- Important 3
- Very important 4
- Crucial 5
- 8.74 What do you consider the most important barriers to expanding your export activities?
- Inadequate supply capacity 1
- Stringent Sanitary and Phytosanitary (SPS) Rules 2
- Low compliance to the market standards 3
- Inability to meet quality standards and delivery 4
- Inadequate capacity to exploit preferential trade agreements 5
- Limited promotion 6
- Inadequate trade negotiation skills and market access 7
- Other, specify..... 8

**8.8 Source of water** (please tick as appropriate)

- Public network 1
- River 2
- Underground water 3
- Other, specify..... 4

(please encircle as appropriate)

8.9 Environment management & technology

8.91 Is there any environmental management plan? Yes 1 No 2

8.92 Does establishment have treatment facilities for waste? Yes 1 No 2

8.93 If yes, method of treatment

Type of waste	Method of treatment*
Water	
Gas	
Solid	

eg. Recycling, incineration, landfill,compostin or Municipal facilities etc

8.94 Current technology status

Type of machinery	%	Source*	Average age	Expected average lifespan of equipments
Manual				
Semi-automatic				
Computerized				

\* Please indicate whether local, imported or both

8.95	Does the establishment have any investment plans? If yes, please indicate whether for:	Yes	1	No	2
	Replacement of old equipment		1		
	Expanding production capacity		2		<input type="text"/>
	Upgrading technology		3		
8.96	Does the establishment invest in other business?	Yes	1	No	2
8.97	Does the establishment have:				
	Email facilities?	Yes	1	No	2
	Website?	Yes	1	No	2
	Local Area Network (LAN)?	Yes	1	No	2
	Wide Area Network (WAN)?	Yes	1	No	2

**9.0 HIV/AIDS**

9.1 Does your establishment have HIV/AIDS work place packages?

**Yes 1 No 2**

9.2 *What are the methods that you think will reduce industrial sector vulnerability to HIV/AIDS?*

<i>HIV/AIDS workplace education and prevention</i>	1
<i>Treatment</i>	2
<i>Counselling</i>	3
<i>Movement towards capital intensive operations</i>	4
<i>Other, please specify .....</i>	5

**10 Major challenges facing your establishment**

*(Multiple answers are allowed)*

High cost of production	1	Insufficient demand and marketing
Inadequate technology or lack of equipment	2	Unfair competition
Inadquate physical infrastructure (roads, water, etc.)	3	Infant Private Sector with weak support
Complicated administrative procedures	4	Environmental challenges
Shortage of qualified labour	5	HIV/AIDS pandemic
Foreign currency fluctuations	6	Uncertain economic environment
Insufficient production capacity	7	Other, please specify .....
Shortage of raw materials	8	
Taxes	9
