## PRESS RELEASE

Date: 9<sup>th</sup> October, 2017

### NATIONAL CONSUMER PRICE INDEX (NCPI) FOR SEPTEMBER, 2017

#### METHODOLOGICAL NOTE

##### Definition

The NCPI measures the change over time in the cost of a fixed basket of goods and services that are purchased by a representative sample of households in Tanzania. A basket includes a list of 278 goods and services of which 97 are Food and Non Alcoholic Beverages and 181 are Non Food items that are being priced on monthly basis.

##### Weights and a Reference Period

The NCPI weights are based on monetary expenditures relating to consumption for all households in the 25 geographic regions of Tanzania. The index weights are based on expenditures of both urban and rural households derived from 2011/12 Household Budget Survey and the price reference period is December, 2015.

##### Classification

The NCPI follows the internationally recommended Classification of Individual Consumption by Purpose (COICOP). NCPI is being disseminated with indices for the 12 major groups of COICOP as well as several additional index aggregations. These additional indices are; 1) Food and Non-alcoholic Beverages - combining food consumed at home and food consumed in restaurants; 2) Energy and Fuels - combining electricity and other fuels for use at home including petrol and diesel; 3) All Items Less Food; and 4) All Items Less Food and Energy.

##### Elementary and Higher Level Indices

The NCPI has incorporated a number of methodological improvements including the use of geometric mean of price relatives for compiling elementary index aggregates, the use of an improved index compilation system, and improved procedures for collecting and processing prices. The Lowe Index formula which is Laspeyres index formula type continues to be used for computing higher level aggregates for the NCPI.

## ANNUAL HEADLINE INFLATION RATE INCREASES TO 5.3%

**Table 1: Changes in the NCPI for September, 2017, (Dec., 2015 = 100)**

The Headline Inflation Rate measures inflation rate when all items in the fixed CPI basket are included. Table number 1 above indicates that, Annual Headline Inflation Rate for the month of September, 2017 has increased to 5.3% from 5.0% recorded in August, 2017. This increase in headline inflation explains that, the speed of price change for commodities in the year ending September, 2017 has increased compared to the speed of price change recorded in August, 2017. The overall index went up to 108.48 in September, 2017 from 103.03 recorded in September, 2016. Food and Non Alcoholic Beverages Inflation Rate for the Month of September, 2017 has increased to 9.3% from 8.6% recorded in August, 2017.

### Food and Non Food Inflation Rates

Annual Inflation Rate for food consumed at home and away from home has increased to 9.8% in September, 2017 from 9.1% recorded in August, 2017. In addition, the 12 month index change for non-food products has stagnated at 3.1% in September, 2017 as it was recorded in August, 2017.

## Inflation Rate excluding Food and Energy

The Annual Inflation Rate which excludes food and energy for the month of September, 2017 has slightly decreased to 1.7% from 1.8% recorded in August, 2017.

The NCPI used to compute this type of Inflation Rate excludes food consumed at home and restaurants, non alcoholic beverages, petrol, diesel, gas, kerosene, charcoal, firewood and electricity. Excluding food and energy which are the most volatile components in the total NCPI could provide a more stable Inflation Rate figure for Policy Makers.

**Chart 1: Movement of National Consumer Price Indices (NCPI) and Inflation Rates from September, 2016 – September, 2017. (Dec., 2015 = 100)**

Chart number 1 above explains that; CPI has shown a relatively stable movement of prices from September, 2016 to September, 2017. In addition, Annual Headline Inflation Rates over the same period have shown a stable trend of movement from 4.5% in September, 2016 to 5.3% in September, 2017.

## MONTHLY HEADLINE INFLATION RATE FOR SEPTEMBER, 2017 INCREASED BY 0.02%

The Monthly Headline Inflation Rate for the month of September, 2017 has increased by 0.02% compared to a decrease of 0.4% recorded in August, 2017. The overall index has increased to 108.48 in September, 2017 from 108.46 recorded in August, 2017. The increase of the overall index is attributed to price increase of food and non-food items. Some food items that contributed to such increase include; dried sardines by 7.6%, dried fruit such as coconuts by 3.1%, sweet potatoes by 3.0%, rice by 1.5% and cooking bananas by 1.5%. Some non food items that contributed to such increase include; charcoal by 4.0%, diesel by 2.4% and petrol by 0.6%.

