PRESS RELEASE

Date: 24th May, 2021

PRODUCER PRICE INDICES FOR THE QUARTER ENDING MARCH, 2021

Introduction

The National Bureau of Statistics hereby releases the Producer Price Index (PPI) for the first quarter January-March of 2021. The Producer Price Index measures the average change over time in the prices received by selected domestic producers for the production of their goods. A basket includes a list of selected commodities of goods that are being priced on quarterly basis. The producer prices collected as at 15th of the mid-month of every quarter that is; (Q1: January-March), (Q2: April-June), (Q3: July-September) and (Q4: October-December).

Weights and a Reference Period

The index weights are based on gross output derived from the 2015 Annual Survey of Industrial Production (ASIP 2015). The Producer Price Index on this release reports the indices with reference to Fourth Quarter (October-December) of the year 2018(2018Q4=100). It shows the producer price changes since December 2018 up to first quarter of 2021.

Classification

Industrial Classification follows the International Standard Industrial Classification of All Economic Activities (ISIC) Rev.4.

Methodology

In the process of deriving the structure and weights, a top-down approach was adopted in order to maximize the indirect representation of industries and items. The basket was selected and base weights were calculated from Gross Output (GO) based on The Annual Survey of Industrial Production of 2015. During the process of weights calculation, establishments with a contribution of at least 80% of Gross Output were selected in each ISIC Rev.4 Group.

A sample of establishments for inclusion in the price survey was then selected using cut-off sampling procedures.

The first level of aggregation is the class 4-digit ISIC; these indices are the un-weighted Elementary Aaggregates (EA) and are being compiled using the Jevons geometric mean aggregation formula which refers to the Geometric Mean of the price relatives. The Elementary Aggregates indices are then being progressively combined with higher levels within the index structure (i.e. Group 3-digit, 2-digit division and 1-digit Section levels of the ISIC, and then the all-groups levels) using the standard base-weighted Laspeyres formula.

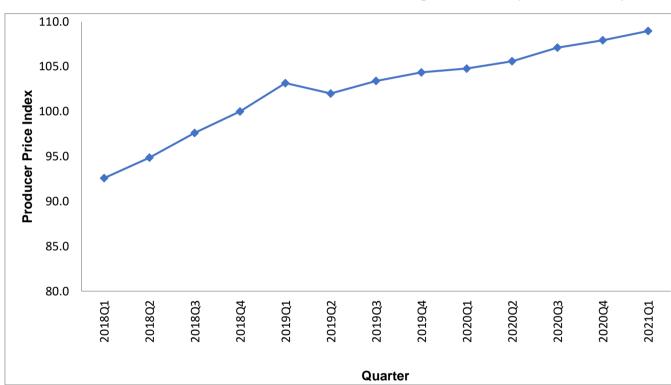

Chart 1: Overall Producer Price Indices for the Quarter Ending March, 2021 (Dec 2018 = 100)

Table 1: Producer Price Indices by Sub-sectors and Major Groups

^{*}Utilities includes; Electric power generation, transmission and distribution and Water collection, treatment and supply

Overall index recorded an increase of 1.0 percent from 107.9 of fourth quarter 2020 to 109.0 of

first guarter 2021. An increase was attributed by Manufacture of wood and of products of wood

and cork, except furniture; manufacture of articles of straw and plaiting materials by 9.2 percent

followed by manufacture of food products by 4.2 percent and Manufacture of electrical

equipment by 2.8 percent. On the other hand, Manufacture of computer, electronic and optical

products decreased by 10.7 percent followed by Repair and installation of machinery and

equipment 4.4 percent and Manufacture of paper and paper products by 1.3 percent.

Looking at percentage change on the same quarter (first quarter 2020 to first quarter 2021), the

overall index recorded an increase of 4.0 percent from 104.8 first guarter 2020 to 109.0 first

quarter 2021. An increase was Manufacture of tobacco products by 21.4 percent followed by

other mining and quarrying by 21.0 percent: and Manufacture of wood and of products of wood

and cork, except furniture; manufacture of articles of straw and plaiting materials by 18.8

percent. On the other hand, Manufacture of leather and related products decreased by 5.4

percent followed by Repair and installation of machinery and equipment by 4.4 percent and

Manufacture of computer, electronic and optical products with a decrease of 4.3 percent.
