## **PRESS RELEASE**

Date: 8<sup>th</sup> December, 2017

### **NATIONAL CONSUMER PRICE INDEX (NCPI) FOR NOVEMBER, 2017**

#### **METHODOLOGICAL NOTE**

##### **Definition**

The NCPI measures the change over time in the cost of a fixed basket of goods and services that are purchased by a representative sample of households in Tanzania. A basket includes a list of 278 goods and services of which 97 are Food and Non Alcoholic Beverages and 181 are Non Food items that are being priced on monthly basis.

##### **Weights and a Reference Period**

The NCPI weights are based on monetary expenditures relating to consumption for all households in the 25 geographic regions of Tanzania. The index weights are based on expenditures of both urban and rural households derived from 2011/12 Household Budget Survey and the price reference period is December, 2015.

##### **Classification**

The NCPI follows the internationally recommended Classification of Individual Consumption by Purpose (COICOP). NCPI is being disseminated with indices for the 12 major groups of COICOP as well as several additional index aggregations. These additional indices are; 1) Food and Non-alcoholic Beverages - combining food consumed at home and food consumed in restaurants; 2) Energy and Fuels - combining electricity and other fuels for use at home including petrol and diesel; 3) All Items Less Food; and 4) All Items Less Food and Energy.

##### **Elementary and Higher Level Indices**

The NCPI has incorporated a number of methodological improvements including the use of geometric mean of price relatives for compiling elementary index aggregates, the use of an improved index compilation system, and improved procedures for collecting and processing prices. The Lowe Index formula which is Laspeyres index formula type continues to be used for computing higher level aggregates for the NCPI.

## ANNUAL HEADLINE INFLATION RATE DECREASES TO 4.4%

The Headline Inflation Rate measures inflation rate when all items in the fixed CPI basket are included. Table number 1 above indicates that, Annual Headline Inflation Rate for the month of November, 2017 has further decreased to 4.4% from 5.1% recorded in October, 2017. This decrease in headline inflation explains that, the speed of price change for commodities in the year ending November, 2017 has decreased compared to the speed of price change recorded in the year ended October, 2017. The overall index went up to 108.94 in November, 2017 from 104.32 recorded in November, 2016. Food and Non Alcoholic Beverages Inflation Rate for the month of November, 2017 has further decreased to 7.4% from 8.8% recorded in October, 2017.

### Food and Non Food Inflation Rates

Annual Inflation Rate for food consumed at home and away from home has decreased to 7.9% in November, 2017 from 9.4% recorded in October, 2017. In addition, the 12 month index change for non-food products has slightly decreased to 2.9% in November 2017 from 3.0% recorded in October, 2017.

## Inflation Rate excluding Food and Energy

The Annual Inflation Rate which excludes food and energy for the month of November, 2017 has decreased to 1.4% from 1.7% recorded in October, 2017.

The NCPI used to compute this type of Inflation Rate excludes food consumed at home and restaurants, non alcoholic beverages, petrol, diesel, gas, kerosene, charcoal, firewood and electricity. Excluding food and energy which are the most volatile components in the total NCPI could provide a more stable Inflation Rate figure for Policy Makers.

**Chart 1: Movement of National Consumer Price Indices (NCPI) and Inflation Rates from November, 2016 – November, 2017. (Dec., 2015 = 100)**

Chart number 1 above explains that; CPI has shown a relatively stable movement of prices from November, 2016 to November, 2017. In addition, Annual Headline Inflation Rates over the same period have shown a stable trend of movement from 4.8% in November, 2016 to 4.4% in November, 2017.

## MONTHLY CHANGE OF CONSUMER PRICE INDEX FROM OCTOBER, 2017 TO NOVEMBER, 2017

The Consumer Price Index from October, 2017 to November, 2017 has changed by 0.5%, compared to negative 0.1% recorded in October, 2017. The overall index has increased to 108.94 in November, 2017 from 108.41 recorded in October, 2017. The increase of the overall index is mainly attributed to price increase for both food and non-food items. Some food items that contributed to such an increase include; rice by 0.9%, sorghum grain by 2.5%, sorghum flour by 6.9%, fresh fish by 3.2%, dried sardines by 4.2%, vegetables by 1.5%, round potatoes by 5.7%, cassava fresh by 2.7%, sweet potatoes by 2.8%, dry cassava by 4.2%. On the other hand, non-food items that contributed to such increase include; kerosene by 4.6%, diesel by 2.0% and petrol by 2.8%.