## PURCHASING POWER OF TANZANIAN SHILLING IN SEPTEMBER, 2017 FROM DECEMBER, 2015

The Purchasing Power of the consumer's Tanzanian Shilling measures the change in the value of consumer goods and services that a Tanzanian Shilling could buy at different periods. That is, if the overall level of Consumer Price Index (CPI) goes up, the Purchasing Power of a Tanzanian Shilling goes down.

The purchasing power of 100 Tanzanian Shillings has reached TZS 92 and 18 cents in September, 2017 compared to TZS 92 and 20 cents recorded in August, 2017.

### PRICE MOVEMENTS

**Chart 2: Price Movements of Different Groups of CPI from September, 2016 – September, 2017 (Dec., 2015 = 100)**

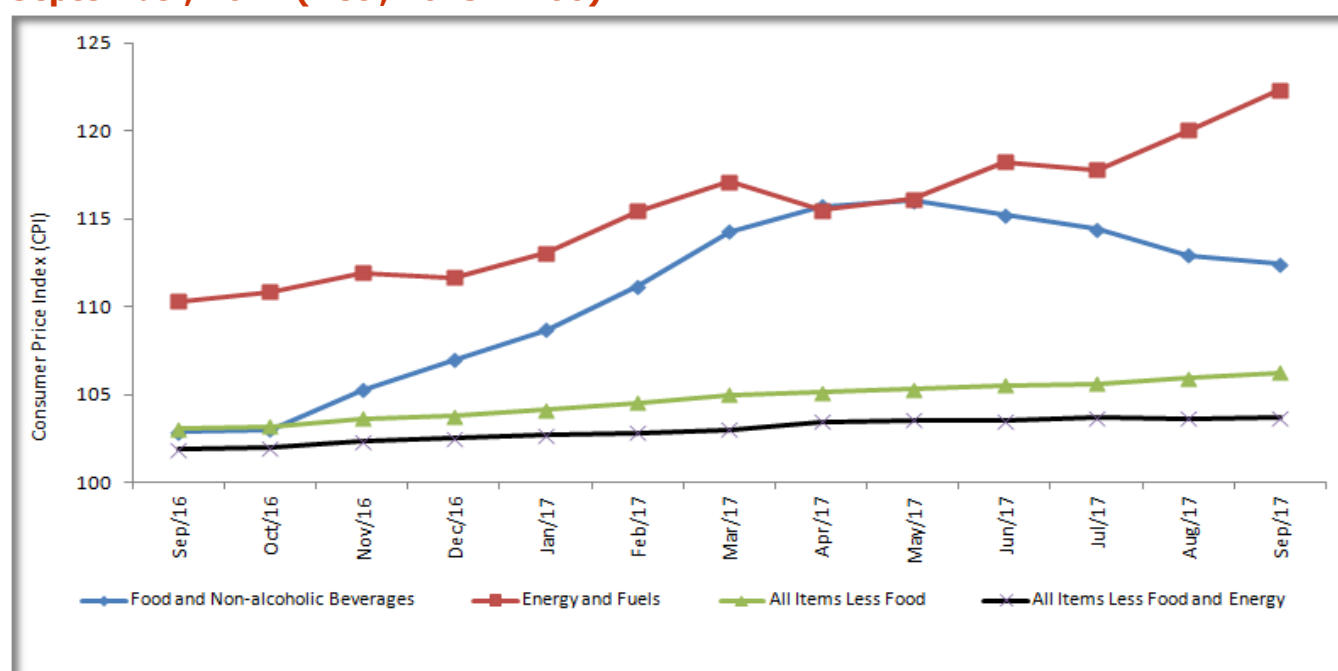

Chart number 2 above shows price movement of different groups of Consumer Price Indices from September, 2016 to September, 2017. On average, Energy and Fuel Index; and Food and Non Alcoholic Beverages indices have had a higher upward trend over the period compared to other indices. Furthermore, energy and fuels portrayed unstable price movements compared to other indices. Indices for all items without food and all items without food and energy have indicated a much stable price movements.
